1.2 ice runner

During play, type any of the following and then press <RETURN> or <ENTER>:

```
FUNNY Speeds up the enemy
MAGIC Infinite lives
GURKE Invincibility and infinite everything.
(Use <F9> to advance levels)
```

1.3 ikari warriors

Play game, get high score, type "FREERIDE" and press <RETURN>. When the high score table is displayed next, it should say '1988 FEB' where you entered "FREERIDE", indicating that the cheat is active. Play the game and you should have infinite lives.

1.4 The Immortal

Codes for higher levels are:

```
Level 2: befe810006f70
Level 3: cc5ee21000e10
Level 4: 465fa31001eb0
Level 5: b57f943000eb0
Level 6: 1bbeb53010a41
Level 7: 8ddfb62010ac1
Level 8: e011f730178c1
```

In Level 4, walk around the ring on the floor three times to open the floor. In level 7, when Norlac dives underwater, you must hurry back and throw yourself into the whirlpool rather than climbing the ladder. In level 8, to defeat the dragon and Mordamir, use the BLINK spell six times, then use the fire protection spell just before he breathes fire at you, and not when he takes a quick breath. When he pauses, hold up the amulet and Mordamir will spin in. Use the STATUE spell three times to avoid being killed by the lightning, then just as he starts his next spell, put up a SONIC spell. Use STATUE twice more and when he animates the bones, hit the statue just before they reach you. He will now say that you have no more defences, so wait until he holds up the amulet then cast the MAGNETIC spell. Bingo - end of game.

1.5 impact

When you press <T> during play you will get infinite lives.

```
Level Codes are:
 11 GOLD    51 HEAD
 21 FISH    61 JUMP
 31 WALL    71 ROAD
 41 PLUS    81 USER
```

1.6 impossamole

Enter the following codes into the high score table for an In-game effect. Note: Only one will work at a time.

```
"COMMANDO"  No time limit for weapons
"HEINZ..." Three power bars
"ANNFRANK"  Low energy topped up
"LUMBAJAK"  Double length energy bar
"OOCHOUCH"  Walk on water without dying
"JUGGLERS"  Try it!
```

1.7 impossible mission 2025

```
Stage Level 1  Level 2  Level 3  Level 4  Level 5
1      FBQDDXRE FNQAYXHI FYQOPXEF GKQJYXDI
2  ETQFJXXD FDQCVXIA FRQYCXVL GCQLRXWB GOQJFXBK
3  EXQEJXDC FJQCHXOM FUQTBXQE GGQKTXUF GSQFDXZA
```

1.8 incredible crash dummies

On the title screen, type "EBYGUM" for invincibility. The screen should flash red. During play press <SPACE> to skip levels.

1.9 indiana jones iii - indiana jones and the last crusade

On the title screen type in "IEHOVA", "IEHOVAH", "JIEHOVA" or "JEHOVA". The screen should flash. Following keys have effect in the game:

```
<1>-<2> will go to the halfway points of the level
<L> advances you a level
<I> supplies you with an icon.
```

Entering your name in the high score table as "SILLYNAM" will give you infinite Continue options.

1.10 indiana jones iv - indiana jones and the fate of atlantis

On the title screen, type "NIGHTSHIFT" for infinite lives. Press <F9> to skip levels.

1.11 indianapolis 500

Here's how to create the perfect car for the perfect racer:

Car: Lona/Buick

Gears: Front Back
4 up from middle 5 up from middle

Stagger: No difference

Rubbers: Right Front Right Back Left Front Left Back
Hard Medium Soft Soft

Cambers: Right Front Right Back Left Front Left Back
-.50 +.25 +.25 +1

Pressure: All At 25

Shockers: Right Front and Back Left Front and Back
Both at Bottom Both at Bottom

Levers on Dash: Both full forward

Also this is funny, but pointless. Choose the Lola Buick, set the drag and fuel at minimum and the gear rating to maximum. This will allow you to qualify in the front of the grid. Start a race and lurch violently into the other cars as soon as possible. As the cars behind will be unable to avoid you, this will cause one of the biggest pile-ups you've ever seen - we are talking nineteen cars here !

1.12 indy heat

1.23 it came from the desert

Before attempting to go into the ants' nest, you should first save Elmer to get more flamethrower fuel. Some time between the 8th and 10th (I don't remember the exact day), he will leave a note in his station saying that he is going hiking in the SW Volcanic Cone. Go to the volcano, fight the ants, and next day, visit Elmer's station. He'll thank you for saving his life and give you more flamethrower fuel.

The entrance to the ants' nest will never appear on the main map, but there are several other ways to get there:

- By taking a flight from Hilber's Field.
- By driving a tank from a battle going on at a nearby location.
- By going south when you are in a battle at the M1 mine.

The entrance to the nest doesn't stay open long enough for you to get in before the ants start invading the various locations in the town, so you'll have to wait until they do. The 11th is the best day to enter the hole since it is very hot and there are few ants around. If you try cooler days, there will probably be too many of them around for you to handle. Also, if you decide to get to the hole by plane, you can land safely on the dirt road parallel to the tracks leading to the M1 mine.

For those who are having trouble getting to the ants hideout, it is located about one screen due south of mine one. The best way to gain access to the tunnel is on the morning of day 11. Go to the airport and get the plane. Fly to mine one (southeast from the airport) and land on the road in front of mine one. Get out of your plane and walk to the center of the main building of mine one. Walk south about one and a half screens and the hole should open and a ant will crawl out. You must kill the ant and run to the hole before it closes. You will get about 4 or 5 chances to get in. Once you are in the hole you will automatically have the flame thrower and the timed dynamite charges. There are two levels of the ants chambers, a top level and a bottom level. You must make a map as to where you have checked. You can do this by putting the game on pause with <LEFT MOUSE>. This will keep the ants off you while you draw maps. Once you have made it to the bottom chamber repeat the map drawing till you find the queen ants chamber. You will need it to get out after you plant the charges. To plant the charges once in the queens chambers move close to the queens left side of her body. Once you walk around her left side the music will stop and a slow ticking will start. You will have to get back to the place you entered on the second level. If you get back before the bomb goes off you will win the game.

It means nothing to gather information about the ants through out the game. The mayor will not listen to anything you present in evidence. He will call an alert only after his car gets eaten on the afternoon of June 11.

It will do no good to escape the hospital as you have to sleep anyway. Even thou it will do no good to escape from the hospital it's a fun arcade sequence to play.

Even with the solves given above you still must learn how to fly the airplane. To get the right altitude to save fuel, after you take off fly east or west. Back off the throttle till the shadow on the ground comes up and just touches the wing of the plane. You will then have the right speed and altitude. The faster you fly and the higher you go the more fuel you will use. These settings will conserve enough fuel to let you fly and not run out of gas and return to the airfield and land if you blow it getting into the ant hole.

When you start the game, on the first roof you come to, above a sign saying "Arctic Toys" you will find five objects. Pick up the objects in the correct order (Cake, Hammer, Earth globe, Apple and Tap) (first letters = CHEAT) to receive an invincibility shield lasting 10 minutes. When the cheat is activated, flashing fish form around Robocod, and the music speeds up. Also, if now you go straight into the first room, and then exit immediately you will find that all of the castle doors have been unlocked, allowing you to access any level.

On the sports equipment level after the second spike are five objects in a row. Collect these in the correct order (Lips, Ice cream, Violin, Earth and Snowman) (first letters = LIVES) for infinite lives.

In some point of the game (I do not know where), there are five objects that spell out the word POWER. Collect them in the following order: Penguin, Oil, Wine, Earth and Racquet.

When on Map screen, you can leap to various points in the game. These are accessed by using the following numbers:

Here are the locations of the secret rooms:

a) There are two hidden worlds behind the main tower, another sweets level (including a Liquorice Allsorts World, the infamous Bouncing Jelly World, another Cake World and an upside down Jelly World) and an extra scrolling section. To reach them, run along the ground floor - avoiding the doors - then go up and over the first flight of stairs. From the bottom of the second (smaller) tower, make your way up to the landing

above Dr. Maybe's final door and run left into the wall. You'll disappear behind the screen and arrive in the Secret Tower room.

b) Once you've finished the bath level, drop down to the bottom of the castle, and walk left until you get to the small snowman statues. Jump on these and they'll turn into a moving platform. Once you get to the top of the screen, walk left into thin air and jump. By now you should be next to some doors. Go through them for bonus city!!

c) Go to the same place after finishing the circus room (the last room before the end of game baddy) and stand on the golden snowmen again. A platform made of two bonus blocks should float upwards, revealing a secret tunnel. At the end of this are even more extra lives and stars.

d) Do as above after the sweets level, but go to the left of the castle. Go on the snowmen once more, and at the top of the screen grab the umbrella and collect all the goodies while you're floating down.

e) On the second teddy bear level, keep jumping over the spikes until you see a hole above you. Jump through this and catapult yourself off the bus there. Once you've done this, get on the higher level and keep walking left, bounce on the trampoline and collect the wings. Now fly along the top of the screen to the right and you should find a different exit. Go through this for a special bonus level.

f) Complete a level with does not feature a guardian and you will always find something new when you return to the castle "selection" screen. In one case you will find a whole sequence of lifts and things (see above) that lead to a door that you cannot normally get to. If you go to the very right of the factory screen and look down you will see a load of crowns, which you can access after coming back from other levels.

g) It is possible to finish Robocod by only doing half the levels. A choice of two new doors to enter is given when the correct level is completed. Start by completing the Fluffy Toys one and then by doing the Cars one.

h) Finish the bath levels and as soon as you come out of the door run straight to the golden snowmen in the bottom far left outside the castle. Jump into these snowmen and you'll float upwards to the top of the screen where you'll be met by a door. Getting through this door is tricky but worth it. Inside are loads of extra lives and energy stars. Go to the same place after finishing the circus room (the last room before the end of game baddy) and stand on the golden snowmen again. A platform made of two bonus blocks should float upwards revealing a secret tunnel. At the end of this are even more extra lives and stars.

