

U2 WINDOWS ICONS version 1.2

These are U2 images for your Windows environment, non-MacIntosh system. Most of these images came from jpeg files downloaded from the Internet.

This batch features more icons. For the next batch, I am currently looking for tiff files, a higher quality image than jpeg, which I can manipulate with my system.

Also, these icons can only be viewed one at a time. If anyone can give me information on how to make *.dll files, I'd appreciate it. E-mail me at schmitt@freenet.scri.fsu.edu

Icon Listing
