When you want to fight the Swordmaster on Melee Island, you don't have to search through the forest - you can go to the shop and tell the shopkeeper that you want to see the Swordmaster. Then, when he leaves the shop quickly follow him and he will show you the way. To get into the safe,

the proper sequence is: pull, pull, push, pull, pull, pull, push, push, push, push.

Part Two - The Journey

Once the crew have talked to you and you have returned to your cabin, open the drawer in the desk and look at the contents of the drawer. Look at the book to read it. Pick up the feather quill and the jar of ink, walk to the door to get to the deck, walk to the rope ladder and pick up the Jolly Roger when you get to the top of the ladder. Go back down to the deck and go down the hatch. Walk to the door to get to the galley.

Open the cupboard and take the box of cereal. Open it to get the prize. Look at and you will see that it is a small key. Now pick up the pot and Walk back up the ladder. Walk to the hatch to get down into the hold. Open the chest on the right and look at it to get some fine wine.

Look at the entry for pool of radiance for full details on how to cheat this game.

1.21 sensible soccer

To score off a corner every time, kick the ball towards the goalie. When a forward gets hold of it, kick it across the goal mouth and use after-touch to bend it into the net. The computer never quite manages to work out what is going on until it is too late.

When your match appears next on the fixtures screen, for example England (You) v Germany (The Opposition), instead of choosing Next Match, click on Exit. Now choose Friendly from the main menu and choose Germany as your team. Go to the Team/Formations Screen and get all the German star players on the bench, put the forward in goal, and generally mess about with the original team selection. Now start to play the game, but escape from it as soon as it begins. Return to the League/Cup games and View Opposition (Germany). Your opponents team will still be mucked up. Using this cheat you should be able to win every match.

This cheat will allow you to play the game in slow motion (aka Kick Off 2). What you have to do is play a match and then make a substitution. Then when the player is walking off, press <ESC> and you will quit the game. Start another match and you should notice that everything plays at slow speed, even the timer! To return to normal, make another substitution, but let it carry through.

1.28 shadow of the beast ii

When you start the game, run right until you come to the man with the spear, press <A> to ask a question, type in "TEN PINTS" and press <RETURN>. You should now have infinite energy.

When asked to whisper the password, try whispering either:

```
Level 1 - ETERNITY
2 - SUNSTONE
3 - NECROPOLIS
? - OBERON
```

Also, try these words in the game: MALETO, KARAM, PIGM, PYGM, SEA, OLD, MAN, COMPA, SACK, PACK, GATE

Here also is a full solution:

First you should go left. Through the trees tossing their balls about at you, and across the bridge. You will now arrive at a tree stump with a guard (Don't kill him!). Here you'll need to be as fast as possible to jump up about four times and kill the oversized mosquito that is going to carry the guard away. When he's dead then stand still and listen to what the guard says. Now ask him about "traps" and he will say either "Upper" or "Lower". Now descend the stepped branches to the left and jump into the side tunnel on the left. Walk along until a cousin of the mosquito that you killed above will fly past. Turn around fast and go to the right where the mosquito is cutting through the rope. KILL him quickly or else you're stuffed. Once he's dead just stand on edge of the ledge and wait for a strong dude to push a stone towards

you. When he reaches the very edge where you're standing, hit him once and he'll kick the bucket.

Now go to the left and up the rise where the hovering mosquito is waiting for you to kill it. So oblige it then go back to the right where a key has fallen when you swatted the bug. Take the key the go back to the left. Drop off the edge, walk across the see-saw then jump up onto the rope that's hangin' around waiting to be climbed. Climb it and jump off onto the ledge at the top.

Use that key you found open the way for you. Continue to the right until you come to a wall with two switches. Now remember what the guard told you? Was it upper or lower? Hit the switch (with your mace) that the guard told you. (ONLY that switch!) If you killed the guard by mistake, the try the upper switch. If you hit the wrong switch the ground disappears and you get you're feet wet. If you got it right then stand still and the cage above you will be lowered. Stand on it and wait. It will then rise up.

Step off at the top and go the right, across the pit with the guard and the puppy dog. Continue until the end where you will find a key. Climb a chain from the ceiling to get to a high ledge where you'll find some goodies. Then return back to the pit with the guard and his pet puppy dog. Carefully climb down the chain and when you're near the bottom jump to the left otherwise you'll wake the guard which will mean restart the game. Use the key you found above and release Fido. He'll then scare the chicken soup out of the sleeping guard who then goes off to look for a better life and a large bottle of scotch. Hit the bottom lever at the right off the pit, then climb back out and return to the cage at the left and descend.

Continue to the left and go back down the rope you climbed. Go to the left until you reach a wall with 3 switches. These switches operate the crane that is above you. The lower switch moves the crane up or down, the middle one moves it left or right and the upper one opens and closes the claw. Now use the crane to pick up the huge boulder where you're standing carry it across to the right hand spike and drop it. It will then break up. Be careful when using the switches or else you'll break the boulder and you're knackered.

Now push the rock piece left over to the see-saw. Now climb the rope and after some practise manage to properly jump off to the other side of the see-saw where the rock is launched into the air and lands in the suspended cage. Quickly run to the left and stand on the other cage. The rock's weight will then lower it's cage thus raising your cage up to a ledge. Go to the left, chat to the dragon if you like, then whip him into a fudge brownie. Next hit the bag hanging from the branch and the original guard's brother will then drop down. Ask him about "ishran" and he will then give you a password for you to remember.

Now return right, down, right, upabit, rightdownabit, right and you should be at the edge of the ledge with the rope at your right. Climb down the rope and continue to the left until you confront a big lumberjack with a skin complaint. Hit him until he falls back into the acid pool. Continue until you reach the tavern. Enter go to the left and take the bottle of booze you find. You can talk to the barman on the right but he's rather boring. Leave the tavern, go right and down

the stepped branches with the leaping greenies. Go to the wall with the ghostly apparition of somebody's granny behind it. Speak the password that you were told (you did remember it, didn't you ???).

Then continue on until you reach a big dude who gives you a parchment of a prehistoric playboy centrefold to help you while away the time on those cold lonely nights. Now return all the way back to where back to where you originally started. Continue to the right, through the forest full of uglies with oversized toothpicks, until you reach an area where there are jumping green booger balls. Make you're way up until you confront Simon the Snot-Nose Monster. Kill him and collect the axe that he drops. Look around and you'll find a couple of chests, one's to you're left and the other's above to the right. After you've raided the chests then go back down to the ground.

Go to the rock platform that defies gravity on the left. Under it you'll find a patch of grass that looks slightly different to the rest of the ground. Jump on it a few times until it collapses. Go down the stairs and across to the left. Run to the left until you wake a guard who starts to run off. Keep running until you reach a wall with a sliding floor in front of it. Stand up against the wall and use the axe you found to kill the guard who's winding the floor in before you fall and have to restart.

Once he's dead you can then kill the other guard and break through the wall using your mace. You'll find a chain so go ahead and climb it. You'll find a switch so activate it then run as fast as your little Reeboks will carry you to the left where you have to activate another switch then run back to the right before the timer runs out. If it runs out and you didn't activate the cheat then you'll be a skewered corpse. Go down until you find four cards sitting around playing poker. Kill the two on the right and collect the key. Go left until you are caught in a cage. Don't worry it's harmless. Wait for the guards to take you to a cell. Once in the cell offer the bottle of booze you got from the tavern to the guard sitting outside the cell. He'll then take it and drink himself to sleep so you are then able to bash down the door of the cell.

Jump onto the chain and climb up to kill the guard on the left. Go back down and kill the sleeping guard, take the key and go back up to release the prisoner with it. Now climb up to the top of the chain where you'll kill any guard you find and take a rather large ring. Go to the right where the prisoners are waiting at a door. Open it with the other key and run along with the prisoners, who should get impaled by the Heavy Duty Deluxe Model Stainless Steel Low Calorie Toothpicks. Then return to the entrance up at the ground level.

You'll need to find your way to the right where there is a bridge. If you go right from the entrance and go down the rope and into the water there will be a rope that you can climb up to get to the bridge. On the right side of the bridge you'll find a large postman with an equally large letter opener. Get him to follow you back to the bridge. To do this go up close to him then run away quickly. Once he's on the bridge he'll fall through. Go to the right and avoid the hole in the bridge. You'll find a guy who you'll give the parchment and ring to, and he'll then give you a rather useful new weapon.

Go back to the bridge and fall down into the river where you'll get sucked in by the whirlpool. Make your way across and down collecting energy (wow) and the Horn. Go across until you find an angry snail sitting on the world's largest magic mushroom. Ask him about "karamoon" and he'll then offer to take you for a ride for 36 gold (which you should have collected by now if not, restart etc...) so you accept of course. He'll take you to Karamoon where you go to the right until you are at the edge of a great sea. Blow your horn and your limousine will arrive to take you to Zelek's castle where you enter and seek out Zelek to take your revenge.

1.29 shadow of the beast iii

On the title screen, type "DADDY DRAW THIS FOR ME" and press <RETURN>. The shurikan should turn to a smiley face with letters under it. During the game use <CURSOR RIGHT> for invincibility and <CURSOR LEFT> to go back to normal.