- Defence of the Wall

As soon as the screen changes start pressing fire to launch rocks. Use oil when time is short or when two or more enemies are coming up the same ladder. Even though it says that oil is limited, there are at least five cauldrons at your disposal.

- Entry to Town

As soon as the screen has loaded push right and keep pushing right until the end. When an enemy appears keep fire pressed until he is slain. Release fire and your man should run straight up the drawbridge. Repeat this until you get into town.

- Attack on the Wall

Push the joystick forwards as soon as the screen changes. Keep pushing forwards until the wall is taken. Use <FIRE> to ward off the rocks until the top is reached.

- Game Strategy

At the start of the game ORLEANS must be taken. Select 'Start A Campaign' and then displacement to move north into Orleans. Here you should encounter your first battle.

- Battle Tactics

Hold your ground and wait to be attacked. As soon as the enemy move, shower them with arrows and then with mortars. Move your troops forward to protect your archers and send your cavalry out (they are likely to be killed). While your troops are fighting, remember to fire your arrows if the remainder of the enemy moves forward to attack.

On the defeat of the enemy, choose 'Offensive' and attack Orleans. Use the 'Entry in to town' and 'Attack on the Wall' tips to succeed. After capturing Orleans move north east into Champagne and take Rheims to crown the king.

After the coronation move north taking each town in every province until you have reached the northern most province. Sweep anti-clockwise until each province has been taken.

Joan's army soon becomes depleted; choose 'Royal Army' and then 'Modification' to top up her army. About 2,000 archers and 3,000 troops are enough. To pay for this collect the tithe in September but forget about the other taxes. This will avoid any uprising, but means that you will have to ransom some hostages. Choose 'Diplomacy' and then 'Liberation', deal with Henry VI and use Regnault of Chatres and Tremoille as ambassadors. The meeting place does not really matter.

- Ransom Demand Guidelines

Duke of Bedford \$4,000,000

Duke of Warwick \$2,000,000
Duke of Gloucester \$2,000,000
John Talbot \$1,000,000
Count of Suffolk \$1,000,000
Cardinal of Winchester \$1,000,000
Captain Falstaff \$1,000,000

If you are really desperate halve the ransom. If your coffers are overflowing, execute one of them using the 'Royal Justice' Menu, which will reduce the number of armies that Henry VI can control.

Any French characters caught should be executed promptly. If there are no hostages when payday comes choose 'Helping Hand' and kidnap one. Do not try for the Dukes because these attempts are most likely to fail. Remember to pay well - \$20,000 is the right incentive. If Joan is caught, Richemont, War General is a good replacement.

1.56 kingpin bowling - lsd

This cheat requires really fast autofire, but you may be able to emulate it on a joystick/pad by pressing <FIRE> really quickly. During play, if you line up the man where you want, and then press down the autofire, it will generally throw the ball down the center of the lane. The less force there is, the closer to the center of the lane the ball will be bowled. If you put your man to the far right, and put the speed up to almost full force, you can generally bowl a perfect strike. Its a very useful technique.

Also, if you have a single pin left, or a similar situation in your game, then this is an excellent technique to line up the ball.

NOTE: This cheat will not guarantee a strike, or spare every time.

The wand is in the cabinet in the wizards study. The key is on the top of the closet in the wizards bedroom. You have to be an eagle to get into the cave. The key to the door behind the mirror is in the skeletons hand.

Have some fun and press the <ALT> key then <D> then <RETURN> or <ENTER> (I think twice) then type in either "GET OBJECT" (and type in a random <#>) or "TP" for transport (and a random <#>) and see what happens. "KIRO" Start game with one extra life
"MORE" Gives you swirl shot
"FLIP" Play upside down

Also, try entering these for your name in the high score table:

"FUCK", "WANK", "SHIT", "COCK", "CUNT", "CRAP", and "ARSE".

Note: This was from a demo of the game and the level codes and the cheats may be changed in the Full version.

1.61 klax

Begin play then hold down either of the <SHIFT> keys and <SPACE> together. Now press any key from <1> to <4> for different helpful effects, including infinite credits and even a free ticket to level 100.

While playing the game, press all the keys on the left hand side of the keyboard and you will skip to the next level.

To play the last screen hold down <CTRL> + <4> during the game.

1.62 nightmare

This cheat involves the woodland section on the first level. Use the spade to help you find the five apples. Take these apples and throw them at the quest shield that hangs on the wall, and make each character consume two rabbit pies from the inventory screen.

Continue with your quest and you should find that your hit points never decrease.

1.63 kristal

Fights - Proficient swordplay is essential if your to get anywhere in the game. The neck chop is one of the more effective blows, but the

program blocks repetition of single moves. To get around this, occasionally switch to a different move in order to enable the neck chop once again. Give generously to the poor and you'll be a step closer to obtaining the Sword of the Spheres.

The Palace - To enter the palace, you'll need to get the invitation from the elusive Gloop, found in Novala. Once you have it, keep out of fights or you could lose it for good. When you get into the palace, ask Nedrod three questions and he will give you the talisman, which can help you find another useful item. Answer the Princess's question with "It's a secret". She will give you the Ring of Belz, which will only work in conjunction with the spell scroll.

In General - Objects are not always found in the same places from game to game, so a detailed search of both fore and backgrounds is often in order. To survive the final confrontation, a high psychic rating is needed, which can be increased by donating skringles to the poor. Disorderly conduct can have the opposite effect. The safest technique in the space battles, is to slow right down as soon as you see the aliens shoot them all, then power at full steam until the next lot. Follow Readheads ship if you see it. Heatpro tablets are necessary if you beam down to one of the hotter planets. Make notes of what you are told, and use any new names or subjects to weave out every last bit of information from the characters.

1.66 kult

Firstly, here is how to complete the five ordeals:

- * The Twins - Object = Goblet
-

Go to the source on the left hand side. Inspect the fountain and press the eye. Fill the Goblet and go back to the room called 'The Twins'. Open the left-hand serpent and empty the goblet into it. Get the die that emerges from the serpent then open the right hand serpent. Throw the die, and note the number thrown. Put the die into the right-hand serpent and go to the room facing you. The hands are in a dice formation (except for the middle one). Pull up the hands until they resemble the formation you threw earlier, then push the serpent's head on the wall. The sliding partition should open; note down the shape which it covered. Go back to the fountain room and inspect each cube (each is patterned). Lift the cube which resembles the one you found behind the sliding partition.

* In the Scorpion's Presence - Object = Fly

Pray to the statue then enter the room called 'The Web'. Look at the web on the floor and crawl on it. Give the mistress the fly; show affection but don't be too saucy with her. Feed the fly to the blue spider and get the red one. Leave the room, and then put the red spider into the statue's mouth. Don't listen to the man who pops out, just pass through trapdoor.

* The Wall - Object = Dagger (can use psi-shift!)

First choose the third zone, then the second zone; this means that you can unlock the sliding wall when you open either door. Go through either door, left or right, and inspect the step. Then take a look at the slot on the Sculpted Warrior and climb onto the step. Either put your dagger into the slot, or if you haven't got one, use Psi-Shift. You will be spun around by the wall. There are now TWO separate gaps in the wall, one which goes straight on, and the other is a dark, black strip; it depends on which door you have taken. Move the cursor to go down the black passage, not straight on. Stick your hand in the gap on the floor. Return the way you came, and this time go straight on.

* De Profundis - Object = Rope

First of all, wait. Then lasso your rope onto the hook on the ceiling. When the Granite Monster lurks towards you, jump onto him. Wait a few minutes.

* The Noose - Object = None

Do not do as the Poormouth says. Use either the lantern, or your Solar Eyes Power. Grab hold of left hand rope and climb up. Push the lever, remove the noose-rope and he will fall. Take the left-hand piece of rope. Inspect the hollow on the platform. Finally, leave and go to the Master's Orbit.

* What to do after you have got the five Skulls

Give all five skulls to the Protozorg underneath the trader. He will announce that you are a divot. Go to the concourse outside the ring, and remember, if you are asked any questions, show the egg you were given. Once you are in the concourse, ignore the guard and use all the violence you can muster on the upper right-hand guard; then enter the

upper right-hand passage.

Go left. Inspect the toad's head and poke it's eye. Use the Lantern (if you have it) or the Solar Eyes to see. Inspect the lever and the trapdoor. Use Psi-Shift on the lever and pass through the trapdoor. Next keep going straight through until you meet Norma Jean and Ash. You MUST do as Norma Jean says. Don't move! Tell her the truth...talk to both of them and then use your Zone Scan. Lift your block on the floor and get both objects, the beam and the flask. Unwrap the bandages from the mummy, go to the left and keep going forward.

