To record a sound into a sound file

- 1 Make sure you have an [audio input device](#) connected to your computer.
- 2 On the File menu, click Open, and then double-click the sound file you want to modify.
- 3 Move the slider to the place in the file where you want to record sound.

If you add a sound to the middle of an existing sound file, the new sound replaces the original sound after the insertion point.

- 4 To begin recording, click .

To stop recording, click .

- 5 On the File menu, click Save As.

{button ,AL("SOUNDREC_INSERT_SOUND;SOUNDREC_OVERLAY_FILE")} [Related Topics](#)

To delete part of a sound file

- 1 Move the slider to the place in the file that you want to cut.
- 2 On the Edit menu, click Delete Before Current Position or Delete After Current Position.

Tip

- Until you save the file, you can undo a deletion by clicking Revert on the File menu.

To insert a sound file into another sound file

- 1 On the File menu, click Open, and then double-click the file you want to insert.
- 2 Move the slider to where you want to insert the other sound file.
- 3 On the Edit menu, click Insert File.

If you insert a sound into an existing sound file, the new sound replaces the original sound after the insertion point.

- 4 Type or double-click the name of the file you want to insert.

Note

- You can insert a sound file only into an uncompressed sound file. If you don't see the green line in Sound Recorder, the file is compressed and you cannot modify it unless you change the sound quality.

{button ,AL("SOUNDREC_CONVERT_FILE")} [Related Topics](#)

To overlay (mix) sound files

- 1 Move the slider to the place in the file where you want to overlay the sound file.
- 2 On the Edit menu, click Mix With File.
- 3 Type or double-click the name of the file you want to mix.

Note

- You can only overlay an uncompressed sound file. If you don't see the green line in Sound Recorder, the file is compressed and you cannot modify it unless you change the sound quality.
