

The Green Mile by Stephen King

A Windows Screen Saver - Part 1

INSTALLATION

The Green Mile screen saver is designed to run on Microsoft Windows version 3.1 or greater. It consists of two files, GRENMILE.SCR and GMPART1. These files should be placed in the Windows directory (or whatever directory you installed windows to).

After adding the files to your system, you can select The Green Mile as your default screen saver by opening the Desktop dialog from the Control Panel, opening the Names list in the Screen Saver area and selecting The Green Mile. Choose Setup... to adjust the speed, turn the sound on or off and to specify password protection.

The Green Mile Screen Saver - Part 1 is now ready to run!

THE FUTURE

Like Stephen King's serial novel, The Green Mile screen saver will also have a new chapter added to it each month. Check this site in April for the next installment.
