This template file contains three DDE samples to use with Reminder.

1.

Note: In order for this macro to work, you have to have at least 1 item in the Birthday category. You should also place the cursor at the bottom of the page before you start the macro. Select the menu

You will then be prompted for a Category name. Enter

You will then get a list of the Birthday items you have listed.

2.

Note: In order for this macro to work, you have to have at least 3 items:

Make sure the items are **not** Birthdays, because the category is marked as *personal* so it will not show up unless specifically asked for with the "c=category" DDE entry.
You should also place the cursor at the bottom of the page before you start the macro.
Select the menu

You will then be prompted for a month number. Enter the current month number

If it is July, select 7. You will then get a sample report of the items you finished for the month of July, a list of items you still have to do, and a final list of the items you have to do for August.

3.

Note: In order for this macro to work,
1. Make sure Reminder is on the path or is running and
2. Select the following line starting with "7" and ending with ".":
7/1 Test Make this sample test for me.

Now, select the menu

When you are done, look at Reminder to see that the above item has been added for July 1.
