

Using the Directory

The directory was created as a PDF file and requires Adobe® Acrobat® Reader to open it. If you do not have Adobe Acrobat Reader or require an update, you can download it free from www.adobe.com.

The directory is a “catalog” of all the images contained on the disc. Feel free to print out a copy of the directory for a quick reference guide to our images. The category heading of each section tells you where the images are located on the CD.