When the intro sequence is running, hold down the following keys: <CTRL> <ESC> <RIGHT ALT> <F2> <J> <V> <5> <HELP> <(<ENTER>. The last two on numeric keypad. LET A FRIEND HELP YOU! (maybe also <C>)
Now when the title screen plays the bottom of the screen will flash to indicate that the cheat is activated.

Then, while playing,

<1> more energy player 1

<2> more energy player 2

<HELP> advances you a level, and

<Q> turns off the collision detection, making you invincible.

When you reach the continue option screen and, if after the word credit, it says 1, start tapping <1> and <2> alternately, all the way through the change disk prompt until both men fall from the sky. This gives you infinite lives.

1.31 shadowgate

Try talking to the rope - it is magical. The word on the wall will help you here. To get the Cyclops, use the sling with a stone. The stones are near the waterfall. To get the flute you need the steel glove. Operate the well and examine the bucket. When you get the flute, play it. What you get from doing this fits into the hole in the King's room. With the wand, go back to the bridge, remove all excess equipment and cross it. Try out the wand on the snake. To get the horn, pour holy water on the Hell Hound.

Same word while holding down <LEFT MOUSE> to enter color mode (this is controlled with numeric pad) or be invincible.

Pressing <Q> while the game is paused lets you enter music mode

Lastly when the Shinobi logo appears on the title screen hold down the letter <T> and move the mouse to control it.

On the helicopter boss pause the game and type "HELICOPTERTOOTOUGHFORME". Then die and you will then go to level 3 (if you have another life left).

1.35 shockwave

Here are some tips on the game:

Mines Each time a mine is purchased, the income you receive for each 'time pass' doubles.

Factories

The more factories you have, the faster more weapons are produced.

Rigs Rigs supply you with the fuel for each mission run. The more rigs you have the greater the amount of fuel you get for each 'time pass'.

Armies For every army unit you own, the enemy slows down slightly. You have one army unit, for each four time passes that occur the enemy won't move for one time pass.

If more than 50% of the sector is occupied by the enemy then you will lose one of your assets for each 'time pass' that occurs. The best solution is to, when 30% is occupied, attack the enemy.

If you get to the penalty shoot-out and you are not very good at saving goals, then as the opposing team player is running towards the penalty spot press <C>, <F2> and <FIRE>. - <F1> - <F10> slow game down from normal <F1> to a crawl <F10>

If you have the latest version then attempting the above will reveal the message: 'Congratulations!, you have found the cheat mode... unfortunately it has been ZZAPPED!'. If this happens go to the control selection (<F10>) and type "scrap 28" and then start the game. The effect is the same as above.

1.40 silkworm iv

While playing, press <P> to pause the game and type "NCC-1701". Then press <N> ? The screen should flash. Press <P> again to unpause and from there on, both players should have infinite lives.

After defeating a Goosecopter, fire continuously at one of the tokens. After 32 hits, it will turn into a star, which when collected will yield mega-powerful six-way fire. Just be careful not to hit the token again before collecting it, or it will revert back to the one of the ordinary power-up tokens.

1.41 sim city

While playing, hold down <SHIFT> and type in "FUND" for an extra \$10,000. However, after using this cheat a few times you will probably get an earthquake, so it is best not to build much until you have done this.

Another tip is to set the citizen's taxes to 0%. Then just before tax collection (December or November if playing at fast speed) quickly set the taxes up to 20%. Then after you collect taxes, put it back down to 0%. This way the citizens think they are not paying any taxes.

You can build land on water. Find a straight (horizontal or vertical), stretch of coastline and string a powerline along it. Next, move one square over, out into the water and string another powerline parallel to the first. Repeat as many times as you want. Then just bulldoze all the excess powerlines and you can build on the new land.

1.42 sim city 2000

Start a new game, any year on Hard level, type "FUND" until your cash is at \$60,000 (reply yes to all queries). Now go to the budget menu and select bond repayments. Then click on repay bond and answer yes to repay bond at 3%. You will now get \$50,000 every year.

Also try typing some of the following.

1.43 simon the sorcerer

Complete solve:

This solve is intended for someone who's stuck at some point in the game, not for someone who just wants to play it all through with no effort. If you haven't been exploring the game on your own you'll have no idea where the places are that I'm telling you to go to.

First, go to the troll bridge. The troll won't let you by because he's on strike. In one of the forest scenes there's a barbarian with a thorn stuck in his foot. Find him, talk to him, and Simon will pull the thorn out. The barbarian will give you a whistle for you to blow when you need him. Go back to the bridge and talk to the troll. He'll take the whistle from you and blow it. The barbarian will appear and beat the troll up. The bridge is now open.

Beyond the bridge is an oaf. Talk to him. He needs water for his magic beans. Go to the witch's cottage. There is a handle on the well. Use it and the bucket will rise to the top. Get the bucket and go back to the oaf. You'll pour the water on the beans and leave the screen. Turn around and go back. The oaf is gone but some of the beans are still there. Get them and go to the back of Calypso's cottage. Use the beans with the compost. A watermelon will grow.

Get the watermelon and go to the screen with the bard. Use the watermelon with the sousaphone. It will jam and you'll talk the bard into giving it to you. Go to the sleeping giant and use the sousaphone. The way to the upper mountains is now open.

Go to the tower. The bell won't ring because it has no clapper. Go to the forge. The clapper is on the table. Get it, return to the tower, and use it with the bell. Now use the bell and hair will drop down from the top of the tower. Use the hair to climb up into the tower. You'll end up with a pig called Repulser.

Take Repulser to the "candy house" (the house with the beehive next to it) and use her on the door. Now you can get inside. Get the smokebox and hat. Go to the pub. There's a box of matches on top of the fruit machine. Get it and return to the candy house. Use the smokebox on the beehive.

There's some wax on the beehive. Pick it up. Go back to the pub. Talk to the barkeep and ask him to mix you a drink. While he's making the drink, use the wax on the beer barrel behind him. Wait around. He'll throw out the beer barrel and give you a voucher. Leave the pub and pick up the barrel.

Go to Calypso's cottage. Open the drawer. Take the scissors that are inside and return to the pub. Use the scissors on the dwarf. You now have a beard. Go to the screen that the dwarf mine is on and wear the beard. There is a rock lying on the ground next to the mine. Pick it up and look at it. Enter the mine. When you're asked for the password, you can say "beer" immediately because you looked at the rock.

Inside the dwarf mine, try to go left. You'll be stopped by the guard. Give him the beer barrel as a bribe. He'll go to drink it and leave the path to the mining operation open. Unfortunately, the door leading from the mining operation to the treasure room is locked.

Go to the Wise Owl's tree. Notice that the Owl drops a feather when he first talks to you. Get the feather and return to the dwarf mine. Go to the right. Use the feather on the dwarf who's sleeping on the ground. He'll roll aside, revealing a key. Get the key and

use it to open the treasure room door. Give the treasure room dwarf the beer voucher. He'll reward you with a gem.

Go to the dodgy geezer and talk to him. Offer him the gem. He'll buy it for 20 gold pieces.

Go to the dragon's cave. The dragon has a cold. Go to the druid's house (it's the house with the wagon wheel in front of it). There is a cold remedy on the stump to the right of the stairs. Get it and go back to the dragon. Use the remedy on the dragon and it will put him to sleep.

Go to the mining operation in the dwarf cave. There is a hook with a rope attached to it hanging next to the door to the treasure room. Get it. Go to the forge. There is a rope lying on the ground to the left of the barrel. Pick it up. Go inside Calypso's cottage. Pick up the magnet that's on the fridge.

Return to the dragon's cave. Use the hook on the boulder hanging above the entrance. This will let you climb above the cave. Use the rope with the magnet. Then use the rope and magnet with the hole. Keep doing this until the hoard runs dry.

Go to the woodman and talk to him. He needs an axe made of milrith to cut through the enchanted trees in the area. He'll give you a milrith detector. Go to the screen in the mountains with the small statue and use the milrith detector.

The screen above the dragon's cave has a rock lying on the ground. Pick it up. It has a fossil inside. Take it to Von Jones's dig and give it to the hole. Von Jones will tell you to get the fossil out. Go to the forge and use the rock with the anvil. The blacksmith will break the rock open and reveal the fossil. Go back to Von Jones's dig and give the fossil to the hole. Tell Von Jones that you marked where you found it with your metal detector.

Go to the screen that you left your metal detector on. Look at the dirt around Von Jones's hole and you'll see milrith ore. Pick it up and go back to the woodcutter. He'll tell you that he needs it made into an axe head. Go to the forge and use the milrith ore with the anvil. The blacksmith will pound it into an axe head. Take the axe head back to the woodcutter. He'll go out to chop down trees, leaving the door of his house open.

Go to the dragon's cave. There's a fire extinguisher inside. Get it and return to the woodcutter's house. Go inside and use the fire extinguisher on the fireplace. Now move the hook that's in the fireplace and you'll be transported down to a secret room. There is mahogany on a shelf to the left. Pick it up and take it to the woodworms' stump. Tell them you have it and they'll jump into your hat.

