• One of the following Macintosh or other Mac OS–compatible systems:
— A Macintosh or PowerBook computer with a 68020 or later processor and 4MB of RAM
— A Power Macintosh computer with 8MB of RAM
• Macintosh System 7.1 or later (System 7.5 or later required to take advantage of QuickDraw GX features)
• An Apple SuperDrive floppy disk drive or a CD-ROM drive
• An application that has been localized for the target language or that supports right-to-left text

Sample Fonts

TrueType outlines can be displayed and printed in any type size or shape without distortion

Geeza (TrueType)

NadeemFarsi (TrueType)

Arabic Language Kit

Apple's Arabic Language Kit is the easiest, most affordable way to add Arabic and Persian text to your documents.

After the simple installation process, you can switch effortlessly between the computer's main language and Arabic or Persian. The kit lets you enter, edit, and print Arabic and Persian text, and mix either language with left-to-right languages in the same document—even in the same sentence. The kit comes with a selection of keyboard layouts optimized for both native speakers and students, accompanied by transparent labels for customizing your keyboard.

The Arabic Language Kit can be used with most Mac OS–compatible applications that support right-to-left text entry (including multilingual applications), or that have been localized for Arabic or Persian. The kit works with the built-in multilingual capabilities of the Mac OS, so you can copy and paste or drag and drop text between applications. And you can work with documents created by colleagues in the Arab world who use the Arabic or Persian version of the Mac OS.

The kit includes a selection of Apple TrueType fonts to ensure high-quality on-screen and printed characters at any size. These fonts incorporate exciting new typographic features based on Apple's QuickDraw GX technology. Most of the kit's fonts are also provided in PostScript versions.

The Arabic Language Kit is part of a family of Apple language solutions, which offer an affordable way to internationalize your Macintosh system. You can install as many different Apple Language Kits as you need on a single computer. Apple's other multilingual products include the Chinese Language Kit, the Chinese Dictation Kit, the Cyrillic Language Kit, the Hebrew Language Kit, the Japanese Language Kit, and others.
