Subj: Genesis, Ch 1 - Interlinear (Win .HLP)
Date: October 11, 1993
From: DLSnead

File: GEN1HLP1.ZIP

AUTHOR: DLSnead
NEEDS: An UnZIPing Program, Windows, Hebrew font

Keywords: Bible, Hebrew, Windows, Help
Type: Freeware

   This is a Hebrew and English interlinear version of the book of
Genesis, chapter one (verses 1-31). It is a Windows .HLP file.
You may point and click on English or Hebrew words in the text,
and a Strong's 1890 definition will appear. Strong's defintions are
in turn linked to other definitions. The English translation used is
the KJV.
   You will need a (Windows) Hebrew font to see Hebrew
characters in this help file - The Hebrew fonts contained in
WGREEK.ZIP will work. It is shareware and available from
America OnLine. If Hebrew characters appear here:

hy=vIIh, you will be able to see Hebrew characters in
GENESIS1.HLP.

To run: (1) Get into Window's File Manager,
         (2) click on **GENESIS1.HLP**.

Documentation: README.TXT, README.WRI
