Searching the FAQs

You may wish to use the powerful search capabilities of Adobe Acrobat® to quickly locate the information you desire. To do this **you must install Adobe Acrobat Search and ensure that the proper indexes are selected**. If you installed Acrobat Reader 3.0 from this or the accompanying CD-ROM disks, the Acrobat Search was installed automatically. There are two (2) electronic indexes that must be loaded (if they aren't already) in order to use the Acrobat search capabilities with this CD. These need to be accessed/selected from within the Adobe Acrobat Reader 3.0 application. The index files are located on the Learning CD in the directories (folders) called FAQ_PDFS and UFAQPDFS, respectively. For more information on using Search and loading indexes, see the Adobe Acrobat Search Online Guide.

Note: You may encounter chapter names *other than* those listed above when using the Adobe Acrobat Search capability since the indexes were designed to reference every chapter included on the *Adobe FAQ* companion CD-ROM (and not just those included on this Learning CD). If you try to open those (absent) chapters, you will see the following (or similar) error message indicating that those FAQs are not available for viewing.