By going through the trapdoor you will enter the Threshold of Truth. Kill the priestess and put the egg in the opened mouth. Next off, take a look at the Lantern. Read the book, then use your Psi-Shift on the statuette to retrieve it on the left-hand side, near the ceiling.

Leave and go to the refectory, then go to Saura's Repose. Put the statuette you found into the niche then go to the Presence of God, and then to Placating the Powers. Kill the first priestess, then make use of Psi-Shift on Saura's Mark, aiming it at her dagger. Use Brain Warp on the character, Sci-Fi, then giver her the flask to drink. Go to Saura's Repose, putting the monkey into the small tunnel. Enter the Presence of God and wait. Go into the passage. Wait. Use aggro on the god, Zorg, and then use Brain Warp on Pratozim, who is holding Sci-Fi hostage. Use Psi-Shift on trap door, and finally, throw the knife or dagger at Pratozim.

Try also "AMIGA DAVID BROADHURST WANTS TO CHEAT".

1.69 laser squad

In laser squad, for fun do the assassins on level 1. Buy no armour, give the corporal an M4000 with two reloads, the next two rocket launchers with four rockets each, and the last two nothing at all. Deploy in the entrance, in the gap in the outer wall, and take the house to pieces with the rockets, waiting for droids or Regix to show up - get them with Jonlan's M4000. I managed to do the scenario with one shot - it went between the leaves of the door, blew up against a wall and Regix was on the other side. end of story, fade to black.

1.70 last action hero

On the title screen or during play, type "HAVE A BAD DAY". The screen should flash to let you know it worked. Now use the following keys:

<D> Kill all opponents on the screen

1.71 last duel

Start the game, pause with <F9>, then hold down <HELP>, <LEFT SHIFT> and <1> together. Unpause and the function keys will take you through all levels. <F8> gives you five lives.

1.72 last ninja

To get past the dragon at the end of level one, you must stand at the far left side of the path just at the beginning of the Dragons rocky lair. Throw a smoke bomb and if you are on target the Dragon will fall asleep. You can now walk past without getting killed.

1.73 last ninja 2

To board the helicopter at the end of level 5, you must first allow the helicopter to leave the screen, then run to the end of the building and jump in the direction that the helicopter went, making sure that you completely exit the screen.

To kill the Dragon throw a smoke bomb under him.

Level codes:

To kill the Dragon throw a smoke bomb under him.

1.75 leander

Enter any of the following for the password:

```
"ZXSP"  LEVEL 2   "LVFT"  LEVEL 3
"LTUS"  INFINITE LIVES "ESPR"  ??????
"LUCY"  HEARTS    "SOTB"  RAIN
        "SNOW"  SNOW
```

If you typed "LTUS" use <F8> to pause the game and press <F6> and then <FIRE> to skip levels. <F2> - <F7> selects the various super weapons.

1.76 leather goddesses of phobos

The answer to the Sultan's riddle is "Riddle". To get past the assassin in space, fight him until he is disarmed. Take his sword and give it back to him. He will then realise that you are a good guy, and that he has no chance of winning. He will then kill himself.

1.77 leatherneck

Start the game and type "CUTHBERTNECK" or "CUTHBERT", then press <F3>. This will give all players protection from enemy fire, but not from your team-mates' bullets. To return to normal press <F3> once again.

1.78 legend of faerghail

Load in several of the players that come pre-rolled on the disk, and load an original of your own. Go sell all their equipment, have them withdraw all monies from the bank, and transfer to you. Create new characters and do the same as often as you need, and you'll have plenty of gold to properly outfit your stalwart band.

Here are the answers to some of the questions and riddles you'll be asked while you're rummaging around in the dungeons of Faerghil.

1.81 legend of valour

Find some treasure and pick it up, then find a person. Throw the treasure at the person. Now he (or she) will drop a bag of money. And remember that the persons with the most money are often the women.

1.82 leisure suit larry

Press <ALT> and <X> to bypass the proof of age questions. You can go to any location in the game by hitting <ALT> & <D> and entering (TP). It asks for a location number, so enter a number from 008 to 045.

This solve didn't get all the points, but it finishes the game. my additions are in capitals.....(score 215 of 222)

The 1st step is to enter the bar, go to the bathroom and read the walls several times until you get the password. Then go to the sink and get the ring. you can (must!) use the toilet if you want. Go to the bar and buy a whiskey. Go to the drunk next to the bathroom wall and (kick him to wake him) give him the whiskey and he'll give you the remote control. Get the rose too. Go back into the bar and knock on the big door.. when he asks you for the password.. tell him "KEN SENT ME", then enter. Turn on the T.V. with the remote. Keep changing channels until you find a channel he likes.. he'll move from the stairs. Climb up and voila! The prostitute: Don't hop into bed with her until you get the rubber. You just need the candy on the bench. Get it. go out the window, and go to the fire-escape ladder. You'll fall into a dumpster. Search it and get the hammer. Exit the dumpster and go left. Call a cab at the street.

Now go to the casino and go through the lobby. Get the card in the ashtray. Now gamble a bit until you have about 250 dollars. Go outside. Sometime in the game when outside the casino, a guy in a barrel will come up and ask you to buy an apple. Buy it. Call the cab.. tell him to go to the store. enter the store and buy a rubber. Also get the (magazine and) cheap wine in the back. (never enter the cab with the wine.. the cabbie will get drunk and kill you) pay for the wine and exit.. Wait for the russian looking guy to come from the left. (Ignore the dog) When he comes, give him the wine.. not money. (Look at phone dial number, answer the questions) Once you have the knife go right and show the pass to the bouncer at the disco door. Go in and sit down at the table with the lady. Smile and give her the ring, the candy, and the rose. Ask her to dance. When you finish off with the dancing ask her to marry you. She'll ask you for \$100. Give it to her and meet her at the marriage chapel. It's east of the casino front. Enter and go up to the front. Type "MARRY", and you'll get married. Go up to the honeymoon suite. (fourth floor, door with the heart, push four). Knock, and enter. She'll be on the bed, and {NOT IN THE MOOD!?!} Turn on the radio and listen to it. You'll get a number to call to get the wine delivered that she wants. Go to the casino and get some taxi fare money. Go to the phone in front of the store, (answer the phone if it rings) call the number and have them deliver it to the {HONEYMOON SUITE}. If they say it probably won't show up, you screwed up on the typing. Go back to the casino and go to the suite. Be sure that you have the knife. Enter and pour the wine. Things will take they're course and you'll find yourself tied to the bed. (THE BITCH!) Use the knife and free yourself. Get the rope and leave. Go to the casino again and using some saving, use the dollar and get about \$50. (go to cabaret. find a seat and sitdown. listen to act.) Once you have it, go to the bar and knock on the door again. Go up the stairs and screw her now that you have

the rubber. Remove the rubber after you've used it. Go out the window and this time go to the right of the balcony. Tie the rope to yourself and tie it to the railing. Type "GO WINDOW" or (reach out) something so your hanging in front of the window on the right. Break the glass with the hammer. Get the pills. Pull on the rope and untie yourself. Go down the fire escape and call a cab again. Go to the casino and go to the eighth floor. Talk to the lady at the desk until the game tells you that you'll need some medicine or something. Give her the pills. She'll run off and leave the desk unguarded. Push the button and enter the open doors on the right. Enter and go up and right. When you're in the room with the bed, open the closet door. Enter it and type, "LOOK". Get the doll... (look at doll. inflate doll. look at doll. use doll.) then wait as you run after it. When you're near the hottub, (remove clothes) enter it. Look at the lady. smile, and give her the apple. Things will then run they're course, and voila!

1. If a Builder hits a steepish slope he will stop building and turn around.
2. On the early levels practice using the lemmings special abilities. Try completing level one without Climbers and level two without Floaters.
3. On Blizzard level two, you will need to use the Digger/Builder method to block off the lemmings.
4. On Blizzard level 14 the exit is hidden under snow in the steel boxes in the bottom left corner! Use Miners and Bashers to get there.

1.87 lemmings 2 - the tribes

This cheat will allow you to select any level for any tribe. Go to each corner of the menu screen and press <LEFT MOUSE> (or <BOTH MOUSE>) each time until you hear a lemming faintly squeal "Let's Go". You should hear this at each point of pressing.. Now you can select any level on any tribe and have 60 lemmings on each, which means that you only have to complete the last level of each tribe to complete the game.

1.88 lemmings ii - oh no more lemmings

Two different sets of codes to Lemmings II is listed here because they seemed to be completely different and I'm not sure which one is authentic.

To duplicate any item as many times as you want do the following:

First find a power point and stand in front of it. Then select any item from a droid's backpack and drop it on to the floor so that the name of it appears in the text window. Now pick up the same object and return it to the droid's backpack and engage the poser point so the lightning bolts are touching you. Use the look right, look left command to move the view screen so that it is at an angle. Move the cursor to the bottom of the screen and hold down the right mouse button so that the cursor becomes a hand and left click, at which point an object should appear on the floor and you can drop as many objects as you wish. Look back to the normal view and when the power bolts stop you can pick up the objects that you dropped.

1.104 lord of the rings

Explore the SHIRE (starting point) Comletley. There are items in this area the you will need later in the game.

If the game tell you there is a chest in a room, use the SKILL picklock, to open it. PIPIN TOOK has this skill.

