Open command (File menu)

Use this command to open an MPEG bitstream for playback. See also 1, 2, 3, 4 command.

Shortcuts

Toolbar: 
Keys: CTRL+O

File Open dialog box

The following options allow you to specify which audio stream to open:

File Name

Type or select the filename you want to open. This box lists files with the extension you select in the List Files of Type box.

List Files of Type

Select the type of file you want to open: (*.mpg;*.mp2; *.mpa etc.)

Drives

Select the drive where the streams that you want to open reside.

Directories

Select the directory where the file that you want to open is located.

Network...

Choose this button to connect to a network location, assigning it a new drive letter.

Close command (File menu)

Use this command to close the current opened stream.

Shortcut

Keys: CTRL+C

1, 2, 3, 4 command (File menu)

You can use the numbers and filenames listed at the bottom of the File menu to open up to four most recently opened MPEG audio streams. To do so, simply choose the number that corresponds with the stream you want to open.

Exit command (File menu)

Use this command to quit the audio player.

Shortcuts

Mouse: Double-click the application's Control menu button.

Keys: ALT+F4

Status Bar command (View menu)

Use this command to display and hide the Status Bar, which describes the action to be executed by the selected menu item or depressed toolbar button, and keyboard latch state. A check mark appears next to the menu item when the Status Bar is displayed.

See [Status Bar](#) for help on using the status bar.

Status Bar

The status bar is displayed at the bottom of the player window, which appears as

The left area of the status bar describes actions of menu items as you use the arrow keys to navigate through menus. This area similarly shows messages that describe the actions of toolbar buttons as you depress them, before releasing them. If after viewing the description of the toolbar button command you wish not to execute the command, then release the mouse button while the pointer is off the toolbar button.

Help topics command (Help menu)

Use this command to display the opening screen of Help. From the opening screen, you can jump to step-by-step instructions for using ADI MPEG Audio Player and various types of reference information.

Once you open Help, you can click the Contents button whenever you want to return to the opening screen.

Help topics command (Help menu)

Use this command to display the opening screen of Help. From the opening screen, you can jump to step-by-step instructions for using ADI MPEG Audio Player and various types of reference information.

Once you open Help, you can click the Contents button whenever you want to return to the opening screen

About amaplay command (Help menu)

Use this command to display the copyright notice and version number of your copy of the ADI MPEG Audio Player.

Context Help command

You may use the Context Help command to obtain partial help on ADI MPEG Audio Player. When you choose the Toolbar's Context Help button, the mouse pointer will change to an arrow and question mark. Then click somewhere in the Player window, such as another Toolbar button or a menu item. The Help topic will be shown for the item you clicked.
