

I Declare!

The Visual Basic API/MultiMedia Declaration Utility
Copyright 1994 By Dan Mullin

Overview:

I Declare! was written for the serious Visual Basic programmer who uses Windows API and MultiMedia functions, constants, and data types on a daily basis. Before I Declare! most programmers had to import an entire declaration file and copy what was needed, scrolling up and down through miles of data to find that one declaration. Or, even worse, enter the VB Help system and grab declarations one at a time. I Declare! changes all that! Now you can access hundreds of declarations quickly and easily and copy them all in one pass!

Installing I Declare!

Since you're reading this file you're halfway home. You can either leave these files here or copy them all into another directory of your choice. To install I Declare! into the Windows VB group:

1. Open File Manager but keep your Visual Basic group visible by reducing the size of the File Manager window.
2. Select "IDECLARE.EXE" from this sub-directory.
3. Drag "IDECLARE.EXE" into your Visual Basic group.

That's it! I Declare! doesn't use any special .VBX files and will not attempt to install any into your Windows system directory. This may not make the program look as pretty but you also won't have to worry about it changing your current .VBX files either! You're now ready to start using I Declare!

Starting I Declare!

I Declare! is meant to be used while working in Visual Basic. However, with a stack of forms, modules, and property windows open, the last thing most of us need is another window taking up space. Don't worry, I Declare! is programmer friendly. Simply double-click I Declare! to start the program. Now, click the Minimize button. I Declare! will shrink down to a small command button with a title bar. You can then drag I Declare! to a handy location by grabbing the title bar. Yes, it will remember where you put it and will return there everytime. When minimized I Declare! will always stay on top of other windows, allowing you quick access. Pressing the button will reopen and start the I Declare! program.

This trial version does have nag screens. Hey, folks, we programmers have to eat, too. However, if you do decide to register, your copy will start immediately.

Using I Declare!

To Find And Copy Declarations:

1. Select the API or MultiMedia Functions, Constants, or Types button. This will enable the alphabetical controls.

2. Select the starting letter of the declaration you need (for example, P' for POINT)
3. Scroll down the list until you see the declaration you need.
4. Double-click the declaration. This will place the entire declaration into the Preview box.
5. Examine the declaration to confirm this is the one you want. If so, press Add to add it to the Declarations List. Don't worry if a function declaration enters the list broken into two or more lines. It will be passed to Visual Basic as one line.
6. Repeat selecting and adding until you have all of the declarations you need.
7. Once you have added them all to the Declarations List, press Copy To Clipboard.
8. If you're done with I Declare! press Exit. Otherwise, press the Minimize button to keep I Declare ! handy.
9. Return to the Visual Basic code module that needs the declarations. Place the cursor and press Ctrl-V to paste the declarations.

That's all there is to it! If you make a mistake you can clear the Declarations List by pressing Clear. If you realize that you don't need any declarations you can press Minimize and keep the current Declarations List active when you return, or simply hit Exit to end your I Declare! session.

The Declarations Files:

The six declarations files provided with I Declare! are in standard text format but have an .ASC extension to minimize the chances of a filename conflict. You may edit existing declarations and add additional declarations as needed by using a standard text editor. It is important, however, to maintain the overall structure of a record. Examine how the records in a file are formatted and format your's the same way. If tabs are used, use tabs. If one space is left between words, use one space.

The basis for the declarations was the book *Visual Basic Programmer's Guide To The Windows API* by Daniel Appleman, copyright 1993 by Ziff-Davis Press. This book is excellent, providing tried-and-true declarations that far exceed the accuracy of those provided in the Visual Basic Help files. In fact, Microsoft recommends this book to programmers who are having trouble with declarations included with VB. The declaration files have been updated to reflect corrections going into the 4th printing of the book so you should find these very accurate. Though this program is not in any way endorsed by Daniel Appleman or Ziff-Davis Press I would like to thank Mr. Appleman for his permission to use these declarations in this program. To show your appreciation for his excellent work in assisting all of us, buy his book!

The Legalese:

Shareware is unique! Can you try out a car for 15 days before you buy it? How about a stereo? Shareware gives you the chance to truly "try before you buy!" But remember, just as with a car or stereo, somebody had to spend alot of time trying to make your life a little easier. If you like this program give us more incentive by registering. If you don't like it, let me know what bothers you. I'm open to suggestions. Now for the registration information and usual disclaimers...

License Agreement:

The use of I Declare! is subject to the following terms and conditions.

