ctGAUGE(Gauge Control VBX)
from the Component Toolbox (Standard Edition)

This gauge control control allows the user to define all needle properties (place, size, and color) , the minimum and maximum values, and the starting and ending angle for the minimum and maximum values. The control is now part of the Component Toolbox but can now be registered via SWREG # 4118 for $25.00. (#4118 includes ctSLIDE, ctGAUGE and ctMETER)

All deliveries will be made via Compuserve E-Mail. It will include the VBX controls, licence files, and documentation in .WRI format.

NOTE :

All single controls ordered in this manner are ordered as is. Because these controls are only a subset of the entire package, you will not be eligible for any upgrades to the control (unless there are obvious bugs within the control). The controls are delivered as is at the time of purchase. To be elligible for upgrades, the entire Component Toolbox (SWREG #3852) package must be ordered. Nor will purchases of single controls be eligible for a discount on the entire Component Toolbox. If you already have a registered version of the Component Toolbox, E-mail us with your serial number and we'll send you the control.
