In addition to altering values through the Custom Options Menu, you can also pre-define the appearance of your screens by category. Then, as you change categories, the program will automatically change the screens. You can pre-define up to 99,999,999 different screens! To see how this works, enter '2'.

 In chapter 2 you changed the default program values in option 2. 0
 Observe options 2 and 7. Option 7 overrides #2 and works with #6. 0
 As we progress through this tutorial, how #6 functions with #7 will 0
 become clearer. For now, enter '7' once to turn option 7 'ON'. 0
