Chapter 1

SFX

1.1 Operators : Swap

Swap

Function : Swaps sample data repeatedly within a certain range

Parameters: Effect How much the operator effects the outcome

Swaprange Range that is to be swapped

ARexx : P1 Effectpropotion

P2 Range

Notes : The range shouldn't be too big as the sample might sound "retarded" or like severely stupid mamals coughed into the sample.

The sample will sound sharper, with a saw characteristic, because many trebbles have been added.
