WinCheck Tutorial

The Tutorial for WinCheck consists of some sample data, with the Account ID of TUT.
When you first run WinCheck, the Tutorial data may be loaded in. There is data
entered for January and February of 1990. Experiment around with the features, look
at the registers for January and February. The statement date is set for the 1st of the
month by default. Change this to the 15th of the month (in the "Settings" dialog
box), so you can look at the statements for December 1989, and January 1990.

Go ahead and write some fake checks, make that lottery check deposit you've always
wished for, and get a good feel for WinCheck before entering your own data.

The file EXP0190.TUT is the tabbed text output from the Export function.
The file EXP0190.WRI is the tabbed text output after being formatted a tiny bit by
Write.

Overview

WinCheck is a checkbook program for Microsoft Windows Version 3.00. It allows the
user to enter and track their transactions for a savings and a checking account.

All account information is stored with the file extension of the account ID (requested
upon startup). This way, if you have two accounts, you can use two sets of IDs.

Valid account ID's are 1-3 characters in length, only A-Z, 0-9 characters are allowed.

Keyboard short cuts:

F1	Help.
F2	Display Current Balance.
F3	Write Check.
F4	Checking Deposit.
F5	Bump date up (While in Transaction Dialogs).

| **F6** | Bump date down (While in Transaction Dialogs). |

LOAD

This allows you to load in another account.

| **OK** | Loads new account. |
| **CANCEL** | Does not load new account. |

Note: Only one account can be loaded
                                        at a time.

TRANSACTIONS

These are the checks, deposits, cash machines items, etc. Use the TAB key to move between fields.

OK   Adds this transaction.
CANCEL   Does not add this transaction.
ANOTHER   Adds this transaction, clears
                        fields.

Hint: While on the Date field:

F5   Moves back a day.
F6   Moves ahead a day.

Note: A maximum of 16 transaction
                        dialogs can be displayed at any one time.

The Type drop down listbox allows you to specify the nature of the transaction. By default, all transactions are Personal. To add more types, simply type the new type into the edit field of the drop down listbox. If the type already has been entered, it can be selected from the listbox.

Exported files are divided by type.

PICK A MONTH

This dialog appears when you open a Register or a Statement. Select the month and year you want.

OK   Opens this register/Statement.
CANCEL   Does not open.

EDIT/DELETE

Displays a listbox with the Common Transactions dialog.

EDIT   Edits the selected Common
                        Transaction.
DELETE   Deletes the selected Common
                        Transaction.
LEAVE   Exits this dialog.

Hint: Double Clicking on a Common
                        Transaction edits it.

FIND Transaction

Allows you to search for a string or types of transactions.

Search Range		Determines the dates to search.
	Can be:	
		Search Current Month Only
		Search ALL months
		Search from: (fill in month/year
	-> month/year).	
Trans:		Determines the transaction to
	search for.	
Type:		Determines the type of
	transaction (Personal, etc) to search for.	
Amount:		Determines the amount to
	search for. If left blank, then the search will consider any amount (wildcard).	
Check #:		For checks only, indicates the
	check number. If left blank, then the search will consider any number (wildcard).	
Keyword:		For checks and Miscellaneous
	transactions only. If the keyword in the field is in the To line for a check, or the Description line of a Misc, the search will consider it. If left blank, the search will consider all descriptions (wildcard).	
SEARCH		Start the search.
CANCEL		Don't Search.

EXPORT

When selected, a file with a extension of the Account ID is created. The file is saved in a tabbed text format which is readable by most other programs such as Microsoft Excel, 1-2-3, etc.

The filename consists of EXPmmyy.iii, where:

mm	The Month of the exported register.
yy	The Year of the exported register.
iii	The Account ID.

Example:	EXP0990.TUT, for September, 1990 Month, account TUT.

SETTINGS

Allows you to choose the preferences of WinCheck.

Default Register Sorting	Determines how to sort the Register. This can be changed for each Register window at any time; this is purely the initial sort method.
Default Statement Sorting	Determines how to sort the Statement. This can be changed for each Statement window at any time; this is purely the initial sort method.

Check Type	Endstub checks have a different Tab field order than conventional checks. Otherwise, there is no difference.
Headings	If checked, displays headings for the Register or Statement.
Transaction Wallpaper	If checked, the transactions have a colorful texture (Color systems only).
Toolbox on startup	If checked, the Toolbox appears when you start WinCheck.
Balance on startup	If checked, the Balance dialog appears when you load an account.
OK	Saves preferences.
CANCEL	Uses previous preferences.

CURRENT BALANCE

Allows you to view your balance and the bank's current balance.

OK	Close Balance window.

The Register

The Register sheet is a window, which contains the transactions for the month in the caption.

An optional header provides descriptions of each column:

Date	The transaction Date.
#	Check Number.
Description	Description of transaction.
ChkAmt	Amount of checking transaction.
ChkBal	"Your Opinion" of your running balance.
BnkChk	"Banks Opinion" of your running balance. Only transactions cleared are figured into this balance.
SavAmt	Amount of savings transaction.
SavBal	"Your Opinion" of your running balance.
BnkSav	"Banks Opinion" of your running balance. Only transactions cleared are figured into this balance.

The Data menu allows you to specify a different sorting order.

Hints:	Double Clicking on the header removes it. The Register sheet allows multiple selections, consult your Windows manual for Multi-Select Listbox procedures. Double Clicking on a transaction brings up the appropriate transaction dialog

box.

Registers can be exported to a tabbed text file, readable by most spreadsheet programs.

The Statement

The Statement sheet is a window, which contains the transactions for a period of one month, starting on the date specified in the Settings Dialog.

An optional header provides descriptions of each column:

Date	The transaction Date.
#	Check Number.
Description	Description of transaction.
ChkAmt	Amount of checking transaction.
SavAmt	Amount of savings transaction.
Hints:	Double Clicking on the header removes it.
	The Statement sheet allows multiple selections, consult your Windows manual for Multi-Select Listbox procedures.
	Double Clicking on a transaction brings up the appropriate transaction dialog box.

Statements can be exported to a tabbed text file, readable by most spreadsheet programs.

Common Transactions

Common Transactions are those which are made regularly, such as rent, mortgage, utilities, food, etc. WinCheck allows you to define up to 32 "templates", or "Common Transactions", which allow you to quickly enter the transaction. Create templates using the "Add" menu choice, change or delete them through the Edit/Delete dialog.

As you add common transactions, they will be added to the Common menu. Choosing these transactions immediately brings up a filled transaction dialog which you can change if necessary before saving by pressing OK.

Hints and Tips

Take advantage of the Misc transaction. Direct Deposits, automatic withdrawls, service fees, and more can be entered here.

Take advantage of the Type field in the Transaction dialogs. You can accurately and carefully track your finances this way.
