## **Installation**

1. In Windows, make sure your monitor's display is set to 640x480 resolution and 32,000 (or 65,000) colors (16-bit). The program will run with 256 colors (8-bit) mode, but the QuickTime movie won't be optimum. The program will run with 16.7 millions colors (24-bit) mode, but the monitor's display will be slower than 16-bit mode. For details on how to change the monitor's resolution and colors, see the Microsoft Windows and video card manuals.
2. Disable any screen savers before launching the program.
3. In DOS, type "WIN INSTALL" at CD-ROM drive prompt, or in Windows, use File Manager to launch "INSTALL.EXE" file on CD-ROM.
4. If you don't have QuickTime 2.03 installed or if you have an older version of QuickTime, you need to install QuickTime 2.03 for Windows before running the program. In DOS launch "SETUP.EXE", or in Windows double click on "QuickTime" icon to install QuickTime for Windows version 2.03.
5. In Windows, under "Arc Media" group, double click on the program icon to launch.
