A: Alot...

1.2 Magic Rabbit's Magic Iconcollection #1

Magic Rabbit's Magic Iconcollection is a new 8 colors MagicWB2.0 style icons and patterns

collection, i put most work in to making patterns for th'a Workbench'e...

I only make 8 colors icon beacuse 3 reasons...

* There is no standrard 16 colors palett, not when this is written, which know about.

The Roman Patzner palett is the closest thing to a standard...

* A 16 colors workbench is memory wasiting,

* 8 colors is enough...

<Games>

The 'SimAnt' icon was made for privat purpose (I still have the game on my HD i included it just beacuse make the archive biggger :)

'Der selenterum' is a German speaking game, don know if it exists a version in a understandable Languge, like the Klingon for exampel...

<Comodities>

The speak much forthemself (put the speaker on REAL loud and you will hear them !)

<Utilities>

'Atari simulatur 3' is supose to be the new amiga logo showing, (The 3 stripes)

Isn't Adpro + ditering + Dpaint is a wonderful combination :)

Sorry about most of the patterns only is in Hires Laced, i might DElace them in future

Magic Rabbit icon collections... It would take to much space to provide unlaced patterns also...

The patterns are drawn by me, exept were noticed, (check the tooltypes)
The scaled pictures is drawed by other persons and i thank them alot for making them,
thoug the picture autors have no ide I stole the pictures from them... He he he :)