Go to the room at the top of the tower. Use the woodworm on the floorboards. This will let you get to the ground floor of the tower. There's a wedge holding the door shut. Pick it up and open the door.

Go to the druid's house. There's a ladder leaning against the wall outside. Pick it up, take it back to the tower, and use it with the

hole in the floor. Go down the ladder and open up the tomb. You'll be scared away, but come back and open it up again. There is a loose bandage on the mummy. Try to take it and the mummy will fall apart. Pick up the staff it drops.

Go to the back room of the pub. Give the staff to the wizards. Then give gold coins to them to pay the membership fee. You're now an official wizard.

Go to the druid's house. There is a specimen jar on the left side of the upper level. Take it. Go to the Swampling's house. Use the stew with the specimen jar. The Swampling will then tell you he's run out of stew and go to get the ingredients for more.

Go to the screen containing the bridge over the gorge. In the lower left hand corner of the screen are some vines. Go to them and you'll climb down into the gorge automatically. Talk to Gollum. He tells you that he's fishing for food. Tell him that you have genuine swamp stew for him. He'll give you the fishing pole in return. You'll automatically use it to fish the One Ring out of the river.

Go to the goblins' fortress. There is a paper under a rock below and to the right of the door. Get the paper and take it to the storekeeper. Go to the front of the store, leave the screen, and then come back again. There should be a box there now. Open the box and you'll be taken to the goblins' fortress.

Open the box to get out of it. Pick up the rat bone that's lying on the floor. Look at the boxes and you'll see your spell box. Pick it up and look at it. You'll find a piece of paper inside. Use the paper on the door, then use the rat bone on the lock. Pick the paper up again and you'll have the key. Use the key on the lock and open the door. Go to the right. You're in the main cell block. Get the bucket and go down.

Talk to the druid. He thinks you're a demon because he can't see you. Remove the ring and talk to him again. He tells you that he turns into a frog when he sees a full moon. Use the bucket on the druid. Now pick up the flaming brand that's in the brazier and use it on the druid. He'll turn into a frog. The commotion has attracted the attention of the goblins so hide by opening the iron maiden and walking into it.

Days later, the frog will return. Open the iron maiden, then walk over to the frog and take the hacksaw that's in his mouth. Use the hacksaw on the bars and you'll be free.

There is a gnarled old tree high up in the mountains. Talk to it. It wants you to remove the pink splodge on it. Go to the shop. There is a bottle of white spirit to the left of the storekeeper's heads. Buy it, take it back to the tree and use it on the splodge. Talk to the tree again and you'll be told four magic words.

Go to the witch's cottage. She first appears when you try to pick up the broom. If you already tried to pick it up she'll appear the moment you walk in the door. You must now fight a wizard's duel. This is actually rock-scissors-paper played with transformations.

Keep going back into the cottage and playing until you win. You'll get the broom, but the witch will cheat and turn into a dragon. Use the magic word that turns you into a mouse to escape.

Go to the druid's house and talk to him. He tells you that he has a potion for you, but needs a herb called frogsbane to help him with his lycanthropy. Go to the Swampling's house. There is a chest on the floor below the chair. Move it and then open the trapdoor that is revealed. Go down the ladder. You can't go to the right because there's a loose plank. Go to the shop and buy a hammer (it's hanging on the wall to the left of the shopkeeper's heads). Return to the Swampling's house, go down, and use the hammer on the plank. Now you can go to the right and get to Skull Island. On top of the skull is the frogsbane. Get it and go back to the druid's house. The druid will give you the potion.

Go to the row of climbing pins in the mountains. Unfortunately, there's one missing. Go to the woodcutter's house. There is a pin on the table inside the house. Get it and return to the row of pins. Use your climbing pin on the hole and you'll be able to climb across the mountain.

The snowman on the other end won't let you pass. Go back to the torture room in the goblins' fortress. On the floor between the doors and bars is a roll of mints. Get them and return to the snowman. Consume the mints and the snowman will be melted.

Beyond the snowman is Sordid's tower. The bridge will collapse as you get close to the door. Use the broom and it will take you across the gap to the door. Consume the druid's potion. You'll shrink and automatically walk through a crack in the door.

Chippy will take you to Sordid's garden. Pick up the maple leaf lying on the ground. Walk to the bucket and you'll automatically pick up a matchstick. There is a stone lying on the ground near the left edge of the screen. Pick it up and go to the left.

Try to pick up the lily leaf and you'll pull it to the shore. Use the matchstick with the lily leaf. Use the maple leaf with the matchstick. This boat can't get you to the other end of the puddle, though, because the water isn't deep enough. Use the hair you got from Chippy on the tap. Unfortunately, it's caked with rust. Get the seeds that are near the left edge of the screen (you'll take the boat over there automatically). Use the stone on the seeds and they'll be pulped into oil. Use the oil on the tap. Now move the hair and some water will flow out of the tap. Now you can sail your boat all the way across the puddle.

On the other side of the puddle is a frog that will try to eat you if you get too close. Look at the water just below the fisherman's feet. There is a tadpole swimming in it. Pick it up. Talk to the frog and threaten to hurt the tadpole. The frog will leave. Now you can pick up and consume the mushrooms that the frog was sitting on. You'll be returned to your regular size.

Open the door and walk into the tower's entry level. The chest there is actually a monster, and you'll be forced to retreat from

it. The tree in the garden has a branch you can take. Do so, go back into the tower, and use the branch on the chest. It will be rendered harmless.

Go to the laboratory at the top of the tower. The teleporter there could get you out of the tower, but the demons won't tell you how to work it unless you can send them back to the pit. Sordid's spell book is in the bookcase with the monster skull on it. Get it and look at it. You find that in order to send the demons home you must have eight candles, a mouse, a human skull, and know the true names of the demons.

The demons won't just tell you their true names - you're going to have to be sneaky. Go to Sordid's bedroom. If you look at the mirror there, it will tell you that it can see out of any reflective surface anywhere in the world. There is a shield in the entry level. Get it and take it to the laboratory. The center table has a hook on it. Use the shield with the hook. The shield is pretty tarnished, though. There are some chemicals on the table. Pick them up and use them on the shield. Now it will shine brightly. Go to the bedroom, talk to the mirror, and ask to see the demons. You'll learn their true names.

Pick up the pouch and the sock. Use the pouch with the sock. Now use the pouch with the hole at the base of the stairs. You've just caught a mouse.

Go to the entry level. There is a spear hanging in a rack of weapons. Pick it up. Go to the torture room. There is a human skull hanging from the top of the screen. Use the spear on the skull and it will fall to the floor. Pick the skull up.

Pick up the chest. Move the lever. This will raise a stone block and expose the top of another block. Use the chest with the exposed block. Move the lever to drop the block and crush the chest. Move it again to raise the block. Pick up the candles that were in the chest.

Go to the laboratory, talk to the demons, and tell them that everything's ready. They'll tell you how to operate the teleporter and you'll send them back to the pit.

Go to the bedroom. Get the magic wand that's lying on the table below the mirror. Pick up the book lying on the bed and look at it. It will tell you that a wand can only be destroyed by being dropped into the Fiery Pits of Rondor. Go back up to the laboratory, enter the teleporter, and say that you want to go to the Fiery Pits of Rondor.

The attendant at the pits won't let you past because you don't have enough money to buy a ticket. He'll give you some free brochures, though. Look at the brochures and you'll find an elastic band. On the floor near the fire bell is a sapling and a pebble. Pick them both up. Use the sapling with the elastic band to create a crude catapult. Use the catapult with the fire bell and you'll set it off. The attendant will run away, leaving the way clear for you to enter the pits.

Go two screens to the right and you'll see Sordid. The fire system put out the fire in the pit and he's trying to relight it. Use the wand on him and he'll be turned to stone.

The wand must be destroyed in order to free Calypso and the other heroes from its curse. Go back to the souvenir booth. There is a box of souvenir matches on the right side of the counter. Pick them up and return to the pit. Use the matches with the pit and the fire will be relit. Use the wand with the lava and it will be destroyed.

One small problem...Sordid has come back to life as well! He'll try to kill you by wrecking the bridge and teleporting you to the empty space where it used to be. You're a little hardier than he expected, though. There's a bucket of floor wax on your side of the screen. Pick it up and go back to the right. Once he starts casting his spell you'll have a few seconds to use the floor wax on him. Sordid will fall into the lava and be killed. You are a winner!

You will notice an object to the front and right of the door you came out. You cannot move it but you will need it later.

Head off to the bottom of the screen and then go towards the right on the next screen. You will see a machine bringing scrap towards the ceiling. Hop on and wait. After it dumps you, type "STAND" and then type "JUMP". You will be on a cross beam. Go towards the left until you reach the control room. "CLIMB DOWN" onto the grabber and go around the control room. At the screen after the control room screen, stop the grabber and push the button to lower the claw. Pick up the warp motivator with the claw and after it get back to the grabber go to the right. After you go around the turn stop the grabber and lower the claw. You will have to put the warp motivator in the hole in the top of the ship. Ride back to the

control room get off the grabber and fall down the chute.

