1.1 History

* 0.94 (18-1-98)
    - Version string complies to official standard now (software remains beta !).
    - Added installer script.
    - Progressivly encoded images were not handled correctly. Fixed.
    - Workbench startup handling encountered an endless loop. Fixed.
    - Fixed silly bug in shell startup code. Found that one only accidentally.
    - Window scrolling should be smoother now.
    - Added cpu check.
    - Added an fpu version of the 68k executable.
    - Public release.

* 0.9Beta3 (4-1-98)
    - Localized.
    - Many internal changes, improvements & bug fixes (hopefully...).
    - Added experimental ARexx port.
    - Public release.

* 0.9Beta2 (31-12-97)
    - Window handling is subtask now.
    - Window scrolling should work now if part of the window are covered.
    - Renamed due to a name collision on Aminet.

* 0.9Beta1 (28-Dez-97)
    - First public release.
