

## **Version Resource Component**

### **Copyright © Columbus Circle Investors 1995**

A Version Resource is composed of several useful bits of information including Version, Copyright, TradeMark, FileType, etc. Borland's Resource Workshop has been rumored to create these resources. Borland's BWCC.DLL is one of many system files containing a Version Resource. This component has not been tested with languages other than US English and character sets other than Multilingual (I don't have Resource Workshop yet, so I can't create my own yet...).

Note: The source is included with this component but it is encrypted. Please e-mail me at 74763,2032 if you want the password. I simply want to know how many people are really using the source.

VERTEST.EXE is a sample application I wrote which network administrators will love...

Thanks to Des Nolan for testing this component and to Michael Ax for the enumerated type code.

#### Component Installation Instructions

1. Copy the following the following files to your Component Directory.
  - VERREG.DCR
  - VERSION.DCU
  - VERABOUT.DCU
  - VERABOUT.DFM
  - VERREG.PAS
2. Edit VERREG.PAS replacing 'CCI' with whatever component page you wish.
3. Install the component:
  - Start Delphi
  - Select Options/Install
  - Click Add
  - Change to your Component Directory
  - Add the VERREG.PAS module

#### Help Installation Instructions

1. Copy HELP\VERSION.HLP to \DELPHI\BIN
2. Copy HELP\VERSION.KWF to \DELPHI\HELP
3. Run the Help File Installer
  - Select File/Open
  - Open \DELPHI\BIN\DELPHI.HDX
  - Select Keywords/Add Keyword File...
  - Open \DELPHI\BIN\HELP\VERSION.KWF
4. Select File/Save
  - You will receive an error if DELPHI.HDX is read-only.
  - The File/Save process takes a few seconds to complete and does not indicate it progress.
5. Make sure the following is set in MULTIHELP.INI:
  - [Index Path]
  - VERSION.HLP=x:\DELPHI\BIN
