original archives available on Aminet (util/libs)

Reqtools Library
Copyright © by Nico Francois

No guarantee of any kind is given that the program described in this document is 100% reliable. YOU USE THIS PROGRAM AT YOUR OWN RISK!! I will not take responsibility for any damage or data loss caused by use of this program!

This program is a Mailware. This means you have to send me an E-Mail or a postcard if you use MaxMenu regularly.

This program may be freely distributed for non-commercial purposes, as long as all the files in the original archive are present and have not been modified in any way. No charge for MaxMenu may be made, other than a reasonable cost to cover the media and copying time.

If you wish to include MaxMenu on a magazine cover disk, you may do so as long as you send a complimentary copy of the magazine issue in which it appears to my home address. The entire package must be included on the disk, not just the executable. Please

contact
me in advance to ensure
you have the latest version.

1.3 Introduction

INTRODUCTION

For a long time I was using Win95 taskbar clone. The thing that bored me was a lot of clicking with mouse (click on 'start', then on 'programs' then on 'disk', then on..). The solution was ToolManager which used a lot of space on screen (for every executable one button) and when i put about 50 programs on dock i couldn't see my beautiful Workbench. Then i decided to create an utility which wont need much clicking and wont take too much space on screen, so i created MaxMenu.

REQUIREMENTS

-
- Amiga :)
 - KS 2.x or greater (I think)
 - ReqTools.library - by Nico Francois (included)
 - ScreenNotify.library - by Stefan Becker (included)
 - WBStart.library 2.2+ - by Stefan Becker (included)

1.4 Installation

INSTALLATION

Installation of MaxMenu is very simple - just start the installation script that I have included in this archive. If you want to install it all by yourself then copy the contents of drawers Prefs, WbStartup and Libs to their equivalents in SYS: partition.

If you are upgrading from previous version of MaxMenu you have to start ConfigConvert program to convert your old MaxMenu configuration.

1.5 Usage

USAGE OF MAXMENU PREFS

On the main window you are presented with a:

- | | |
|-------------|---|
| Font | - select font to be used on menus and items (really) |
| Wind. Pos. | - determine position of MaxMenu window |
| Button size | - H+ - height in pixels which will be added to menu buttons |
| | - W+ - width in pixels which will be added to menu buttons |
| Add | - add new menu |
| Edit | - edit menu |
| Remove | - remove menu |
| Up | - moves menu up |
| Down | - moves menu down |
| SAVE | - save changes on disk |
| USE | - use changes |
-

CANCEL - forget the changes

the next window is almost the same ...

the edit item window:

Name - item name
Type - choose the filetype
File - executable file
Arguments - arguments to be used with file
Immediately close subwindow -> if it's turned on the subwindow on
MaxMenu will close immediately after executing
command

USAGE OF MAXMENU

Supported keys:

'q' or 'Q' - Quits MaxMenu

'r' or 'R' - Refreshs MaxMenu window

1.6 ToDo

TO DO LIST

do you have any ideas?

1.7 History

HISTORY

MaxMenu

Version 1.51:

- ConfigConvert crashes when converting MaxMenu 1.3 preferences - FIXED

Version 1.12:

- now can be started directly from WB

Version 1.1:

- program doesn't detect mouse doubleclick on listview - FIXED

1.8 Author

HOW TO CONTACT ME

I can be contacted via Internet at:

max2@iname.com

If you have any comments, bug reports or new ideas, fell free to mail them to me. If you think you can paint some nice icons for MaxMenu and Preferences editor please send them to me so I can include them in future versions of this archive.

I can also be reached by snail mail at this address:

Mladen Milinkovic
Cikovici 118
51215 Kastav
CROATIA

Before sending BUG REPORT please test MaxMenu without startup-sequence. If bug is still there send me description of it along with specification of your configuration.