1.105 lords of the rising sun

Yoshitsune is more skilled at fighting than yoritomo, so at the start of the game make sure you have almost full strength and men before you try attacking anything. Your main objective now, because you are near maximum status, is to deal with your brother and to capture enemy castles. If you take over enemy castles, the enemy troops will have nowhere to recruit more men and all your brother's men and land is yours if he dies. Your next job is to try and secure the eastern half of the island. To do this, take over all the castles and destroy or recruit all the armies on that side of the island. Now concentrate on the rest of the island. In Edo try to leave a general with the least siege abilities as he probably won't need to siege castles anymore. Remember one general will do and if the general is at Edo, Nagoya will be easier to storm by boat. If you can send a general from Akita to Matsue via Aikawa you will have a good base from which you attack the western castles.

Once you have complete control over the main island then you should be able to wipe out the remaining four castles on the 2 smaller islands. Don't go for these unless you have a very firm base otherwise you will have to trek all the way back should a range trooper take over the castle.

Yoritomo

A great politician and strategist but try to take Edo first because it's the only castle you won't have to lay siege to take. If you're lucky though, you may reach Toyama or Nigata before anyone else. The same rules apply to yoritomo as with yoshitsune: wait until you nearly have a full army before attacking. Be careful if you get into any fights, because you have a low battle skill and a smaller army with a higher skill can easily wipe you out. At the beginning of the game try to avoid taking risks and instead concentrate on improving your skills. If you ever fight your brother and survive long enough, chase him on horseback, because if you slay him things can change dramatically.

Overall...

Participate in battles as you tend to lose more men if you don't. Chasing the general on horseback often leads to early victory as you can wipe out armies in one battle instead of at the end of the game, and once you're confident it's possible to do it every time: but do not engage in the siege sequence, because losing can be costly. The most important factor in battle is strength and long journeys can weary your troops, so ensure they have plenty of rest before a battle. An army coming by sea will be tired but faster and more flexible, so meet them on the shore and the advantage will be with your men.

Whichever character you've chosen, try to isolate the rest of the island so you're more able to concentrate on attacking the enemy and won't have to worry about defensive manoeuvres and precautions: but watch out for the enemy trying to out-flank you. The islands will all be bitterly fought over, so ensure that your troops have confident strength before attacking. The islands are well worth going for though, because they are ideal resting places for a tired force and good generals can interchange their armies from island to mainland without meeting too many problems.

The key to early victory is to recruit many more armies than your enemy, thus trapping him in a spiders web and gradually wearing him down (of course he can always try the same tactic on you, so beware). It's important to have a strong hold on north and south Japan, as a rogue force can wreck havoc and open up flanks, causing all sorts of problems. If you're unsure of your force, avoid battles because he who fights and runs away really does live to fight another day. Ninja assassins may sound appealing, but only resort to them as a last resort and don't send them too hard a mission because they might turn back and recognise you as the enemy.

1.106 lords of time

After the shed go North east, West, Up, then North. Now tie the two short planks together and drop them. Cross the river, give the Narcissus the looking glass and he will give you the lodestone, then go to the shed and type "GET KEYS WITH LOD". Shout to get the icicle. Drop something cold to get across the lake. For a winged gift, kneel and pray.

1.107 lost patrol

Keeping up your men's strength and morale is vital. Giving your men 50 minutes' rest a night, or during the day when it's too dark to carry on, will slam your energy and morale levels to max. Even if you don't have much food, you don't have to worry, as your men will not eat it.

On reaching the first village (the first white cross on the map), search the area to find a hole in the ground where the villagers appear to be hiding. You then have two options: ENTER TUNNEL or USE GRENADES. Gomez is useful at this point, but if he is dead, go

for the USE GRENADES option.

Start off questioning the villagers normally by asking them "Where VC?" Once you have an answer, start the hard questioning, or a village boy will get hold of a gun and shoot one of your men...

Remeber the INGREDIENTS he'll tell you. Now leave and go to APTH WORKSHOP. TALK TO GOEWIN, tell her it's for a dragon, but she won't have COWBANE, leave... And now you have two ways to do it. You can go and find COWBANE yourself, or TELL RATPOUCH TO GO TO THE FORGE, AND THEN ASK CATRIONE FOR COWBANE, AND THEN GO TO SMITHY STREET AND THEN GET COWBANE, FINISH. He'll be back so ASK RATPOUCH FOR COWBANE, now you got it, so GIVE COWBANE TO GOEWIN. TALK TO GOEWIN, so she'll

Now fight to that asshole, hope you beat him up... The trick is to point your mouse on DIERMOT and then.. You'll figure it out after few times.. Well, you'll see the monster.. USE POTION ON DRAGON, and then TALK TO DRAGON, commend him to help you, so you'll get an eye.. Now let him sleep, leave the caves...

TALK TO GOEWIN.. Go to THE FORGE and TALK TO LUTHERN, then TALK TO MELLIN, he'll tell you about the SKORL.. Go to the MARKET PLACE and when you see Skorl going to VILLAGE SHOP, LOOK THROUGH THE WINDOW, you'll hear the conversation, Skorl leaves then, TALK TO SKORL, he'll tell you about the barrel, go to VILLAGE SHOP, TALK TO EWAN...

So now, Skorl will take you to THE CASTLE.. LOOK AT CASK, the one in the left corner, so you'll see the BUNG.. Now go to THE KITCHEN, GET TONGS, LOOK AT CARCASS, GET FAT, now TALK TO MINNOW, tell him you've come for Selena, TALK TO him once again, and ask him to tell his master that someone is in the WINE CELLAR. As soon as he leaves, go to the left USE TONGS ON BUNG, and hide yourself in the very right corner of the room. Skorl comes in and sees the wine... Now go left to THE GATE ROOM and USE FAT ON LEVER, TELL MINNOW TO OPERATE LEVER, while he does it, PULL WINCH. The gate will open.. Now go back, and make sure to save the game <AGAIN>, because you may have some problems on the bridge.. After you pass him, head to the left so you'll see Selena.. Now you can fuck her and have many kids..

Here is the solution for the Chemistry Lab level:

From the starting screen, head left and trip the switch that you find there. This turns off some of the deadly electrical devices and allows you to enter a previously inaccessible screen. Go up the ladder and walk to the left, then use the conveyor belt to fall down and collect the crowbar.

Next make your way to the auto ladder. Use the crowbar and jump on the lever three times.

Go up and collect the jam jar, before returning down and heading right to where the other jar is. Go down two levels and head right. Use the jam jars, and you will be able to read the tiny password and pass through the locked door. Go right. Collect the hammer and take it up to the top level.

Head left and collect the phial (there's a clue about a "strong aroma"), and head down to where the 'test your strength' machine is. Use the potion and the hammer and you will ring the bell, revealing an oil can as your prize. Take this up to the top-right hand screen and use it on the pipe and, voila, you have completed the level!

The object of the game is to prevent project 'Overlord' - a satellite which can control people - from going into operation. The men behind this are the chiefs of Gideon Enterprises and the Law and Order party. To stop the satellite you need to collect the eight passcards which were issues to the eight scientists involved with the project (one of them being Carl Linsky). Be quick though, Carl's wasn't the first death and it's certainly not going to be the last, so make sure you visit the potential victims before anything happens to them.

Check out every possible location. If you miss an object you're in trouble. Quite simply, it may prevent you from getting any further.

Getting out and meeting people is the only way to gain information and to progress through the game. And it's usually a good idea to treat them with respect. Don't go in fists flailing. Be reasonable - it's more productive and you won't get hurt. When interrogating somebody try to find connections between them and other characters. A great many people in the game are linked and these links will need to be exploited to help you get further in the mystery.

1.149 midwinter

Don't bother with the tedious procedures of recruitment, just head straight for enemy HQ with some dynamite and introduce them to Mr. Big Explosion. Also if you start every game by clicking the mouse in exactly the same place on the START screen, every game will be set up identically.

At the start of the game:

You are on skis. Don't stop to snipe. Get as quickly as you can to the nearest garage. You need missiles against the bombers. Try to get a Wolf snow-buggy. You can dodge the mortars on skis the same way as on a buggy: turn quickly 90 degrees and speed off. If you stop to snipe, the mortars will get you. When you get the snow-buggy speed to your next point while blasting the bombers as they appear.

Tips On Invulnerability

** Against missiles

Whether you are skiing or driving a snow-buggy, the moment you hear the missile being launched, stop immediately and begin to turn around. Keep turning on the spot. The missile will narrowly miss you then come back and keep pace alongside you for a while until it finally speeds off to clobber someone else not so smart.

** Against mortars

Watch for the bomber. It will always come over the horizon in front of you. If you are stopped, wait until it is approximately half way to you (otherwise it may be able to dodge your missile) then blast it. If you are moving quickly, blast it the moment it appears over the horizon. If a bomber does manage to drop mortars, turn 90 degrees quickly and speed off.

To earn heaps of experience points, make a backup of your original play disc. Now boot and insert the disk that contains your characters. Save

them onto your second backup by going to the inn. Buy three tickets (green, yellow, red or black) and try to win in all three arenas. Remember to save after each victory. Once you have a victory in each arena, go to the castle where the bishop is held captive. Before entering flick the write protect tab to protect your disk. Then enter and free the bishop with the correct key. He will give you 10,000 experience points if you have won three fights of the same color. Exit and go to town. Open the write protect tab and save at the inn. You can repeat this several times. Once you have acquired mega-experience, save your party using your original backup of the play disk.

