Back Door V2.81

Compiled By:
Stephen Birmingham
03/09/94

WELCOME:

Welcome to Back Door
V2.81

(the ultimate cheaters guide).

Yes, as you've probably guessed by now it's a database full of level codes, cheat modes and playing tips etc. Not another one I here you cry. Well, the difference between this one and the many others available is that this contains some of the most recently released cheats modes

available. There are even some cheats in this database that have never been printed before, Just have a look for yourself. Any how, most of the other databases are just growing old and collecting dust having not been updated for some time. This however, will not be the case with back door.

DATA:

To save confusion all the cheat modes/codes are in capital letters and are in 'quotes'.

Some of the codes/cheats in this file have harsh and abusive language, but don't worry, you will be well warned when this is the case.

BABBLE:

Back Door is public domain so please spread it around as much possible. I have included the latest version of D-Copy on this disk for you to do this. To gain access to D-Copy just quit this database and workbench will then load.

Stephen Birmingham

1.31 Version History

- V1.00 - Game Cheats as it was originally titled was just a small collection of cheat modes which was configured around the text reader PPMore by Nico François.
- V1.XX - Version history to long, cut to V2.00.
- V2.00 - Converted file to be viewed through MultiGuide from CBM. Changed database name to Back Door, also the version number now represents the number of games covered in the database.
- V2.22t - Back Door now viewed through PPGuide. Contains codes, cheats and tips for over 200 games. First public release (test version).
- V2.81 - Various cheat modes added and some stand corrected. New Layout.

1.32 Address

If you have any level codes, cheat modes or playing tips that are not in this database then send them to me and I will gladly add them.

Please make sure you are sending me the wright information as I don't want to enter any incorrect data.

Also If you have noticed any errors of any kind in this version I would be very greatfull if you would let me know, or even if you just want to

contribute to this database in any way, then write to me at:

1.35 Help

MENUS:

The Main Menu is quite simple to understand. If you are searching for a specific game title for which you want help with then you can either click on the Index button which can be found on the second title bar or click on the appropriate alphabet gadget. If you choose to click one of the alphabet gadgets then a second menu will appear listing all the games covered for that letter. If the game you want help with is not listed then you can Retrace back to the main menu. However, if it is listed then clicking on it will bring what information I have gathered for that game, e.g. level codes, cheat modes etc.

DATA:

If for some unknown reason you are having trouble correctly operating a cheat mode it could be because:

A: If a cheat mode is in capitals then try it in lowercase and vice

versa. Also, if you have been told to type it in on the title screen try it on the high score table, during play or even when the game is paused. I think you get the general idea.

B: In the version of the game you have the cheat mode has been altered. This is often the case when a game is rereleased on a budget label etc.

C: The source just may be incorrect. I useually do wait for confirmation of cheat modes/level codes etc before entering them into the database. However, because I can't test all the information out for myself, their is bound to be some incorrect data in this file. If you know this to be the case then I would appreciate you getting in touch and letting me know.

Supa Dupa Rank Boosta - Mission 16, Phase 2:

Top left corner of the screen. It isn't hidden and it looks like a sign for a general (four stars).

Supa Dupa Troopa Boosta - Mission 20, Phase 1:

This is a big yellow S in the middle of the screen on quite an easy level. It's still worth getting since it improves your rank until you die and it gives you a Bullet-Proofa Vest, Missile and Rank Boostas for the phase. Watch out when you pick it up though, because there is a spike nearby.

Supa Dupa Troopa Boosta - Mission 22, Phase 2:

1.190 Microcosm - CD³²

Cheat Mode:

This cheat mode is a bit complicated, but if done correctly will give you infinite shields and all weapon systems.

First pause the game and press any coloured button. You should hear either a high or a low beep. If you get a high beep then you've got the first digit of the code right. If you get a low beep it's wrong and you must start again from the first digit.

