    Mortgage King: simtel/win3/finance/mking???.zip
    Data King: simtel/win3/finance/dking???.zip

PK File

PK File is the data file for Presentation King and Slide King. PK file is prepared by using Presentation King.

Introduction

Slide King is   the stand alone showing engine. It reads <u>PK</u> file, which is prepared by Presentation King, and shows it on your screen.

The presentation can be a working proposal, an advertisement, an introduction to new products, education materials,   stories or a book for children.

Overview

The PK file consists of one or more Acts. each Act consists of one or more Scenes. An Act is a logic concept. It is a group of Scenes. There is, actually, no physical record for an Act, while there is one physical record for each Scene. Slide King plays a Scene after another in an Act without stopping. When all the Scenes of an Act is played completely, Slide King stops waiting for the user's response.   Then the user can click Next Button to see the next Act ....

Differences in editions

Presentation King and Slide King

Slide King (the showing engine) comes with Presentation King. Slide King   is distributable.

There is a Shareware Edition, a Regular Edition and an Objective Edition for Presentation King and Slide King.

The Shareware Edition of Presentation King has the same functionality as the Regular Edition, but   with Shareware Windows. All presentation prepared by shareware edition have the shareware stamp on.

The Objective Edition is in object and header files of C++ (Borland C++ 4.5 and OWL 2.5 or up) for corporate users. Users can inherit from Presentation King and add new features.

See License Agreement for details.

Slide King

There is only one edition of Slide King and it is distributable.

Corporate users can   add their co-copyright   on of Slide King. The Help | About Window shows your presentation name and your company name.   It is good for your profile.

Please see License Agreement for details.