At the bottom of the chute go to the left where the wire goes into the wall and get the reactor. Climb out using the ladder and head towards the top of the screen. you are now back where you started. Go to the right and go into the tunnel. As you pass thru the tunnel a rat will grab the reactor from you. Go back to the room where you got the reactor and get it again. When you climb out again, take the ladder. Now when you go through the tunnel take the wires and continue thru the tunnel.

Go to the large head and climb in the eye. Go to the ship and use the ladder to get on top and open the hatch and enter the ship. Put the reactor in the hole to the left and then use the wires to splice them together. Get in the cockpit and examine controls. Turn on the engine, turn on the radar, take off, use your front shields and blast your way out.

IN SPACE:

Scan the area. Don't bother with monolith burger or the volcanic world but go to the other one (sorry i forgot its name). Land and go to the tourist trap and enter the building. Examine the postcards as there are interesting facts you need here. Sell your gem. Buy thermal underwear and a hat if you want it. As you leave you will meet a baddie who is out to get you. Don't go to your ship! Instead go to the left of the robot and take the elevator up. When the baddie follows, wait till he is near the gears and then grab the pulley. After he becomes burger go down and get his belt. Leave and go back to your ship and go to the volcano planet.

VOLCANO PLANET:

Put on your underwear and go to the left and wait until the survey team leaves. Get a detonator and the pole. Go in the direction that the survey team left and go up the mountain and drop the detonator in the machine in the crater. When you get to the crossing back to your ship, use the pole and jump the gully. Take off and go to pestulon.

PESTULON:

Use the belt and get inside past the guards. Go to the broom closet and change into the janitor's closet. Enter the accounting area and use the vaporizer on every trashcan you come to. Make your way to the picture of elmo and take it to the copy machine and make a copy. Put the picture back and make your way thru the accounting area to elmo's office. After doing elmo's trash, leave and go to the balcony. When you come back, elmo will be gone and get the keycard off of his desk. Make your way back to the corridor and on the security door use the keycard and then the picture. When you see the jello mold people, push the ramp button and then vaporize the jello.

THE ROBOT FIGHT:

Just do your best, no tricks here.

THE SPACE BATTLE:

Make sure that you get your front shields up as the fighter comes at you and then destroy it when it is behind you. You will have to kill all the fighters as if you miss you will die.

1.73 space quest 4

Complete Solution:

For the first section of the game, look in pages 8 and 9 of your Space Piston book and follow the walk-through provided. When you have followed the walk-through successfully you will find yourself in the sewers. From here:

Sewer Room:

Go to the table and get the jar. Look under the pad on the table and press the button that is there. When the picture show has finished, go to the large contraption to the left of you and turn the handle. The door will open, enabling you to go inside. Do so now. You are now in the sewers underneath Xenon. Move to the left hand side of the sewers and move down. A little thingie will start to follow you. Let it follow you until the bottom screen, wait until it gets near you and use the jar to scoop it up. Now quickly get out of the way and wait until the slime has gone. Go from here to the ladder and climb up. Go to the screen to the left and here you will find a spaceship. Climb into the landing gear.

Main Computer:

Save the game now, in case you muck the next couple of commands up. Go to the right hand screen and a time pod should appear. Quickly get into it. When you are inside, enter any combination you like, but note down what you entered. You might like to try different combinations.

Space Quest 10:

When you land, get out of the pod and walk around a bit. Go left - you will see something down the path, so go back to the time pod and take the path near it. A large bird comes along and picks you up. Oh dear! When your in its nest, wait until one of the evil guards drops in, then search him and you'll find a piece of paper. Go to the hole in the nest and click on it with the Hand icon to go through it. In the next screen you will meet some nice young ladies. Get into the sub. When you get to the hideout, wait until a slug turns up. When the slug tries to eat you, press the button that activates the lasers on either side of the chair. Now get one of the oxygen tanks and shove it into the slugs mouth.

Shopping Centre:

Pick up the card that the girl has dropped, then get on the walkway. Go to the Men's clothing shop and talk to the droid there. When you have your new clothes, pay the man. Next, go to the Mamolith burgers and ask the Pig there for a job. You can do the arcade bit if you want to, but it isn't compulsory.

From here, go back to the place where you came into the shopping centre and get the cigar. Now go to the cash machine, which stands next to the software shop. Use the card you picked up in the machine. It won't work. Now go to the ladies clothes shop and talk to the droid at the desk - she should give you some clothes. Pay for the clothes and go back to the cash machine. Now you can use the card and get some money out. Go into the software shop and look in the bargain bin to get the Space Quest hint book, which should be underneath the other software. Pay for the book and then look at it. Use the stick icon to reveal the answers.

Go from here to Radio Shock and look at the catalogue. Look at the electrical gadgets and go through them until you come to the adaptor for the Pocket pal. Get the adaptor which is at the bottom right of the screen. Now go back to the ladie's clothes store and into the changing rooms. Get dressed. When you have finished, go to the arcade. Go over to the Ms Astro Chicken and insert a buckazoid. Play the game as many times as you want. After a while the game will blow up. A time pod should appear. When a soldier comes after you, just leave the screen and go to the zero gravity skate place. Go to the top of this and wait for the guard to come after you. From here, dodge the guard and go back to the arcade. Get into the time pod.

To work out where to go, take the codes that are in the hint book and type them out. Then type in the code that is written on the piece of paper you found.

Space Quest One:

Go to the bar, where you'll find some nice people. When you've been thrown out, kick over the bikes. Now go back to the bar, but on the way there, jump out of the way of the biker. In the bar, get the matches from the bar table. Now go back to the Time Pod - but you'll have to jump out of the way of the bikers again. When you're in the time pod, go back to the start of the game.

Start of the Game:

Go to the far right-hand side screen. Use the acid on the door lock. When you're in the tunnel, use the matches on the cigar. This should show you where the lasers are. Now go to the Bunny, look at it and take the battery out of it. Put the battery in the computer. Look at the panel on the wall and type in any number you like. The best way to get the lasers in line is to experiment. I found that using 100 each time sometimes works.

When you've managed this, go to the room to the north. You'll now be in the main computer. Wait till the droid appears from the left, then go back to the previous screen. Go back to the main computer. By now, you should have given the droid the slip. Go from here down the left-hand path until you come to another room with a control panel. Now use the numbers given in the hint book to open the door.

Go into the next room. You should now be given a screen with lots of objects on it. Move all the objects onto the toilet, but not the SQ4 one. Now leave here and goto the main computer. If you can't find your way back, use your computer with the sockets that are around the place.

When you get to the main computer to fight with Vohal, Move your man with the cursor keys or joystick. Move to the middle of the platform to fight, and after a while, you should be able to get him into the middle of the screen. When you've done this, go down the ladder. When you come back up, a disc will be in your inventory. Click the disc icon on the disc drive. When the picture of the screen appears, click on Upload beam, then Upload disc, then use the arrows to change the arrow to Roger Jnr and click on Download beam.

You have now downloaded Vohal and finished Space Quest IV!

Wait by the door to the airport and booby trap all doors. When the other spy has got all the stuff, he'll get killed trying to get to the exit - just go through the door which he tried to get through. Pick up the stuff by searching the furniture and escape. If he does get through, just beat the heck out of him and head for the exit.

1.82 The Spy who loved me

Start the game, stop the car and type "MISS MONEYPENNY". You should now have infinite lives and cash. Pressing <F10> will allow you to skip levels.

Complete Solution:

- You are now in the 'artifact'!

*** The Artifact

- Think of it as an intergalactic intelligence test. Put the right blocks in the right holes and win the prize. The artifact is cylindrical in shape, and divided (like a pie) into four wedges, which (like the slots) are color coded. These colors are: red, blue, green, and yellow. These wedges are transected by 5 concentric rings.
 - In short, the cylinder is divided into a sort of circular grid system of rings and colors. (this will be more obvious to you as you move about in the artifact.) Directions are: N,S,E,W,U, and D. Up and down correspond to in and out. East and west correspond to left and right, and also to Port and Starboard. When you enter the artifact, you will be unable to enter the yellow section without being eaten by the grues (which were apparently captured on the planet zork, but who escaped from the alien zoo for the express purpose of menacing adventurers foolhardy enough to travel without light.)
-

*** Collect those rods!

- You can get these in different orders, but the following order will
- definitely work: black, red, silver, yellow, pink, blue, gold, brown,
- violet, green, clear (crystal), white.

* Getting the Red rod:

- It's being held captive by 'ant-men'! To get there:

North, West, Forward, East

- Now, the ant-men will be very nasty if you try to take their rod away.
- so let's keep them busy doing something else - like rebuilding their
- nest, throw something at the nest - the tape player will do nicely, and
- your space suit will also work if you want to bother taking it off.
- Then get red rod. Don't forget to reclaim whatever it was you threw!

* Getting the Silver rod:

- It's on the way to the yellow one, which we really need! From the
- nest:

- the yellow slot to get some of the others. To get to the yellow slot:

- lighting in the yellow section of the 'artifact'. While you're here,
- put the red rod in the second red slot (this will turn on the life
- support system and get that tell-tale windex aroma out of the air in
- a few turns. Later on this will enable you to trade your old spacesuit
- For something truly useful (like a brown rod)).