- Sir Kill and Jed I are in Sarakin's Mines. Unfortunately, you have to kill Sarakin first (and his undead friends!)
- Might Nakazama and Lord Peabody's servant Sherman were last seen having some problems with amazons near Native's Cove at 10,1.
- A couple of guys are in prison in Atlantium - break 'em out!
- A couple of kids are kept in prison by kobolds in kobold's HQ in the dungeons beneath Middlegate
- Buy fried troll's liver at bar in Vulcania. I think there are a couple of hirelings who like your taste...But ya gotta demonstrate your skills to them first... (So what is killing a dozen cripples and misers...)
- A couple of hirelings are almost dinner for the snowbeast in Tundara. Kill the snowbeast (in the outer walls of the city), skip the emerald ring or you will be accused of murder, and save the 2 hirelings.
- A lichlord guards a high level wizard in Area D3.
- A couple of guys are currently being held in prison in Castle Hillstone.
- Anyway, with the exception of Sherman, most of the hirelings are not necessary to win the game. They are nice to have around. The most a hireling can cost is 50000 gold a day. There is a list of all the hirelings and their locations in the hall of hirelings in Castle Xabran.

- For the clerical Divine Intervention spell, Go to the Druid's Cave, and at 14,15 is a arch druid who needs a favor from you. Find Horvath! Well, Horvath is within the cave (5,3?) find him and kill him. Horvath is a pretty tough opponet so beware. If you succeed, go back to the druid and he will grant you this spell.
- For the Eagle Eyes spell, complete Nordon's quest in Middlegate, and this spell is part of the reward.
- You will need some sort of protection to get the Starburst spell! It is supposed to be in the middle of the Dead Zone, but I do not know anyone who has actually got it.
- For the Enchant Item spell, find the Gemmaker in the Gemmaker's Cave

- (D1 - 10,12? - a bit north of Vulcania!) The Gemmaker is at 3,3 in the dungeon. Warning: His fee is TIME! (Your character gets AGED.)
- A list of all spells to be found is at the Hall of spells in Castle Xabran.
 - On days 140-170 at B2 - 14,4 (the circus grounds), there is a circus. Now try a few events there. You will probably lose, but you do a consolation prize...A cupie doll! Now go (fly is quicker) to D3 7,13? (somewhere there!) and meet this old raving hermit. He will take the doll and direct you to the pool in the Inner Limits (E2 - 10,11?). Bath in this pool (usually it is acid) and you will feel like a WINNER! Go back to the circus grounds and choose a category you want to improve on. For example, if you want improved strength, try to ring the bell. Horseshoes for improved accuracy, Kissing booth for better personality, Shell game for better intelligence, Sack race for better speed, Head dunk for better endurance, etc. +10 to the category.

Individual Quests

For one to be true, each class must fulfil his quest. Each class must be alone or be in the company of thieves. When the quest is done, return to Mt. Farview in area D2 - 07,00 to claim true status (+) and 5 million experience.

Tasks for individual characters are:

Archers must defeat Baron Wilfrey. (B2 11,02)

Barbarians must defeat Brutal Bruno, the barbarian chieftain. (C4 00,15)

Clerics must defeat a haunt of ghosts at C1 10,15 in the Lost Soul's

Woods and collect Corak's Soul. Then go to Corak's Crypt and reunite the soul with his body. One must have an Admit 8 Pass to enter the crypt though, and to obtain one, you have to get it from a zombie in the dungeon beneath Sandsobar (or find one as treasure after a fight!)

Knights must defeat the Dread Knight of Jouster's Way. (B3 05,14)

Ninjas must assassinate the chaotic Dawn of Dawn's mist bog. (D4 08,09)

Paladins must defeat the Frost Dragon who resides in the dungeon beneath the Forbidden Forest. (B3)

Sorcerers must release both the Good and the Evil wizards from the Isle of the Ancients.

For Evil (dark), follow this set of markeddoors: 1, 3, 1, 7, 9, 11, A, C, G, I. The combination to free the evil wizard is Right 46 (type 46 when you enter the right alcove) and Left 23 (type 23 when you enter the left alcove!)

For Good (Light), follow this path: 2, 2, 4, 6, 6, 12, A, D, F, I. The combination to free the good wizard is Right 32 and Left 64.

Robbers must accompany some/all characters on their relevant quests.

Triple Crowns

Buy a key of the appropriate colour. Buy several arena tickets and then fight in the 3 different arenas (Middlegate's ARENA, Sandsobar's Monster Bowl, and Atlantium's Colliseum). Once you have won all 3 fights, you are a triple crown winner of that colour. Go to the bishop of the appropriate colour to claim the experience earned. There are 4 colours and 4 types of tickets.

Green Key - Key Shoppe in Middlegate

Green Ticket - Supplies Store in Middlegate

Green Bishop - Castle Woodhaven

Yellow Key - Key Shoppe in Sandsobar

Yellow Ticket - Supplies Store in Sandsobar

Yellow Bishop - Castle Hillstone

Red Key - Key Shoppe in Vulcania

Red Ticket - Supplies Store in Vulcania

Red Bishop - Castle Pinehurst

Black Key - Key Shoppe in Atlantium

Black Ticket - Supplies Store in Atlantium

Black Bishop - Luxus Castle

You have to be both True and a Black Triple Crown winner to qualify for the quest for Princess Lamanda (goal of the game).

To finish the game

Get the four weapons (Tolidor, Fluxer, etc.)

Get the Element Orb. (Dawns mist bog cavern - 10,15)

You can't leave with Orb in hand! There should be a teleporter in the dungeon (very near the entrance), use that instead and you should end up in Murray's Cave in Murray's Resort Isle. Another way is to transfer the Orb to the hireling and then Dismissing my hireling. Now I can leave the cave with no problem and I can find the hireling with the Orb same and sound back at the original inn.

Get the four elemental talons.

Use Lord Peabody's time machine to get to the 9th Century (Era 8), and go to Castle Xabran at C2 - 14,08.

Get the four discs

Using the time machine in Castle Pinehurst, or through the vortex holes at the corners of each elemental planes, travel back to the years 100, 200, 300, 400 to find the talons. The locations of the talons are given above. Each shrine which holds a talon requires the appropriate disc to open.

Now you should have all 4 talons and the orb. Go back to the 9th Century again and find King Kalohn at C4 - 14,5 and see him fighting the Mega Dragon. When he sees you with the talons and Orb, you will have changed history because history had said the battle would have been lost. Now that the dragon has been vanquished, King Kalohn will live after all.

You return to the 10th Century and you go back to Luxus Palace. Instead of Princess Lamanda, you now see King Kalohn! He tells you of the final quest. To go to Square Lake and try to stop the villain that is going to doom Cron.

You enter this fantastic maze. At the end of this simple maze, you meet him. SHELTEM and his elemental friends...You should be able to defeat him, but alas, can you beat his recorded message? He has left a pre-recorded message and REAL-TIME cryptogram puzzle. If time expires, the world crashes into the Sun. Now, the encryption algorithm changes EVERY time so I can't help you with that. But the message is the same every time:

We, the people of Terra, in order to form a more perfect union, establish justice, insure domestic tranquility, provide for the common defense.

The answer of this is given already, Preamble. Now, find the corresponding encryption and translate the word Preamble to its encrypted code and then you are done! Cron is saved from crashing into the Sun.

1.152 millenium 2.2

The first thing to do is to activate the Mk.I Solagen which is already in stock in the energy module. Once this is up and running, it's simply a question of initiating the Resource Complex to get enough material to build a Mk.II. Once the Mk.II has been researched, you'll find that there isn't enough energy to build the thing. Turn off the Resource Complex, build the Mk.II and then turn it back on again. After that, it's simply a matter of researching and building increasingly powerful Solagens up to the Mk.X. Don't worry about the failed Mk.III. Simply use the Mk.II which should be in store and repeat the process.

Once the base is operating properly, you have a number of options. But before many of the items can be built, extra minerals are needed. To get these quickly, and simply, research and build a small fleet of Grazers. These can continually ferry small amounts of much-needed ores from the asteroid field.

The central part of the game focuses on the growth and expansion of the moon and it's colonies. This is a matter of finding which moons or planets provide the best sources of raw materials, setting up colonies and shuttling to and from these. The colonies provide minerals and

ores, while the moonbase sends replacement Solagens, Fighters and Orbital Lasers. The latter equipment - as if you hadn't already discovered - is employed in the continual fending off of Martian attacks. Orbital Lasers are very effective, but can only be used once: obviously it's best to keep a reasonable store in each colony and the Moonbase (later on in the game you'll need a full complement of lasers on the moon so keep building !)

To find more info about the Solar system, continually build and launch probes. However, don't bother sending them to the inner planets, Mars and it's moons, Jupiter and it's moons, or the asteroid belt, since they either get destroyed or yeild no/useless info.

The key to completing the game is Triton: probe, research and colonise as soon as possible, for reasons which will become clear later. When reports of Martian flu come in, research and produce the required vaccine. Don't just ferry it to the infected base though, but produce enough for all colonies and the Moonbase since the strain is virulent and soon spreads throughout the inhabited worlds.

