                                                                                               0

@6   6
In this tutorial, you can observe how easy it is to customize   0
the program to your specific application.   0
Earlier, you saw 3 records for a truck maintenance system, but the   0
headings for each record did not really describe the 3 fields   0
identified in each record: License Number, Vehicle ID Number,   0
and Vendor & Model Number.   0
We will now alter the default headings.   0
                                                                                               0
                                                                                               0
——————————————— Maintenance and Service Call Activity Tracking System ———————   0
                                                                                               0
                      ACS   0
                Main Program Menu   0
                                                                                               0
                                                                                               0
