Welcome to **DiskMan©**

 DiskMan© will print professional quality labels for your floppy disks as well as keep track of all your files on your floppies, Bernoullis, and hard drives. Without typing a single letter, you will be able to label all your disks, keep a log of all your disks, and make a printout .

 Since you probably already keep your disks in some type of storage box, **DiskMan©** will keep your files separated by storage box. **DiskMan©** will also print disk labels on standard Avery labels, available from us. We'll send you a sample with your registration fee or order a whole box. Print Out the Order Form from the Help Menu within **DiskMan©** for more information.
 So if you are tired of hunting around for a disk, or just want to make your disks look better and easier to put your hands on, this is the program for you. Give it a try, and if you like it, please print out the order form and send $20.00 to become a registered user. The registration fee will entitle you to all updates for a year.
 To get started,print out **DiskMan.wri.**

Please send upgrade suggestions to us:
