

README file for HEART BREAK ANGEL 2
(c) 1994 Video & Animation Co. All Rights Reserved.

=====

Welcome to HEART BREAK ANGEL 2, just one of many interactive album & movie adventures available from Video & Animation Co.

HEART BREAK ANGEL 2 comprises of an innovated complete interactive CD-Rom game.

Please glance over these paragraphs, and if you have any questions call your dealer!

=====

INSTALLATION:

HEART BREAK ANGEL 2 requires Apple's QuickTime for Windows, which is included on the disc.

To install, run the INSTALL.EXE program in the \install directory on the CD-ROM. Installation can also be done in Windows Program Manager | File | Run. The installation is completely noninvasive and consists only of creating a program group and icons in the Program Manager which point to the CD-ROM Interactive applications.

Simply click on the icon in the Video & Animation Co. program group to start. Allow 15-60 seconds to load.

SYSTEM REQUIREMENTS:

To Use HEART BREAK ANGEL 2 you should have a 386 or better CPU with 8-bit (256 color) or better graphics, a sound card, Microsoft Windows 3.0 and DOS 5.0, and a mouse. Your PC should have at least 4MB of RAM, and a CD-ROM drive.

For viewing digital video a 16-bit (32,000) color video adapter is recommended. An 8-bit display also looks good. This product is optimized for 8- and 16-bit video.

Be sure Windows is using a display driver that will provide 256 colors (or higher). This product is not designed for 16-color displays (eg., the standard Windows VGA driver). If your colors look bad, run Windows Setup to install the display driver provided by your video card manufacturer that supports 256 colors (any resolution). If you don't have much video memory, select "640x480 256 color" in Windows Setup.

Certain high-resolution video cards may require updated driver software for correct operation of QuickTime for Windows. Please contact your video board manufacturer to see if newer driver software is available.

ATI's "Crystal Fonts" mode is not supported. Change the Video driver to 1024x768 small fonts, or use a lower resolution.

To avoid a potential "hang" problem that exists with certain video cards, We have configured QuickTime for Windows to always write to the video driver rather than to the video card hardware. You may be able to speed up the performance of QuickTime for Windows by modifying these settings.

NOTE: COLOR CONFLICTS can be caused by an incompatible high-color wall-paper. If the program loads up in the wrong colors, simply quit, set the wallpaper to [none] in Windows[Control-Panel|Desktop and run again.

=====