Get card

- You'll need to put this into the computer - I suspect it's a disk II
- controller card - can't boot up without one!

- one false move and it's deep space for you. To get there:

- Now comes the tricky part: the rod is imbedded in the silver sphere.
 - All we have at our disposal to obtain it is the 4-position dial and
 - the two disks. Fortunately, these are 'transporter disks'.
-

- Unfortunately, they explode into nothingness if you allow them to touch. Anyway, here's the procedure:

Put red disk under globe
Put blue disk on floor
Put card on globe
Turn dial to 4
Turn dial to 2
Get card
Get blue rod
Get all disks
Put blue rod in basket
West
Put blue disk on floor

- You have to put it on the floor here so the 'maintenance mouse' can collect it and put it in the garage so you can transport there (and out of trouble) later!

* Getting the gold rod:

North, North, North, North, West, Aft

- Now you're in the computer room

Open panel
Put card in slot
Close panel
Turn computer on

- It will spew out a gold rod for you

Put gold rod in basket

- Look around if you like, but there's nothing else to do here. The enunciator panel tells you what you have to fix to put the artifact in order, but I'm going to tell you that anyway...

* Getting the brown rod:

North, West, West, South, South, East, East
Remove suit

- Look around or 'wait' or something until the chieftain comes.

Offer suit to chief
Point at brown rod

* Getting the violet rod:

- You have no time to put the brown rod in your basket!
- Follow the chief when he leaves. It's the only way to get the the violet rod! Just keep typing "follow chief" until you get to the 'center of the warren'. Then:

South, South
Put red disk on floor.

- With any luck you'll now be in the garage. If the mouse hasn't
- collected the blue disk yet, you'll be back outside the laboratory.
- You'll just have to wait till he comes and gets it, then transport
- to the garage.

* Getting the Green rod:
Enter bin

- Keep typing "again" until you find the green rod.
- It may take up to 10 tries.

Get green rod
Put green rod in basket.

* Getting the Clear rod:

You've got all the rods now. All you have to do is figure out why
you've collected them.

*** Finishing Up

- A black slot will appear. Do not put the black rod in the black slot!.

* Getting to the control bubble:
Out
Up
Jump
Fire gun at drive bubble
Again

- Your location should now be 'on control bubble'

Down

Put gold rod in gold slot

In

Put clear rod in clear slot

- Five colored slots will appear
- Put the appropriate rod in each slot - the order you do it in
- doesn't matter.

*** The final sequence:

- You now use the various colored spots to set the course of the artifact
- toward earth.

Touch large square (The view now covers the area from the sun to Jupiter)

Touch brown spot (You will have to touch it four times, until the earth is highlighted)

Touch violet spot (Three times, until the path forms a circle around the earth. Don't stop at the ellipse!)

Touch green spot (The path will flash)

Touch blue spot. (Blast off! You win!)

Now you can sit back and bask in the glory of a perfect score.

Crate of Castrobars

First get a petrified tree from Enos and take it to the depot on Castron. You will automatically get the Castrobars.

Vistan Wine

Nip over to Vista. The wine is scattered all over the surface.

Flat Diamond

On Vista have a good look around. Somewhere you'll find a hole in the ground spurting out Flat Diamonds. Tractor Beam one of 'em.

Cluster of Nodules

These can be found on the Surface of Dante.

Asteroid

Get one of these in the asteroid belt between Millway and Apogee.

Egron Mini-Rocket

This can be found on Aldos. It takes a bit of a search but it is definately there!

Nuclear Fuel

This can be found lying about on Aldos.

Rock

This is lying on Q-Beta.

Professor Taymar

He's driving an Emma 2 on Broadway. Emma's are pretty speedy, so it may take a bit of time to trap him in your tractor beam. Don't carry

Castrobars when you try to catch him!

Here is how to complete the game once you have a Neutron Bomb:

Fly to one of the moons of Millway. Drop a bouncing bomb on a station there and head into a tunnel. Pick up four missiles and fly to Q-Beta. Just next to Q-Beta is a hologram. Fly into this and you will find a Space Station and 8 mini sentinels. Blow away four of them & fly back to Apogee to refuel. Fly to another moon of Millway and get four more missiles, drop a bouncing bomb on a station. Pull down so you are facing the Space station and bombs away. It should hit and you'll have finished the game !

1.121 suspended

Complete Solution:

```
Poet Go to Weather Control
Sensa Go to sub supply room
Whiz Go to secondary channel
Sensa Take ramp
Sensa Go west
Sensa Take container and grasper
Sensa Go to hallway junction
Waldo Go to hallway junction
Auda Go to gamma repair
```

The above moves set the game up. Poet is needed to turn the weather control off - this minimizes deaths at the surface (your primary goal). sensa gets the ramp that is needed to allow the robots to go from one

level to another. Auda is sent to the gamma repair area because she will be needed later, and without the humans coming for a while there is nothing that can be done with her anyway. Waldo is sent to the hallway junction to meet Sensa and take the container and grasper on his way to fixing Iris who is reported to be out of order.

Poet Turn second dial to 100
Poet Go to hallway end
Iris Go to main supply room
Sensa Put ramp at dropoff
Auda Listen
Waldo Take container and grasper
Waldo Go to main supply
Waldo Install grasper
Waldo Take red ic and yellow ic
Sensa Go north
Sensa Take ramp

Once Poet got to the weather control, he had to reset the faulty control to 100. This is only a temporary fix because if you let the game go on too long, all hell will break loose with various disasters and accidents occurring which you will not be able to control. Poet is then sent to the hallway end where he will be used to get the TV camera needed later.

Iris is sent to the main supply room where she can be fixed when Waldo arrives. She will also help Waldo repair the machine there.

Sensa upon arriving puts the ramp in place so that Auda can get to gamma repair and so that She and Poet can get to the other level. Waldo is handed the grasper and container which he installs. This is done now to save moves later.

Sensa Go to small supply
Waldo Open panel
Waldo Replace rough device with rough object
Waldo Close panel
Poet Get in car
Poet Get out of car
Poet Go to biology lab
Waldo Take burned and fried chip
Poet Take camera
Sensa Put ramp at holder

This stage sets the robots to their major gathering tasks. Waldo has fixed Iris, and is now set on fixing the machine and salvaging its parts. Poet has arrived at the hallway end, gotten in the car, exited the car and is now getting the camera. Sensa has arrived at the small supply room to take the cable cutter.

Sensa Get on ramp
Sensa Take cutter
Sensa Get off ramp
Sensa Take ramp
Sensa Go to sloping corridor
Poet Go to vehicle debarkation
Waldo Put red ic in red socket
Waldo Put yellow ic in yellow socket

Poet Get in car
Poet Get out of car

Sensa has completed her task of getting the metal tool that she will need shortly. Poet has gotten the camera and is now coming back and Waldo is in the midst of fixing and salvaging the machine with Iris in the main supply room

Poet Go to primary channel
Sensa Put ramp at dropoff
Sensa (I think) Go to gamma repair
Waldo Push button
Iris Take fuse
Waldo Take cable
Waldo Go to the secondary channel
Iris Go to middle supply
Iris Take cable
Iris Go to main supply

Poet has been sent to use the camera in the primary channel (this is a kamikaze mission because he has to pass through the cavernous room to get there). Sensa has gotten to the sloping corridor and reinstalled the ramp so that She and Poet can get to the lower level. Waldo and Iris have gotten the machine fixed and salvage one of the two needed cables to set the fcs in balance.

Waldo is now sent on a kamikaze mission where Whiz will be waiting to install the cable needed in the secondary channel.

Sensa Examine object
Sensa Turn flowswitch
Both Sensa and Auda Move Fred
Sensa Cut cable with cutter
Poet Plug TV1 in
Poet Aim TV1 at sign

This is the important reset code so write it down - it's different every game!

Sensa Take cable
Sensa Go to primary channel
Iris Put cable in machine
Iris Put fuse in machine

Sensa and Auda salvaged the remaining needed cable to fix the cable in the primary channel. Sensa is now on her way. Poet valiently died trying to work the camera in the primary channel after having corrosive acid spilled on him. Iris has fixed the reset machine now only awaiting the installation of the cables in the FCS to reset the systems to set the surface world above right.

Whiz Go to waldo
Whiz Take fourteen-inch cable
Whiz Replace the nine-inch cable with the fourteen-inch cable
Whiz Drag Waldo to the east end
Auda Go to sleep chamber
Sensa Replace four-inch cable with twelve-inch cable

Iris Press ----- circle
Iris Press ----- circle

At this point the game is over, only 8000 are dead and you have succeeded in your mission. It should be noted that this does not answer all the questions and puzzles that are presented in the game it just tells you how to win the game in the shortest number of moves.

The game needs a joystick in port 2. Press the firebutton to be shown the player and level number, and press it again to begin play. When playing: not all bad guys can be killed; the time bar near the bottom of the screen decays slowly, but decays faster if your craft is touching an Anti-Time block; the craft begins with a supply of 20 shots; up to 3 shots can be active at once; you begin with 3 lives; keep going until the craft can go no more, then the level will end; a bonus is awarded according to time taken; you can skip the bonus countdown by pressing the fire button; there is a high score table which you can get your name on if you are good enough. The properties of the magic yellow stars vary.