I Declare! is copyrighted material. It is protected by the copyright laws of the United States. You may not make any changes or modifications to I Declare!. You may not decompile, disassemble, or otherwise reverse-engineer the software in any way. You may make changes as required to the declarations files. However, please don't post this program on any BBS with modified declaration files. Just drop me a note and let me know your corrections or additions. They will be incorporated in updated versions with a note crediting the contributor.

You may use I Declare! on a trial basis provided you do not violate the protection afforded the licensed software by the copyright laws, and you agree to the terms of the license agreement. If you continue to use I Declare! past a 15 day evaluation period you are obligated to purchase a license for its use.

You may use I Declare! on a Local Area Network providing that a license is obtained for the number of users that may concurrently use the software.

What I Need:

A license for the use of I Declare! can be obtained by sending a \$20.00 registration fee to:

Dan Mullin
20 Mountview Lane Suite D
Colorado Springs, Colorado 80907

Please use the form provided in the IDECLIC.WRI file.

What You Get:

The license fee paid for I Declare! is a one time fee. You will receive via mail a registered version with no timeout screen. In addition, licensed users will automatically receive the next update of I Declare! and will receive information on any corrections or additions to the declarations files.

Title to the licensed software is NOT transferred to the end user. The end user is granted an exclusive license to use the software on one computer or computer work station at any given time.

Limited Warranty:

This software has been tested as thoroughly as possible. However, not all systems operate identically and problems may occur.

I cannot warrant that the licensed software will meet your requirements or that the operation of the software will be uninterrupted or error free. The warranty does not cover any media or documentation which has been subjected to damage or abuse by you or others. The software warranty does not cover any copy of the licensed software which has been altered or changed in any way.

ANY IMPLIED WARRANTIES INCLUDING ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED TO THE TERM OF THE EXPRESS WARRANTIES. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

The warranties set forth above are in lieu of any and all other express or implied warranties, whether oral, written, or implied, and the remedies set forth above are the sole and exclusive

remedies.

I am not responsible for any problems or damage caused by the licensed software that may result from using the licensed software. This includes, but is not limited to, computer hardware, computer software, operating systems, and any computer or computing accessories. End user agrees to hold me harmless for any problems arising from the use of the software.

I SHALL NOT IN ANY CASE BE LIABLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, INDIRECT OR OTHER SIMILAR DAMAGES ARISING FROM ANY BREACH OF THESE WARRANTIES EVEN IF I HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

In no case shall my liability exceed the license fees paid for the right to use the licensed software.

I Declare! Trial Copy Distribution:

The following conditions apply to the trial version of I Declare! The registered version may not be distributed in any way except through transfer of your license.

You are granted a limited license to copy I Declare! only for the trial use of others subject to the terms of this software license agreement described herein, and the conditions described below are met:

I Declare! MUST be copied in an unmodified form and MUST contain the following files:

- ideclare.exe
- ideclare.wri
- idecllic.wri
- apitypes.asc
- apiconst.asc
- apidecs.asc
- mmtypes.asc
- mmconst.asc
- mmdecs.asc

No fee, charge or other compensation may be accepted or requested by anyone without my express written permission.

Public Domain Disk Vendors may not charge a fee for I Declare! itself. However you may include I Declare! on a diskette for which you charge a nominal distribution fee. The purchaser of said diskette must be informed in advance that the fee paid to acquire the diskette does NOT relieve said purchaser from paying the Registration Fee for I Declare! if said purchaser uses I Declare!.

Operators of electronic bulletin board systems (Sysops) may post I Declare! for downloading by their users without written permission only as long as the above conditions are met. A fee may be charged for access to the BBS as long as no specific fee is charged for downloading I Declare! files without first obtaining express written permission from me to charge such a fee.

Distributors of public domain and user supported software, such as disk vending services, may not charge a fee for I Declare! itself. However you may include I Declare! on a diskette for which you charge a nominal distribution fee. The purchaser of said diskette must be informed in advance that the fee paid to acquire the diskette does NOT relieve said purchaser from paying the Registration Fee for I Declare!.

The above constitutes the license agreement for I Declare!. It supercedes any and all previous

license agreements.

Summary:

I hope all of the above didn't spook you! The program is truly straightforward, simply reading in information and displaying it for your use. Though nothing is bulletproof I truly believe you won't have any problems with this program. In fact, I hope it helps you get your work done, exit Visual Basic a little early, and relax!
