What VTC Customers say about our Products

"Bravo VTC! I give VTC four stars and two thumbs up! Now everything I need to know is just a few mouse clicks away. Using your products is easy and fun — they really bring the information to life! Thanks to you my boring old computer manuals are now collecting dust. I'm thinking of using them to light the barbeque. If VTC training movies ever go to the big screen I'll be sitting front row with a bucket of popcorn, you bet."

— John Mariani, San Jose, CA

"... [Your products] are the best investments I've ever made. I attended a computer school to get started with the Mac, and after paying \$1,100 for hands-on training, I found it impossible to remember everything we'd covered. Your CD included more information, in an easier-to-understand presentation, than the many weeks of school I attended. It also gives me an instant reference for all the things I am trying to learn ... It's like having a private tutor built right into my computer."

— James T. Axworthy, Woodridge Press Inc., Anaheim, CA