The Codes for CHROME are as follows:

1 START	5 CLOUD	9 PAPER	13 APPLE	17 AUDIO
2 TRUTH	6 MOUSE	10 EARTH	14 JUICE	18 LOGIC
3 JELLY	7 HUMAN	11 SPACE	15 CHESS	19 TITLE
4 STORY	8 FLOOR	12 GENAM	16 WORLD	20 VENUS

On the CHROME title screen, type "HELO TO GORDON AND DAVEE". Start the game and you will be invincible.

1.126 sword of aragon

*** Starting Out

The Ranger is the best man to have as your leader because the characters he comes with, (mage, priest, warrior and two rangers) give you the chance to build up your mage from the very start, and letting you get to those mega powerful spells like Pyro and Disintegrate really quickly, thus being able to do much more damage in battle, and from a distance where you can't be hurt.

Also, decommission all your troops at the very start and reinforce your bowmen, as these are by far the best men to have as they can attack armies without having to engage with them, and save a lode those precious hit. Infantry and mounted cavalry are not a very advisable because they always take a lot of damage and take too long to get to the higher levels.

If you really want to have a few armies with melee weapons then go the whole hog and get some cavalry. These blokes can take a hell of a lot of stick and still come out almost undamaged; at higher levels they can totally decimate the enemy.

Remember to keep an eye on how your cities are doing, but don't spend too much on development. The best thing to do is save the same before you go to the next month. That way if anything nasty happens you can reload it and try again, thus avoiding the situation. Not all the cities have to be taken by force, and if you can get one to become your vassel it guarantees you a profit each month from that city.

*** Decisions

Muscle isn't the only thing you're going to have to use. If you want your people to stay loyal you'll have to make the right decisions. The man Olaf who's up for murder is innocent and should be pardoned. When the Elven diplomat arrives and asks you to stop developing the lumber do as he wishes and become allied with the elves. Pay ransoms or the people's morale will go down.

Trolls will sometimes demand money from Sur Nova, but if you take your forces to the Troll's village and capture it, you shouldn't have any more problems. The Nomads don't give you many problems if they become your enemy, but become their ally anyhow just to be on the safe side.

*** Unknown Cities

There are a quite a few unknown cities in the unexplored lands of Aladda, some of them friendly, most of them evil. Below are a small guidelines on what to expect from these mysterious places and their inhabitants.

- Tranavan: City Of The Elves

Depending on how diplomatic you've been this place could be either hostile or friendly. But if you've followed the tips you won't have any problems.

- Gernok: City Of The Goblins

This place is filled with goblin forces plus a few rather nasty looking monsters with magic capabilities, but it's not too hard to beat them. However, remains of the Goblins will come back after and try to win back the city.

- Xafanta: City Of The Dwarves

These chaps are having quite a few problems with the orcs of Zarnix, and they will help you defeat the orcs in the pass just before Zarnix.

- Medeval: City Of The Elves

This is yet another city full of Elves, however, unlike the first city the Elves aren't so nice and are pretty tough cookies.

- Char: City Of The Giants

This is where those big nasties hang out. Defeating them is quite a problem, but with a few cavalry to aid your bowmen you should be able to capture the city. A good reason for taking this city is that the giants have control of a lake near to Tentula, and once you've got it back the city's income should increase a little.

- Troll Village

If you're looking for a tough battle then this is the place to come. There are tons of Troll and you'll need a lot of men to defeat them. You'll also lose a lot of men in the process. This should stop any ransomed demands from the illiterate Trolls and make life a lot easier.

- Dersh: City Of The Titans

Dersh is probably the last unknown city you'll come to, and it is by far the hardest. A huge number of men will be needed to take over this city, and nearly all of them will be lost in the battle.

"BEST" Gives you the best players
"FREE" Enables managers to buy your players free
"POOL" Saves European pool to disk

"PROM" Last season's promotions and regulations
"MEMO" Show available memory
```

These last couple are activated by typing them in on the main screen without typing "CODE".

"EDIT" to enter the full editor. Now press <W> to enable you to manage any team. A small green and yellow strip should appear just along from the LOGO and AUTO icon things, under the second logo space. You can now go to the Manager's menu and JOIN any club. Your rating automatically jumps to that of the new team, unless you are joining a lesser club.

Finally, if you want to alter teams because of transfers among Premiership and Division 1 teams, to maintain more accurate club records, instead of creating a whole new player in the editor, it is best to make yourself the manager of the club who bought the player, enable "FREE" transfers, and transfer the player that way. This means the player keeps his original ID number.

For example, Paul Furlong was bought by Chelsea from Watford, so to enable this change, simply become Chelsea manager, enable "FREE" transfers, and approach Watford.

1.133 target renegade

On the high score table enter your name as "PA...." for infinite lives.

1.134 tearaway thomas

You can stop the timer by typing "TIMEFLIESLIKEABANANA" at any time.

There is a secret level located on level 1.3, and can be found by climbing

up to the ninth branch of the tree (which is the one with the birds on it) and running off the end. You then will be whisked off to a room containing some diamonds which can be collected for extra points.

At any time, type any of the following: (screen will flash to let you know if it worked.)

```
"NORMAL"      Disables all active cheats
"LIFE IS TOO SHORT" infinite lives
"IRON MAN THOMAS" invincibility
"ANY LEVEL"   Activate stage skip
               (<CURSOR DOWN> to advance level, <CURSOR UP> to go back)
```

1.136 teenage mutant hero turtles and ... ninja turtles

On the security code entry area, enter the code "8859" and press <RETURN>. Then enter "1506" and press <RETURN>. Now enter the correct code. <HELP> now toggles invincibility on and off. If you lose a turtle press <HELP> to restore each turtle to full strength, even the dead ones.

1.137 terminator 2

While playing, pause the game, press <F1>, <F2>, ... , <F10> and <FIRE>. Now press <ESC> to skip a level.

1.138 terminator 2 - the arcade version

When the game has loaded select your control method at the options screen as usual. Instead of going to {Start Game} press <ESC>. Wait for the high score chart with the picture of the T-1000 to appear. As soon as the last digit is printed on the high score chart (the last 0 on the 10000, in 10th place), click <LEFT MOUSE>. Note you must click the button 0.19 seconds after the last digit on the high score chart has been printed on the screen. If you take longer, or click before the last digit is printed, the cheat will not work, so precise timing is required.

If you find this difficult there is an alternative. Hold down <FIRE> or <LEFT MOUSE> at the high score table until it is finished. This won't

always work though.

Go back to the options screen. If you can see the picture of Arnie, but no options are displayed, then the cheat worked. Click <LEFT MOUSE> to move on. Click again to skip the high score display. If you allow the high score chart to be printed again the game may mess up. Start the game.

If you didn't get it to work restart the whole procedure.

Once you've started playing you'll notice that a gunpowder and energy reading is displayed for player two even though he isn't active. Now pause the game (press <P> not <F1>) and type in all the function keys in order <F1>, <F2>, <F3>, <F4>, <F5>, <F6>, <F7>, <F8>, <F9>, and <F10> and you should skip the level you are presently playing. This cheat is for one player only.

1.140 terry's big adventure

On the first level go to the right until you come upon three mushrooms in a row (The first mushrooms you will see). Get the first mushroom, jump over the 2nd one and get the 3rd one. Now continue to the right until you reach a section with two special weapon power-ups that are next to two mushrooms (right before the first bridge and there is a cloud above them). Stand in front of the first power-up and pull down to take it. Now jump over the other power-up and the first mushroom. Get the 2nd mushroom. Work your way past the bridge until you come to the next tree in the background and stand in front of the tree. Now push <FIRE> and push up on the joystick. The screen should flash yellow letting you know it worked. Finally press <C> for invincibility and press <N> to advance levels.

NOTE: If you die before you activate the cheat you must press <RETURN> to abort the game and restart. Also, you can pick up all the mushrooms and power-ups between the sections.

1.141 test drive

Holding down <FIRE> while going round corners will prevent you from sliding and hitting the walls.

To get a highscore without playing the game:
Load a wordprocessor, and load the "highscores" file, and edit it, then resave it. Note that the highscore shouldn't exceed 99,999 and the name musn't be more than 15 characters.

To change the car, load the highscores as above, and use any of these codes (They must be in lower case):

p911t Porsche 911 Turbo
 vette Corvette
 lotus Turbo Esprit
 rossa Ferrari Testerosa
 counta Lamborghini Countach

Start the game and hold down

<FIRE>, <ALT>, and <C> for infinite lives.

<FIRE>, <ALT>, and <L> to access any level any time.

Only use one of them.

1.142 test drive ii - the duel

While playing type in "GAS". The sound will go off. Now press <S> to get the sound back on again, and you will suddenly be about 10 metres from the target gas station. Press <T> now for real time and score.

If you do this before you even move it will work, and you will have an average speed of about 3300 mph. However due to the way the scoring system is done, if you have a speed that is this high, you will actually score negative points. This brings your score down! So do this cheat somewhere in the middle of the stage if you want to achieve maximum points.

1.191 ufo - enemy unknown

After playing the game for a while and building up your stores save the game. Now quit the game and go into your current save game directory and make a copy of the base.dat file. Now boot the game back up and sell everything you have (if you need money) or transfer stores (not ships or personel) to other bases. Now save the game again and quit. Next replace the base.dat file with a the copy of the original that you made earlier. Now when you go back to the game you'll have all the money from the sales plus all the equipment you sold. And, if you transferred anything those items will arrive shortly. Continue the above procedure as often as you like.

Your will be able to use alien weapons even though you did not collect the technology from them, however you will have to Research the alien weapons technology. Same for UFO construction. You will have Acess to researching all availlable (or most) UFO ships and Alien life forms, including researching the cyclona bust (or whatever) which will enable you to go to mars and beat the shit out of the alien base. only an avenger can fly to mars..and equip your players with fusion ball launchers and the most destructive weapons available for mars..no stun..just kick arse!

In order for the Cheat to work..you must FIRST construct all 3 bases on earth. Try to spread them out wisely!

Once you have done this, save your Game and use a file-editor to edit the file.

change all the values to FF ex:

