

# ApplePrinters

## A range of printers to suit every need.

Apple's award-winning printers provide exceptional quality to suit a range of color and black-and-white printing needs. From personal use at home, in school, in the office, or even on the road, to top-of-the-line laser printing in the office, there's an Apple® printer that's perfect for the job.

## Apple technology makes the difference.

Apple delivers the best possible results through printing technologies unavailable on any other printers. TrueType® outline font technology ensures that even the most affordable Apple printers provide excellent type quality, with fonts that scale easily to any size. FinePrint™ technology delivers smooth text and crisp line art.

PhotoGrade and Color PhotoGrade technologies produce near-photorealistic images. And ColorSync® technology automatically acts to ensure the closest possible match between colors on the screen and colors on the printed page.

## Printer sharing made easy.

All Apple ink-jet printers can be directly connected to an EtherTalk® network using the optional StyleWriter® EtherTalk Adapter, which attaches easily to the serial port on the printer. And the Color StyleWriter 2500 can also be directly connected to a LocalTalk® network via the optional LocalTalk Module. The rest of Apple's LaserWriter® printers offer a variety of networking support, with many of them able to function on networks

that include not only Macintosh® computers, but also PCs running Windows software.

## The total document processing solution.

Apple printers complement your other equipment, to streamline all of your work with documents—not only printing, but also faxing and scanning. For example, you can add a fax card to some network LaserWriter printers to enable them to send and receive high-quality plain-paper faxes—right at your desktop. And because the Apple OneScanner™ 600/27 also employs ColorSync color-matching technology, you can be assured of consistent, accurate color from scanned image to on-screen representation to printed output.

### Dot-Matrix Printer

#### ImageWriter® II

*Apple's affordable dot-matrix printer.*

### Ink-Jet Printers

*Exceptionally affordable compact personal printers that offer great printed results.*

#### Color StyleWriter 1200

*Laser-quality gray-scale printing at an affordable price.*

#### Color StyleWriter 1500

*Apple's convenient low-cost desktop color printing solution offering laser-quality black.*

#### Color StyleWriter 2200

*All the features of a color desktop ink-jet printer in a sleek, portable design; ideal for use with a PowerBook® computer.*

#### Color StyleWriter 2500

*High-quality color printing—even impressive photorealistic images—at an economical price.*