At some point you will be informed of the crashed Martian Fleet Carrier, and the details beamed back to the Moonbase. Research this immediately: it's important that one be built. However, you'll find it takes rather a lot of materials!

Once the fleet carrier is built, fill it full of fighters and head for Mars. While in orbit the carrier is attacked by a fleet of Martians, at which point all the fighters should be launched (lower right icon on left hand side). A ferocious, if slightly tedious battle ensues but the Martians should eventually surrender. After this, Mars can be colonised in the usual way. The colonists then find plans of a Martian transforming machine, capable of making the Earth's air breathable. Again, this should be researched and built ASAP. However, you'll find that the stock of chromium is pretty much nil. This is where Triton comes in: you should, by now, have enough chromium collected for shuttling back to the moon.

Once the Terraformer is built, you'll find that even the Fleet Carrier isn't large enough to carry it to Earth. Don't despair: the researchers redesign the ship so that the Terraformer just fits in. The newly customised juggernaut can now take it to the Earth, although it cannot take off again.

While the Earth is being transformed, previous reports of a huge Martian fleet prove to be true, when the Moonbase is attacked by over 200 fighters!

At this point the stockpile of Orbital Lasers - up to 16 - should be used, prior to launching your fighters. Even after all this, it stands a very good chance that the attack cannot be repelled completely, and the Moonbase still gets duffed up a treat. In this case you'll find that the Moonbase's population has been reduced to zero. Don't panic: send a couple of Carracks to the moon to dismantle them. The population increases by 80 for every Carrack destroyed.

Having survived the Martian final assault, it should now be just a question of time before Earth is colonisable. In the mean time, all your colonies start declaring independance. As long as you have a good stock

of materials, don't worry about it. When a report comes in stating that Earth is once more habitable, build the necessary SIOS, and send it to Earth, and then throw your joystick around the room, and out through the window, as you are greeted with the naff ending sequence!

Put a mini-sub in the gap between the tailfin and the hull, face the left of the screen and move upwards slowly, the computer takes over the docking procedure for you.

There are level warps on each level except the last two to be activated by firing arrows at certain areas of the screen. Here are most of them:

Level	Warp Location	Takes to Level
-----	-----	-----
1-1	On the left hand side of the top ledge opposite Kiwi. Jump and fire left (if you have bombs you must get as far left as possible).	1-4 Where there are 2 Extend Life Pills
1-2	Shoot the baddies and collect the blue E on the floor to the right. Now hop back to	1-2 Where there are 2

- the point you started at and stand on the
the last two blocks on the left side of the
second floor. Shoot towards the left wall
while doing tiny hops, and the warp will
appear.
- 1-3 From the starting position there are 12 2-1 near the end of the
ledges and a wall to the right. Go to round
the other side of the wall and fire to
the left towards the second ledge from
the bottom. Ship required.
- 1-4 If you take the warp at 1-1 it takes you 2-1
to level 1-4, where the Extend Life Pills
are. Fire left.
- 2-1 Above your kiwi friend is a small tunnel 3-4
which takes you to some stair-like ledges
leading to a small cavern where there are
two fruits. Fire at the fruit on the
right. Ship needed to reach tunnel.

the end are two ledges with spikes below. through the level
Stand on one ledge and fire at the other.
- 2-4 Just before you rescue the kiwi stand on 3-1 takes you past some
top of the steps and shoot towards the deadly bullets (and
right wall for the warp to appear. the octoous)
- 4-1 Above the Extend Life Pills is a tunnel. 4-2
Fire above the 2nd letter from the
right. You must be on a duck ship for it
to work.
- 4-4 Below the kiwi to the left are some 5-1
spikes. Stand on the left hand side of
Fire while doing tiny jumps (fire right)

When you reach the ice whale, move to the right-hand side of the
spikes, avoid the crystals, and wait until he picks you up. Once
inside the whale, you can start shooting, but avoid the ice drops.

Meeting the rock monster without bombs makes him difficult to pass.
So collect bombs, go to the highest platform and shoot him. Kill it
by either dodging the bullets and hitting it when the doors open, or
by fireballs.

The last boss you encounter is the balloon seal. He cant be killed,
by blows to the body, so you must hit the balloon. Be careful for
the balloon seal is armed with a cannon and shoots cannon balls at
Tiki.

Having got the BEAST running, the best place to stay is the paint control area with the three dials and flush chain. Moving up and down, try to position the scroll so that you can see both the colour in the paint trough AND the toy moulds in use. This way you can make sure that you've mixed the right colour for the right toy.

If you're not careful, a couple of toys can be painted incorrectly when the moulds change. With good timing, you need never waste one. If your BEAST is set up correctly, the first part of a toy to go in for painting should always be the body. When you see the moulds being changed, run to the required paint dial (or flush chain, if necessary) and wait.

You should see the last head from the 'old' toy being pushed out of the mould and enter the bin on the right of the screen. Then the first body of the 'new' toy should be thrown into the left bin. As the 'old' toy's head drops down the paint spray jets, quickly make all the paint changes needed. By the time the jets react, the toy head should have passed through and been painted the correct color, while the jets are now ready to spray the new color on the new body.

Lemmings and lawyers are a pain. Keep jumping and they won't get you. In the later levels, the lemmings start meddling with the BEAST, unscrewing bolts and flushing the paint trough. Leave flytraps beneath the area at risk to deal with that problem.

First, choose a one set game, play the sea-cup and enter one team or two human players.

When it's your turn to serve, move the non-serving player up to the top of the court close to the net.

This will force one of the computer players to follow him.

Now do a jump serve (push up and fire), then hit the ball to the other computer player by pushing right then down. The ball should drop between him and the net and he should miss the ball. Hopefully this plan should work. I don't know if it works with the other teams like Coco, Freaks etc but it works with the Rollers and the Golden Boys."

Continue playing with player 1. Every time player 1 dies, get the yellow pacman with player 2 and kill player 2 immediately. As long as you keep getting the yellow pacman with player 2, player 1 will never die.

Hints:

Select any course except D and win all the races (you must win them to get a gold medal - finishing in the top 3 is NOT good enough!). Collect all the gold medals and you enter a bonus round on a secret course with you in control of the F-14 Tomcat from Afterburner! (With no collision detection) Do the same thing on course D and collect all the gold medals and this time you will be in control of the Super Hang-On bike!

1.252 powerdrome

Here are some tips on the various tracks:

Oval: The secret with this track is to use as much afterburner as possible, but without blowing up your engines. Keep your eye on the temperature gauge. This track is fairly wide, so switch the centering field OFF and pick up speed. Go around as fast as you can.

Antacorp: A difficult track. Turn the centering field up to four or five, which will put you in the middle of the course. When you go through the underground chicane, hold down the right shift key. This will take you through the vertical scanner without slowing down; then straighten.

Clortek: Shortly after the start line, you will encounter a trench. Don't waste your time flying through it; just go over it. When you reach the pressure gate, which is around half way, don't slow down. If you're going to crash into it then slow down. Hopefully this won't occur, but in this instance it's no use fighting the consequences. When you come out of the exit, switch the afterburners on. Go for speed on this next stretch.

Otyaka: It's main section's underground, very dark and at first quite difficult. The track careers from left to right so turn the centering on at around level five. Once you emerge into the open, you'll come across a nasty right hand hairpin, so hold down the centering key again. This section takes some practice.

Banzal: So named because it really is the hardest track. Crank the centering up as much as possible but reduce it down to six if feasible and necessary. You'll encounter the same kind of underground dip as on the Otyaka course, so use the same tactics. If you get through this you are GOOD.

Apocalypt: This section has an alarmingly tight hairpin situated three corners from the start. Take it using centring mode. While underground you will go through a loop de loop. You get through this using gentle movements of the mouse, with centring set around six. This should see you right.

Estoria: Back into sunny climes and a fairly wide track. Bomb around the course with a low centring setting or none at all.

General: As you've probably noticed, the centring field is a pretty useful gizmo in this game. Specifically introduced to the Amiga version, the centring field should make Powerdrome accessible to beginners.

1.253 powermonger

In winter, take a lone captain to the north of the map. Leave him there, but keep an eye on him, because apparently he starts shearing a sheep. And then, apparently, he eats it.

Instruct your captain to invent something, pause the game, put the game speed up to full, and wait a couple of minutes. Now unpaue the game, the

captain will have kept inventing during the pause!

When you wish to invent in double quick time, click Invent and when your men leave, click on it again. This often makes a catapult immediately. This cheat works only once on each island.

Later on in the first level, look out for a ladder near some water which leads up to a platform and an egg. Climb the ladder, take the egg, then go to the left, into the water, and you will find a submarine secret room.

There is also a way to find some hidden extra food. Go to the third screen of level three and jump forward hitting empty space. The hidden food should now appear.

Level Codes:

Tips: Once in the core, you can't quit. So choose droids with good lasers, Jack and Spud for example. The Quadralien mother is made up of 4 separate pieces grouped together and surrounded by Earthling boxes. The mother can only be destroyed by blowing up each box from a different direction. From the starting point there are three exits: north, east, and west. Go east and destroy the first box, return to the starting point, and go north to destroy the second box. You will now have both droids to blow the remaining boxes. Go west through the one-way force field, and get the other. Don't forget to keep recharging.