```
ffffffff ffffffff ffffffff ffffffff
ffffffff etc...
```

078 to 0F8 (Full Weapon for Base 1)

0F9 to 135 (Full Weapon for Base 2)

136 to 172 (Full Weapon for Base 3)
 248 to 257 (Get all Jets and game Solution ??)
 2E0 to 2F3 (Collect all alien life forms ?)

314 to 317
 The Value for money must be set to 3B9AC9F8 for 999,999,999 dollars US.

The awesome thing about this hack is that you also get to research and build all the advances buildings such as psionic lab and fusion ball befences etc.. early in the game!!

Also..after changing all the weapon values, you only need to manufacture one of each item, and your inventory will indicate yu have 255 or 226 of these items! (Although some items may be in the research window..they might already be avaiilable i.e.:Flying suits!)

Best of all..you get a shit load of elyrium !!!!!!!!

One draw back is that I was not able to find out the location for the UFO power source and UFO Navigation. Once you get these from a mission, I am not sure if these items will go to 256 (items) or you might have to re-edit the save game file to update/refresh your FF's.

Weapon storage buildings are not necessary when using the cheat..although it might help to build 2 or 3 of them.

One problem is the fact that your bases will have 255 scientists and 255 technitians (or whatever, can't remember their title). so you will not be able to purchase soldiers in bases 2 and 3 until you build enough Living space for all the 255 scientsts and other dudes and the soldiers themselves. you can try selling Scientisis etc to make space.

A Formidable ship is the Avenger with Fusion ball launcher/Ammo!

NOTICE: When editing, be sure to have the Current sector and ending sector at the same location, and above all..backup your save game file.

1.193 ultima 3

Visit lord British to get extra hit points of up to 550. There won't be any sea monsters if you own two ships. The moon gates open about every seventy to ninety moves.

1.194 ultima 4

The candle of Love can be found in the township of Cove. You can find the altar rooms in level 8 by peering at a gem and searching each room. The secret passage can be found in the chamber of ANKH.

1.195 ultima 5

You can fight for money but don't steal food. It can be bought in Moon-glow. Look in the chambers of Lord British for the magic carpet. The cities and shrines are almost the same as Ultima 4. You can find people in every town who know the passwords to the dungeons. You will need to get an item from Empath Abbey to climb the mountains before completing the game.

Starting Off

When first starting the game you will find yourself in a hut in the middle of a thick forest in the NW of Britannia. Before you leave this hut have a good look around, not only inside but outside. Find the horse and talk to him. You should save your game before you venture out into the wilderness this will save you having to go through the stuff at the start again if you happen to get killed. I recommend that the first place you visit is the Castle of Lord British. Getting there should be simple since now you know where you are. Just make your way East to the Dragon Spine Mountains and then follow them south until you find the way through. This appears on your map as a plain brown area. Save your game along the way incase you run into some monsters and get killed.

Exploring and Mapping

Again in this type of game accurate map making is very important, map everything, Towns, keeps, lighthouses and especially dungeons. Mark in all doors, secret doors, traps and ways up or down. And label things like Inns, taverns, Guilds, Apothecaries, pubs, shipwrights etc. Some

times it will be necessary to visit one place more than once so if a certain person tells you to get a piece of information from somewhere else then make note of where he or she was so you don't have to go searching again when you return. Once you have found a Sextant (and there is one to be found) make a list of all the localities and their grid references, it will help. You will notice that there are a lot of inscriptions or runes around the map. Make an effort to translate all of them into English, you will need to know where some key locations are later in the game.

Finding Your Party

Unlike other Role Playing Games in Ultima you must find your party and not create it. Since Ultima IV (Quest Of The Avatar) the rest of your party have gone on to live there own lives and do other things, you will come across them in your travels and you should allow them to join you once again. If you are new to Ultima you of course won't know who I am talking about, when you come across them they will recognise you. But I will give you a list of all of them and where to find them,

Jana Secret passage under the town of Yew
Mariah The Lycaeum
Katrina New Magincia
Gefory Buccaneer's Den
Dupre Bordermarch Keep

You may only have six characters in your party at any one time so you must choose who you will have.

Dungeons

Some of the dungeons you will delve into are very intricate, accurate mapping is a must. I don't find it necessary to map dungeon rooms, I just represent them as a square with an 'R' in it. If the room contains a way up or down I just put a little up or down arrow in the square. Some rooms will have secret panels that you must push or walk over in order to open up other parts of the room. Sometimes you may have to throw something like an axe in order to activate a panel, or open a door. It's a good idea that when you have defeated all the monsters in the room to walk around a bit and push things in order to see if there are any secret passages. A good guideline to follow is that if the word "Victory" doesn't appear when you have killed all the beasties there is something more to do.

Combat

Get into as much combat as you can. The more experience points you have the more levels you will gain, and the stronger you will become. What's different about the combat system used here is that the character who kills the monster gets the experience points, instead of everybody getting there share. So try and give everybody there share of kills, so you won't have some characters falling behind in levels. Having a mage that can cast spells from the 8th circle is a must, spells like Cone Of Energy really come in handy in the latter stages of the game. Although getting to the 8th Circle takes a long time. Don't keep weapons that are of no use, sell what you don't want.

The Underworld

The Underworld is a big place and you must go there a few times in order to recover certain artefacts. I always used a different save disc when I visited the Underworld, it's a very hard place to map and you will get a lot of combat practice. Getting lost is very easy to accomplish, so take plenty of magic gems with you. You will also notice that there isn't much light in the Underworld so make sure that you have plenty of torches and enough of the appropriate reagents to mix a lot of Vas Lor (Great light) spells.

1.196 ultima 6

For those of you that haven't found the magic method of travel in Ultima 6, holding <ALT> <2> <1> <4> will bring up a prompt (in Gargoylian) for three coordinates - these three hex numbers will bring you to any location in Britannia, the dungeons or the Gargoyle world. This is apparently the programmers method of travel and is faster than a fan powered Balloon!

The three numbers are basically the x,y & z coordinates for the map, with 0,0,0 located at the upper left corner on Level 0 (Britannia). For this discussion, I will use the form x,y,l to describe this coordinate system. The first two numbers (x & y) increase by 1 for each move in the horizontal or vertical direction. The x coordinates begin at the left edge and the y coordinates begin at the top. The third coordinate (l) represents the level; Britannia is Level 0, the dungeons are levels 1 thru 4 and the Gargoyle world is Level 5.

<ALT> <2> <1> <4> is entered on the numeric keypad. Each coordinate is entered separately, ie, press <RETURN> after each one.

<ALT> <2> <1> <3> this gives the Gargoyle coordinate for your present position plus a free view of the map - forget all those gems and peer spells! It returns a 13 digit number, the last 7 of which are the coordinates. The first 6 are related to the total number of moves you have made. For the example above, the number would look something like: 79000029D0430 or 790000 moves and coordinate 29D,043,0.

BEWARE: You can land in a real 'snake pit' with some of these locations. Always be prepared for the worst when teleporting to a strange location.

1.216 voodoo castle

A rabbits foot is great for good luck in the lab.

1.217 voodoo nightmare

This hint will make the game somewhat easier to play. You have probably noticed by now that all the nasties go to sleep at night. When you pause the game, the day/night timer still runs. Thus it is possible to play only during the safe night periods, and pausing the game during the dangerous daylight.

If you're cursing Voodoo Nightmare, here's how to obtain the last few pins to help you to destroy the Witch Doctor.

1.232 wings

Each letter of the word WINGS on the main title screen does something. Hold down <RIGHT MOUSE>, now hold down <CTRL>, <LEFT SHIFT>, and <LEFT AMIGA>. Now click on a letter with the Left Mouse Button. The effects are:

- W Toggles music on/off
- I Turns <CAPS LOCK> into an autofire button
- N No flight school missions
- G Guess (Dunno what this does!)
- S Saves game without having to exit game

Alternatively, go to flight school, and click on the bullseye on the plane up the top of the screen with the Left Mouse Button. You will be taken back to the main menu. (some versions may ask if you want to quit - say no!) Now return to flight school if you have to, and create a new pilot and call him "Orca The Killer Tomato" (it IS case sensitive so type it in exactly as it appears here). Orca already has his wings and is the best at all the skills.

To access a large menu of options, go to flight school, create a new pilot and name him " Who is The Riddler" (yes, two spaces at the front and it is case sensitive). But, instead of pressing <RETURN> to enter the name, hit <ESC> instead. Now you can choose to run any or all of these yummy cheats!

BALLOON BUSTING- The first thing to do in Balloon Busting missions is to take out the AA gun. It isn't too hard so give it a try.

DOG FIGHTS- When involved in a dog fight with other planes always attack from above. This is because if you attack from below the other plane will climb which is very annoying. By attacking from above you drive the other plane down rather than up.

BEING TAILED- When you are being tailed hold the joystick to the bottom-right. You should turn off to the right and out of the other planes line of fire.

1.233 wings of death

Type "SPELLBINDER" on the mainmenu. If you start the game now, you'll get a requester which lets you choose any level. You'll also be able to select weapons with the function keys.

1.234 wings of fury

Type "COLIN WAS HERE" to activate the cheat mode (A message will scroll across the bottom of the screen if it worked), now use the following keys:

- <P> Gives you 9 planes
- <C> Change your weapon

<M> Gives you 99 items of the weapon you are using
 <D> Immunity
 <F> Refuel
 <R> Adjusts your weapons

This cheat doesn't work if you play Wings of Fury on an Amiga equipped with Kickstart version 2 or higher (but if you use the Kickstart v1.3 emulator it works fine).

1.235 winzer

In the city you should go inside the advertisement-agency, turn on the European TV and then turn all the numbers to 9's. This will give you a lot of cash.

1.236 witness

There is nothing you can do to stop the murder taking place. Make sure that you examine the keyhole of the clock closely. A good hiding place is the couch. Ask Duffy for hints - he can be quite helpful. Search the Butler after the crime.

A secret room on the first section will warp you to any level in the game. Simply buy the token from the shop and exit as the body. Now go down the well and enter the Gents toilets. Use the token on the bubble gum machine and you'll fly up to a secret room with another Gents toilet door and an exit. Go through the Gents, then you'll appear in a room with a Ladies and Gents door. You can avoid killing the traveller on the bridge by looking at the water and closing your eyes. In the caves, throw the flint to get past the skeleton. In sections which require you to beat the clock, hold down the fire button to qualify in under a second.

1.247 wwf 2 - european rampage

Tap <F10> ten times during play to freeze your opponent. You can now beat them up as much as you like, but try not to knock them down as you won't be able to get them back up.

1.248 wwf wrestlemania

Go outside the ring and pick up the steel chair. Now hold down <FIRE> and move around with your opponent and you should be able to wollop him with the chair and drain his energy. Now all you have to do is pin him down in the ring to win.

When you are about to go into a joystick waggling battle, follow these steps:

A Pause the game.

B Plug the mouse into the joystick port you are using.

C Unpause the game, and move the mouse rapidly from side to side.

(This will enable you to waggle quicker than your opponent)

D When your character has won the move, pause the game and plug the joystick back in.

Repeat this whenever you get into a grapple.

Place the chair outside the ring (next to the bottom left turn buckle) just up a bit. Now jump into the ring and you should have the chair.

Climb up on to a corner post, and instead of jumping into the ring, jump the other way. Weird gravity!

Pause and type "HULKHOGANWEARSTIGHTYELLOWKNICKERS" and then unpause the game. The fight will then finish with you as the winner.

During a two player practice game, get 1 player to climb onto the top of the top left turnbuckle, then get player two to be as close as possible to him. Player two should drop and kick the player, then he will turn into a "ghost". He can pick up the chair and take it into the ring. Press <ESC> then compete for the title, and the chair will still be there.

In the shop, buy the most expensive ship (white bug-shaped ship) and the cheapest satellite (single orange coloured laser), then with the satellite, click on the box that displays your current money level, and it will now change to 500,000.

Insert the disk, and hold <BOTH MOUSE> until the title screen appears. When you're in the shop hold down <HELP> and for a few seconds, now choose your ships as normal, but you have infinite energy.

To get more cash at the beginning of the game, select the smallest ship (the one at the top), then the weediest laser (the orange one with single beam), and place it on the shopkeepers nose. Hit <FIRE> to get the cash boost!

1.254 xybots

Get a high score and enter "ALF" for your name. Now you have unlimited lives.

If you manage to reach level 10, you're better off using your radar to kill the xybots. Just line them up using radar and fire, you don't have to be able to see them.

Keep as many keys with you as possible because some levels don't have enough to complete them.

There are short cuts to level seven on levels one and four - you get extra cash for using them.

If you have the extra energy upgrade try not to let your energy fall below 100m, because you lose the upgrade if it does.

Drums are not just decorations - hide behind them when possible and use your zapper near to them to find more cannon power on level eight, near to the top left hand transporter you can get to two white coins by blasting away one of the three walls around them.

Don't split up in the two-player game, because it's easier to complete it together.

The master xybot lives on level 11, and you'll need to stock up on double shot and extra shot speed to stand a chance of survival.

Try to get one xybot to stand behind another - they'll blow each other apart.

On level eight, near to the top left hand transporter you can get to two white coins by blasting away one of the three walls around them.

1.255 yo! joe

During play, type "WELTRAUMKAKALAKEN" for all the weapons and to activate the following keys:

- <J> Add lives
- </> Subtract lives
- <Y> Advances levels
- <SPACE> Transports you to the end of the flying level
- <S> Press repeatedly while paused for slow motion

1.256 yollanda

On the high score screen, type "SKID ROW". I'm not sure this does anything other than put {18 and life} as your name on the high score table.

At any time, type "QUIDITY" and use the following keys:

- <SPACE> Skip levels
- <HELP> Toggle infinite lives
- <F4> NTSC video mode
- <F5> PAL video mode

If the game ends or you reset the game by pressing <F1> you will have to enter the code again.

1.257 yosemite sam

Enter your name as "BUGS". This gives infinite energy, press <F1> to go to a sprite editor (there are some already on the disk).

1.258 z-out

While playing, press <J> and <K> together for infinite lives. Then hold down <J> while pressing one of the keys from <1> to <8> to be taken to the respective level.

You can then press the keys <1> to <3> on the numeric keypad to skip to the three different stages on that level.

1.259 z-out - a.k.a. warzone

Press <J> and <K> simultaneously for infinite energy. Then press <J> and any number between <1> and <6> to skip levels, or <1> and <3> on the numeric keypad to jump sections.

1.260 za zelazna brama

During play type any of the following:

"PRYSZCZ CI W OKO"  invicibility
"LENINJESTWIECZNY" Top of life meter
"ILE WOLNEGO RAMU"  ?
"TRYBUS SPECJALUS"  ?
```

