

6. Should we expect XS4ALL prices to change ?

Our price-list went into effect in October, 1994. We do not think it is necessary to change prices again soon in any significant way. Any further developments will be announced in the `xs4all.announce` newsgroup.

We are charging for UUCP and SLIP/PPP separately because these services add to our operating costs, like set-up time, disk space and line capacity requirements.
