BLOOD 97

The Screensaver

Intro

This is my first public ScreenSaver and i choose Blood as theme for it.
Because i think it is a little (read much) better than Duke 3d
I made several others but i wasn't to proude of them
This is version 1.01.
Version 1.0 is in the Blood 97 theme and is avalible at
http://www.wish.net/~tomb
Lets install

Setup

You already have unziped the "blood97s.zip"
here you have two files:Blood97s.doc (this file) and blood97.exe
now doubleclick on "blood97.exe"and unzip to a directory.
Just go to that directory and run "blood97s.exe"
and follow the instuctions on the screen.
important !!
Install to "C:\Program Files\Blood" as it is in the default setting.
if you don't it will not work!!

Go to SreenSetup and choose Blood97.scr as your screensaver
That's it !!!

Bugs

There is just one bug (as far as i know)
And that is:
In Windows 95 standart you can only play one .wav file at the time
I treid to program it so that it will not happen but it can
chance:1 at a 1000000000000000
You will get an error message,No Problem

Next

In the near future a Quake Saver will launched at the net
