

PEARLESCENTS

Create an alluring look with a metal luster or a translucent veil over decorative surfaces.

Tools and Materials

1/4" Nap Roller, Foam or Nylon/Polyester Brush, Painters Tape, Gloves, Drop Cloth, Paint Tray, BEHR Pearlescents

Recommended on trim, doors, molding, baseboards, furniture, picture frames, lamps, architectural accents and decorative metalwork. Can also be applied over an existing Base Color using various techniques and tools.

To Apply:

- Pour the Pearlescent product directly into a clean paint tray.
- Determine brush size based on your project. Apply using long strokes, allowing the first coat to dry approximately one hour.

Over Faux Finished Surfaces:

- After the Glaze Color has dried approximately four hours, apply BEHR Pearlescent over the decorative finish using the same application tool and technique.

Option: Add a Pearlescent luster to a Venetian Plaster finish. Mix 16 oz (1/2 of a quart sized container) of Pearlescent with one quart of Venetian Plaster Topcoat. Refer to the Faux Textures guide for step-by-step application instructions.
