Preface

We started writing Money Smith in the Spring of 1991 because we were fed up with available commercial packages. We wanted a simple double entry accounting system that didn't require CPA certification to use it. Money Smith V1.2 (August '91) was the successful result. It surpassed our own expectations and much to our surprise became a hit in Europe as well as America. Version 2.0 added our unique interactive interface and allowed Money Smith Systems to incorporate and grow.

In preparing version 3.1 we have worked to bring you a more powerful, more stable version of Money Smith. We've stuck to the successful formula from version 2.0 and let our users tell us what features to add. Our goals were simple: maintain the best of version 2.0 and add the features you have asked for to bring you the very best in Windows accounting.

Many of you will be pleased with the enhancements. We've added support for multiple splits per transaction, foreign languages, cash flow reports, a find command, transaction importing, and improved the reports and graphs. All in all, we hope we've created a more useful, less limiting tool.

Many thanks to the fine group of beta testers, and to all of you that have written in to offer suggestions. As we look to Version 4.0, we hope to rewrite major portions of the program. We may also offer a business version sometime in the future.

Please recommend Money Smith to your friends. We've found word of mouth to be a powerful force in the software business. We hope you enjoy using Money Smith as much as we enjoyed writing it. Keep the cards and letters coming!

Sincerely,

Bradley J. Smith, Sept 1995
President & CEO, Money Smith Systems Inc.

Thanks

Special thanks to our group of Alpha and Beta testers. They tolerated much during early testing and revision.

Special Thanks

Special thanks to Delores Sanchez Whitehead for all of her help in starting and continuing the business.

Dedication

To my wife and daughter for their love and support.

System Requirements

Money Smith requires an 80286 or 80386 based IBM PC or compatible running Microsoft Windows version 3.0 or 3.1, a hard disk, and a mouse. The installed files occupy approximately 1 MB of disk space.
