

"DSUM" - Drive Summary V2.31

Copyright © 1987-1992 by Danen Software Services
All Rights Reserved

This utility program presents information about all your hard disks, including network and CD-ROM drives. It is of little use to those with just a C: drive, but to those working with multiple logical drives and/or network drives, it sure beats CHKDSK.

And for those of you who found CHKDSK won't do networked and SUBSTed drives, and if all you want to know is how much free disk space there is...

Notice that CAPACITY, USED, and FREE are all shown in Kbytes. Percentage FREE is rounded.

REQUEST: I have only been able to test this program under Novell NetWare and IBM PC LAN so far, and would like to have YOU test it under your LAN, or CD-ROM, and report any abnormal behaviour to me.

Yes, although you see a copyright notice, you may freely copy the program and share it with your friends.

SAMPLE OUTPUT:

DSUM Drive Summary
V2.31 Copyright (c) 1987-1992 Danen Software Services All Rights Reserved

Drive	Volume	Capacity	Kb	Used	Free	%	Path
<notes>							
A:	FLOPPY_A	1,423	541	882	> 62<	\	
B:	<removed>						
*C:	Volume_1	398,416	359,600	38,816	10	doc	
D:	Volume_2	246,164	159,824	86,340	35	gr\3g\&a&b1	
E:	RAMdisk	3,478	1,826	1,652	> 47<	work
