```

---

If you use the MagicCopper, witch is a part of MagicWB you have to notice this:

The Guide and all Icons / Images of F.WB+ II use the Colour 8 (your Copper Color definition).

The Colour 8 is now darkgrey (80,80,80) and it's needed on all Icontemplates of F.WB+ II.

If you like to use the Copper-Tool:  
 Change the Coppercolour N° on the Tooltypes (Col=x) and draw a Pattern with the same x Color.  
 Replace the old AGA\_Pattern with your new drawing and restart the Coppertool.

For more details about the Colours see the Guidefile.