It's just a question of elimination, say you press the red button and get a high beeb and then press the yellow button and get a low beeb then just start again making sure you press any other coloured button except yellow after the first red one, and so on.

A weird noise tells you the cheat is active, unfortunately the cheat also sucks all the colour from the cut scenes.

The code changes every time you start a new game.

1.191 Monopoly

To activate the cheat mode, when the start game/options screen appears type 'ABCDEFGHIJKLMNPOQRSTUVWXYZ' four times on your keyboard and a cheat menu option will appear.

Playing Tips:

Here are the finishing moves for Mortal Kombat:

Johnny Cage: Towards, Towards, Towards, Fire.
Kano: Away, Away, Fire.
Liu Kang: Towards, Down, Away, Up, Towards, Down.
Scorpion: Down, Down, Fire.
Sub-Zero: Towards, Down, Towards + Fire.
Sonya Blade: Towards, Towards, Away, Away, Fire.

To fight Reptile:

On the bridge level you must double flawless your opponent without blocking and then use your fatality move as one of the various shadows passes over the moon. If performed correctly text will appear across the screen announcing the fact that YOU HAVE FOUND REPTILE !.

On level one, when you come to the first working teleporter, keep going right untill you come to the first ladder. Go up it to get a blue flag - it has loads of gems, lives and hit points so you can keep going untill you have thousands of stars and 99 lives. Also, on the Inca level, when you sea a fish (he's behind the first brick you blow up), talk to him and select: 'Bubble Bubble? 'How do you know that?' Are you an enchanted prince?'

and except his offer. You can now have infinite trips to the warp zone even without gems!

1.199 New Zealand Story - The

Cheat Mode:

If you happen to own a copy of the original game then on the title screen type 'MOTHERFUCKENKIWIBASTARD'. With each key you press you will hear the sound of the laser gun being fired, and at the end you will hear the sound of the earthquake. Now start the game as normal and your lives will read 9+. You now have infinite lives and pressing the [Help] key advances you a level.

However, if you own a copy from the Batman sales pack then they changed the cheat mode because it was too offensive. Alternatively you must type in 'FLUFFYKIWIS' instead.

If neither of the above two cheats work on your version of the game then I only know of one other method. On the title screen type in 'TRY CHEATING'. Apparently this also has the same effects as the other two cheat modes.

Cheat Mode:

Type 'CODE' on the main screen and a prompt will appear asking you to enter a code. Put in the word 'CODE' again, and a list of cheats will appear. To access the full editor just type 'EDIT' on the main screen without typing CODE first. You can now press:

W = Enables you to manage any team, but make sure you have accessed the editor otherwise it doesn't work.

Once you have typed W, a small green and yellow strip should appear just along from the logo and auto icon things, under the second logo space. You can now go to the managers menu and join any club. Your rating automaticlly jumps to that of the new team, unless you are joining a lesser club.

Finally, if you want to alter teams because of transfers among Premiership and Division 1 teams, to maintain more accurate club records, instead of creating a whole new player in the editor, it is best to make yourself the manager of the club who bought the player, enable FREE

transfers, and transfer the player that way. This means the player keeps his original ID number. For example, Paul Furlong was bought by Chelsea from Watford, so to enable this change, simply become Chelsea manager, enable FREE transfers, and approach Watford.

Enter the caves by going through the door on the left and leave by going through the hidden door on the right, now go back through the door on the left again and the current room number will be displayed at the top of the screen.

Progress Through The Caves As Follows:

Going through the door on the left will take wizkid to the cave number which equals the current cave number multiplied by two, and then added to one. For example, going through the left door in room 6 would take wizkid to room 13. Going through the door on the right will take wizkid to the cave number which equals the current cave number multiplied by two, for example, going through the right door in room 5 will take wizkid to room 10. Going through the hidden door on the right will take wizkid back to the cave entrance so you can either go back in or return to the start by going through the door marked exit. Using these methods you can enter a number of rooms with loads of features:
