

Subject: Home Budget Made Simple
From: Cosmo T024

AUTHOR: Mike Souza
EQUIPMENT: ANY MAC
NEEDS: CLARIS 2.0 OR LATER

This is a useful home budget program that was designed for easy budgeting. It is a basic balance sheet format. It will allow you to organize your outgoing bills, so as to see exactly what you are spending on each item throughout the year. By entering data in the weeks provided, it will transfer your records over so that you can see your monthly, quarterly, and year to date figures. It will record both your incoming and outgoing transactions. It is quite helpful for organizing your taxes. I think you will find that it is quite simple to run. If you like it the shareware fee is only \$10.00. Any comments are welcome EMAIL: COSMO T024 Thanks!

To The Staff:

This is my first attempt at uploading a file. This one of my first programs. I don't know how much information is required. I wrote the program through Clarisworks. it was written through system 7. I don't know if the information is helpful, or how to put it to use in the download file. Please help me on arranging whatever needs to be done .Thanks for all your technical support.