1.276 questron 2

Here are some general hints for the game:

- While playing Wizards Squares, I find that the ball usually lands on Red or Blue.
- If you have low hit points, watch out for Slasher Boars. Also, steer clear of swamps and mountains, as they contain the toughest of monsters (Hurlers, Ice Urchins, Spikers, etc.). Grub Snufflers are the best monster to meet because they have a much greater profit ratio. (hit points against gold carried)
- The game is finished in the realm of sorcerers, in the Dungeon of Despair. You must have about 10,000 hit points and many spells to finish it. An absolute necessity is the "Scroll of Scalna", which can be found in the other dungeon in the realm. The Scroll is a magical map, and it automatically maps your path.
- Watch out in the dungeons, and constantly check ahead of you with the "Xamine" command at the bottom of the list of commands, as bear traps or spikes whip up and destroy your amour, or do up to 4000 hit points damage.
- Some weapons are better than others for killing certain monsters. Here is a table indicating what weapon is best against some of the different monsters.

Tanglers	-	Dagger
Wave Slappers	-	Rapier
Spincers	-	Rapier
Mutant Carps	-	Cudgel
Slasher Boars	-	Spear
Ramdarts	-	Bow and Arrow
Giant Cockroach	-	Fauchard
Spiker	-	Staff

- Make sure that you have plenty of food before descending into any dungeons or tombs, as you may get lost and run out of food. This will cause you to starve to death
 - Some magic items can help you in your quest - If you Use the wand of power, you gain 200 hit points, and if you Use the moonstone amulet, you gain 100 food.
-

Here is a part solution. If I ever get round to it, I may even update to the full solution someday!

To increase your cash balance by \$500,000, enter the <F1> screen. Hold down <SHIFT> and <4> to produce a dollar sign. You'll immediately inherit lots of money. Apparently this only works from the main continent screen.

1.283 rainbow islands

At the title screen featuring the colour-cycling rainbow, the following codes may be typed in.

SJBLRJSR A helpful fairy
BLRBJSBJ awards permanent fast shoes
RJSBJSBR awards permanent double rainbows
SSSLLRRS awards permanent fast rainbows
BJBJBJRS Hint 1
LJLSLBLE Hint 2
LBSJRLJL Continue after Island Five
RRLBBJS All hidden food becomes money

RRRRSBSJ Does both of the previous two
SRBJSLSB Gives you a 100 Million Points Counter

When you have typed in the code, click up a credit and an icon should appear in the bottom left hand corner of the start screen. This bonus is now operative throughout the game, but you will have to re-enter the code after all credits are used.

Collecting the seven different-colored gems gives you an extra life and a 100,000 Bonus Gem once the Boss is defeated. But collecting all of the gems in the correct order of color (from left to right on the gem counter) not only awards you the life and Bonus Gem, it also grants you access to a magical secret room. When you reach the end of the level, a silver door appears. You don't have to fight the Boss.

Even more useful is how to create any color gem. The screen is split into several invisible vertical stripes of color. When a gem falls, its color is determined by the 'color' of the area into which it fell. Now all you have to do is gauge carefully where the dead enemy will fall to create the gem color of your choice.

On the fifth island you'll find a box in the secret room which you should collect. There's also a gate with a '7' on it, leading to island 7.

For infinite lives, choose three credits, hold down 'QWERTY' keys and press your joystick button. When the game loads you should have infinite lives.

1.284 rally championships

Find a car you want, but cant afford. Now, leave the game. Find the name of the car you want and .txt, so if you wanted an Escort, you would find Escort.txt. Now use a text editor and find a number (at the beginning). It should look something like 00000012345. Now, replace the places where the 12345 # is and put 0s in there place. Now just leave a trailing 1. Now the car will cost all of \$10. This is not only a way to get the car you want, but makes it cheaper to just buy a new car each time instead of refueling/fixing dammage.

1.285 rally cross challenge

On the fifth track, drive around until you reach the wooden level crossing. Turn the car 90 degrees and drive down the track at full speed, until you reach the end. The race will end giving you 28 race points. When the game starts, follow the railroad tracks and the screen will go blank. Now you will find yourself with 24 tokens.

1.286 rambo ii

Stage 2: When you are back in camp again, walk to the bottom left.

There is a black shed here. Throw knives at it from the bottom and the POWs will be released. Now go back to your helicopter.

Stage 3: Have another joystick in port 1 and pull it back while pushing the other one forward. This makes your chopper fly faster. A word of warning - don't let go!

1.287 rambo iii

Type in "RENEGADE" on the high score table, then, while playing, presing <1>, <2> or <3> will take you to the appropriate level.

And now for some tips:

- 1) When inside the 2nd building, wear your IR goggles.
- 2) Don't walk in front of soldiers, since it will trigger an alarm and about 8 soldiers will jump you!
- 3) If you enter a dark room, use the glow tube.
- 4) Never use a gun without a silencer.
- 5) Turn off the electric door with switch located several rooms away.
- 6) The mine detector won't work without the generator.
- 7) The IR goggles won't work without a battery.
- 8) Watch out for IR beams, since they also trigger alarms.

Here's a list of items you can find: arrows, silencer, first aid kit, IR goggles, glow tube, battery, key, mine, detector (in 2 pieces), pistol, ammo, rubber gloves (you never know when you can be expected to perform major surgery!!!)

1.288 rampage

If you're on the last building and a cloud of dust appears under it punch in any direction and keep your finger on the fire button until the next screen is displayed, whereupon you will be able to climb up an invisible building which is in the same place as the last building on the previous screen.

1.289 rbi baseball 2

If you stand in the very top corner when batting it is possible to hit the ball out of the stadium.

When your opponent reaches third base, hold the joystick left, hold down <SHIFT> and press <FIRE>, and he will be hit out.

When the computer is pitching, press <P> to go to the substitution screen where you can change the computers pitcher for an inferior one.

Hidden Rooms

There are two hidden worlds behind the main tower, another sweets level (including a Liquorice Allsorts World, the infamous Bouncing Jelly World, another Cake World and an upside down Jelly World) and an extra scrolling section. To reach them, run along the ground floor - avoiding the doors - then go up and over the first flight of stairs. From the bottom of the second (smaller) tower, make your way up to the landing above Dr. Maybe's final door and run left into the wall. You'll disappear behind the screen and arrive in the Secret Tower room. But who is Katie?

Once you've finished the bath level, drop down to the bottom of the castle, and walk left until you get to the small snowman statues. Jump on these and they'll turn into a moving platform. Once you get to the top of the screen, walk left into thin air and jump. By now you should be next to some doors. Go through them for bonus city!!

Go to the same place after finishing the circus room (the last room before the end of game baddy) and stand on the golden snowmen again. A platform made of two bonud blocks should float upwards, revealing a secret tunnel. At the end of this are even more extra lives and stars.

Do as above after the sweets level, but go to the left of the castle. Go on the snowmen once more, and at the top of the screen grab the umbrella and collect all the goodies while you're floating down.

On the second teddy bear level, keep jumping over the spikes until you see a hole above you. Jump through this and catapult yourself off the bus there. Once you've done this, get on the higher level and keep walking left, bounce on the trampoline and collect the wings. Now fly along the top of the screen to the right and you should find a different exit. Go through this for a special bonus level.

Complete a level with does not feature a guardian and you will always find something new when you return to the castle "selection" screen. In one case you will find a whole sequence of lifts and things (see above) that lead to a door that you cannot normally get to. If you go to the very right of the factory screen and look down you will see a load of crowns, which you can access after coming back from other levels.

It is possible to finish Robocod by only doing half the levels. A choice of two new doors to enter is given when the correct level is completed. Start by completing the Fluffy Toys one and then by doing the Cars one.

Finish the bath levels and as soon as you come out of the door run straight to the golden snowmen in the bottom far left outside the castle. Jump into these snowmen and you'll float upwards to the top of the screen

where you'll be met by a door. Getting through this door is tricky but worth it. Inside are loads of extra lives and energy stars. Go to the same place after finishing the circus room (the last room before the end of game baddy) and stand on the golden snowmen again. A platform made of two bonus blocks should float upwards revealing a secret tunnel. At the end of this are even more extra lives and stars.

1.319 rocket ranger

Tips:

Rescue the professor as this slows down the nazis, they can't use him to increase their efficiency. You will waste valuable time unless you rescue him from the Zeppelin while he is over the Atlantic

Shooting the gunner in the Gondola is tricky, the best method being shoot below the gunner and move left and right until you are on target. Gradually move up until you hit the Gondola. When you hit it there is a flash, stop firing and after a few seconds you'll be inside the Gondola.

Find the supply of Lunarium before the Fort Knox supply runs out, so infiltrate the Nazi base which recieves Lunarium from the moon. It is in South America or Africa, once infiltrated, your agent there will carry on sending you Lunarium throughout the game. You will have to storm the Nazi base first.

NOTE: Possibly don't waste time rescuing the professor, as you will be always too late. Instead use the agents to find rocket factories, and uranium depots.

Complete Solution:

* Starting the Game

When you have loaded the game and you are greeted with the option menu, go straight to the War Room. Now move two of your agents to South

America, and place the other three agents in Africa. Forget about flashy Joe on Germany, move them straight to these areas, then exit. Now takeoff. Forget the fuel depot. Enter 23 into your tank to get you to the Atlantic.

