1.2 Introduction...

Introduction

~~~~~

This package contains 13 new Hight-Quality Magic-Backgrounds for use with Martin Huttenloher's MagicWB. I created 40 backgrounds before - this is the fourth release.

I always tried to create patterns wish have no visible borders and can be repeated without looking trivial. I didn't want to be one of the authors wo put a dozen copies of the same pattern into an archive - just with different colors or with serveral figures drawn on it. I think thats not worth downloading...

---

This time all backgrounds were taken from several photos. I processed the raw-material with ADPro 2.5.0 and finished it with DPaint 4.5, pixel by pixel - several days of work.

Result: the best backgrounds available (IMHO)!  
Additionally I have included two classic Boot-Pictures and two older backgrounds which fit very well into this package ;-)

As you can see this package is  
SHAREWARE

My previous releases were freeware - I just asked to send me comments by e-mail. So far, only a few nice guys (around 12) send me mail. BUT: I know that very much people use my backgrounds everywhere: on their Workbench, with MUI, inside DEMOS, on WWW-pages,...

Therefore I decided to publish seven of 13 backdrops crippled: they are marked with a cross. You will receive a personalised package if you  
register
