# Hangman32 Help Index

Hello.   I bet you thought you were going to get some help right?   Well, the end of the semester
break has arrived and I no longer have time to work on this program.   Anyway, if you really need
help with Hangman see your nearest six year old for further instruction on how to play the game.

If you find the source code for this program useful, please feel free to use and   modify it. I do
however ask that if you do find the code beneficial or if you find the program entertaining then
please send $5.00 to the address below.   Also, if you would like to comment about the code/game, I
would like to hear from you so please leave me an e-mail.

Thanks for taking a look at this program.