* The Zeppelin

On the first screen, the Zeppelin will move from left to right across the screen. You can not hit it with your gun, but you can destroy the torpedoes that are fired at you. Once ten torpedoes have been fired, regardless of whether you have hit them all or not, you go automatically onto the next screen.

On the second screen, the zeppelin is much closer. Here you have to aim at the gondola just below the main airsack. Torpedoes are also fired at you. Try to dodge them; do not bother about destroying them unless they get in the way. The main objective here is to shoot the gondola. If you successfully hit it, a green flash will appear. Do not fire anymore, and you will go onto the next screen. If you accidentally shoot the airsack on the zepp, then it blows up and you have failed this bit. But do not worry, as you have not lost the game. See the 'Barnstoff's Captured' section in this solution for more details.

On the third screen, you will now be in the zeppelin gondola, where Jane and the Prof are. After she says something to you, on the FIRST time you successfully rescue them, you reply like this:

"Loosen up Dollface"
"I like your style"
"I oughtta teach you"
"I took the scenic route"
"Can you use some help?"

Once this has been entered, you automatically fly back to Fort Dix, with Jane and the Prof. Later in the game, the Nazi's capture Jane and the Prof again from the USA, in which you have to attack the Zeppelin again, it happens three times in all. The second time you successfully get into the Gondola your replies are:

"I'm glad to see you too"
"I just want to help you"
"Can you use some help?"

The third time, your replies are :-

"I'd be happy to leave"
"I just want to help you"
"Can you use some help?"

These replies ALWAYS work successfully if you enter them in the correct order, unlike some suggestions that I have seen in magazines concerning this game !!

* The War Room

You should return here after you have returned from the first zeppelin raid. Your agents should be flashing so read the reports. Your first objective is to find the Nazi Bases. The next objective is to find the 5 Rocket parts, organise resistance in the west, and knock Nazi efficiency

down a bit.

The Temple base is nearly always in SOUTH AMERICA, whereas the DESERT BASE is nearly always in AFRICA. Try these places for both bases:

South America: Venezuela, Columbia, etc

Africa: Middle-East, Kenya, East Africa, Egypt, etc.

Once a base is found, organise resistance and fly to it straight away. When you go for a fly, try to visit more than one country if possible. ie, attack a Rocket Factory, then go to a base. Once resistance is organized, Lunarium comes flooding in.

It is also useful having a bash at a Zeppelin Factory, or a fighter base, or a brain washing plant just to slow the Zeppelins down. Once the two bases are found etc, you must locate the 5 parts of the Rocket. It is also usefull to try and get Canada, and all of South America turned brown, which means resistance organized, as it gives you extra time for locating rocket parts, as the zeppelins take longer to occupy a country with resistance organized in it.

Try to keep two agents in the left side of the world, leaving three agents to investigate the right part. If you have less than three agents left, and you are still locating the two bases, FORGET IT - start again! Once you have all 5 parts, and enough Lunarium, you can construct your rocket and fly to the moon.

* Barnstoff's Captured

If you blow up the zeppelin (silly bod!) then they are first taken to Germany in a sub, when you get back to Fort Dix, you get a message saying that they are going to get exterminated, and it suggests you fly to Germany. Well I strongly advise you not too. I have completed the game by ignoring this message, it is up to you, but I advise you don't. If you forget about it, you later get another message saying they have been taken to the desert base (one of the Lunarium ones you are trying to find!). If you ignore it again, they just get sent to the moon unharmed.

If you want to fly to Germany, when you get the message about Jane and the Prof, then you get the Shoot Planes screen.

If you kill them (easy as there are only eight!) you land in Germany, where you get immediately captured, you then get interrogated, and you answer as the zeppelin screen. I never got this right. I once told him that "Hitler eats Babies" in which I escaped to another country, but I did not free Jane and the Prof.

If you are unsuccessful, then when you get the next message about them being taken to the Desert Base, fly to it (that is if you have found it!) and you get captured again, with the same screen as Germany! Which is why I ignored it as I could never get the answers right! As I mentioned before, it is not necessary to go through this bit.

If you fly to Germany when Jane and the Prof are not there, and successfully shoot the planes down, then when you land you get a message saying well done, and Nazi efficiency has gone down by 5%.

* Nazi Efficiency

This is where you can knock down the percentage in the top right hand screen, to slow the Zeppelin down. You do this by your agents reporting about a brainwashing plant, or looting of art treasure, zeppelin factory. If you fly to the country, then all it is, is the plane shoot, and once this is done you get a suitable message saying efficiency down by 10%. It is only worth doing this in the early stages of the game, as the plane shoot gets much harder later on.

* ME 109's

On this screen you are soaring above the clouds, ME 109's attack in formations, the best way I have found is to stay at the bottom and pick them off. This screen, in my opinion, is the hardest screen of the game, except for perhaps the moon shoot out. Once you have been hit three times, then kaput. You'd better have enough Lunarium to get home!

* Takeoff

Make sure you have loaded up with enough Lunarium - a heavy load is harder to take off of course, but if you press the button, in time to his legs being directly underneath his body, you should manage it. Watch out for the lame seagull, and also watch out for the UFO which appears from time to time on the screen where you soar up through the sky.

* The Ack-Ack Screen

This is the attack on the Desert Base. It is at night, and ack-ack batteries come at you from the top of the screen. If you fire your gun a bit before the batteries, you will destroy them. Once you have hit ten you have done it! You can only take three hits from Flak! Very easy.

* The Temple Shootout

This is also very, very easy. This places you in front of a temple, where you have to knock out machine guns positioned at the windows. Pull down on the joystick and the bullets miss you, you have three seconds before the machine gun opens up, so rush to the window and fire slightly above it, and KABOOM! If you get hit three times then you have failed. Once you destroy all guns, the door opens and you have done it!

* The Punch Up

When you fly to a rocket factory, upon landing you have to bash the pulp out of a guard. There are four moves and two ducks, the ducks are useless. The first three guards are dead easy, the last two can be sorted out if you keep the joystick pressed up, and press the firebutton when his face is uncovered, knock his bar down, and BLAM, you did it!

* The Moonbase

Once you have the final rocket part and 500 units of Lunarium, assemble your rocket, load the Lunarium and blast off! You will then find yourself in the Mine. You have to shoot the women zombie slaves from the platforms in similiar fashion to the Temple shoot out. To hit them stay down until the girls cease firing, then move over and shoot them. Be quick as they will escape on ropes and return. Repeat the process carefully, for those on the right. Don't forget that your vision becomes impaired due to the effects of the Lunarium, so hurry. If you have succeeded, the world is saved! If you are to slow, then Nazi's are in the Whitehouse!

Alternatively, here is a complete solution:

Level 1

Right just make your way rightwards kicking the dog occasionally until you spot the crevasse, now, you need to run up to the first ice platform from the floor, and when you are a couple of paces from it, jump, and keep jumping until you are over the crevasse. Once you've done this, the only trouble you'll have is the 'stalker' and a dog. Oh and also once you have killed the 'stalker', the place fills with gas. What you do is this, run right, and kick the 'stalker', when he comes by, the only way he can harm you is by whacking his exploding pucks at you, or whacking you with his stick (whatever you call it, and he doesn't do this very often!) If he comes up behind you, run towards him and kick him, then continue right. It is important that you get as far right as you can, so that when you have killed the 'stalker', you don't get killed by the gas as you are running to the exit.

Level 2

Make your way to the right, when the dog comes give it a boot. Eventually you will come to the brick, pick this up and run with it until you come to the pipe. Now chuck the brick, pick up the pipe, run with pipe to right. You will then find the brick again. Put down the pipe, pick up the brick, and chuck it again, pick up the pipe and continue running right. Repeat this process of chucking the brick, putting down the pipe, pickup the brick, chuck the brick, pickup the pipe, continue right. Eventually you will get to a much needed medical pack. Collect this, then collect the brick and crawl through the metal tube that's ahead, when through, chuck the brick. Go back through the metal pipe, and pick up the pipe, then go back through the metal pipe again, with

the pipe in your hand. Keep running to the right, kick the dog if necessary, chuck the brick when you find it. The 'stalker' will appear, chuck the brick at him, bash him with the pipe, after you have hit him, crawl, as he can't get you if you duck and crawl, then hit him again, don't forget to kick the dog, as the dog can get you when you crawl/duck. Once killed, run for the exit (no gas this time!)

Level 3

Run to the medical pack and collect it, kick the dog when it comes. Keep running until you find the 'stalker'. Don't try hitting him, because if you do, you'll get electricuted. Your objective now is to get past the 'stalker'. If he raises his hand and fires, duck and crawl past him. If he lowers his hand and fires, just run and jump past him. Keep going to the right until you come to the brick. When the 'stalker' comes at you in his battle car, jump at it in the way it's coming at you. This way it won't knock you over. When you have found the brick collect it, throw at the 'stalker', then run or crawl towards it again, collect it and throw it at the 'stalker' again. Keep doing this until he is dead, and run for the exit.

Level 4

Run to the right, kick the dog until you come to the 'stalker'. When you find him, keep moving about until he flies into the air (using his flame thrower as a jet pack). Now keep running about in both directions, and when he comes near punch or kick him, watch out for the flames though - duck. (quack!). When he is a dead duck, go to the exit.

Level 5

Very simple really: keep going to the right, bashing the dogs and biffing the guards, and spiffo, you have reached the exit and finished.