If you type the last one in and the screen turns to garbage press <RETURN> to get the screen back and use the function keys while the screen is screwed up to alter the screen (sort of like the <m> and <n> keys of the Action Replay freezer).

1.261 zany golf

To get to the secret level, make it to the last level (energy), and find the mouse hole where two eyes appear occasionally. When the eyes turn red, putt the ball into the hole to warp to the secret level, apparently called "Mystery".

1.266 zombi - ubi soft

If you have seen Dawn Of The Dead, you already have a good idea on how to solve most of the puzzles. But here's some extra tips anyway:

- 1) To lock up the mall to keep zombies from getting in, you need to park the trucks over the entrances. Get the key from the office on the 2nd floor and go to the 4th floor where the keys to the trucks are kept.
- 2) To keep the dead zombies from coming to un-life, lock them up in the freezer in the basement.
- 3) before you can go play in the basement, you need a source of light. Get the fuses and gloves from the 3rd floor and go to it!!

Partial solution:

Go to level two and take the keys from the office. Take the lift to level four and use the keys to enter the control room. Drop the keys and take the three truck keys. Go down to level one, and move the trucks in front of the entrance. This will stop zombies from entering the mall. When all three trucks are blocking the entrance, leave the character inside the truck - he can't be killed while he's there. Get the gun from the shop on level two, and shoot the zombie in the head. When it is killed, put the body in to the lift.

1.267 zool

If you wait for the second title page to appear (the one which says press fire to play) and you type in the word "GOLDFISH", you will activate a special cheat mode. Pressing any of the first five function keys will transport you to that world, and hitting <1>, <2>, or <3> will take you to the requested stage. Make sure you select the desired level before you press fire to start. In game use:

- <1> Will make zool invincible
- <2> Advance to the next section
- <3> Skip to next level
- <4> Removes invincibility

For a bonus zone on level 2-2, play these notes on the first piano:
Brown, Yellow, Red, Orange, Green.

Try any of the following for various messages: "ADE", "TONY", "GEORGE", "GREGGS", "PAT", "SIZ", "SYD", "CASSON", "SHORTIE", "MICK", "PAUL", "RITCHIE", "ASH", "MARK", "BERNI", AND "HILEY".
