ABOUT THE SHAREWARE EDITION

The **WinOnLine™ Review™ Shareware Edition** is published weekly except for the last week of the month by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Week after week** we bring you the *newest shareware, freeware* programs and *features*, such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition

is published courtesy of

Windows OnLine™

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** (bbs) or write to,

INTO THE VALLEY OF WOLLY RODE THE 400

With this issue we've published **400 Feature Reviews and Shareware Briefs**. We have come a long way since our first issue when we began earlier this year on March 15th. Wolly hopes that Windows OnLine™ and our wonderful writing staff have brought you much valuable information over the past months. Wolly got to know many shareware authors and readers, and we look forward to next year. Thank you for your support this past year.

FROM WHENCE IT COMES

Speaking of support, don't forget where the WinOnLine Review™ Shareware Edition comes from. **Express your thanks to the publishing BBS** by giving Windows OnLine a call at 510-736-8343 and browsing around a bit. Leave a message for the Sysop with your comments about WOLRS and to let us know that you dropped by.

OUR BEST

This will be our last issue for 1993. We've enjoyed bringing you this magazine each week (well, Wolly really didn't *enjoy* it every week, but he did it anyway). Be sure to pick up the latest issue of the original WinOnLine Review™, the commercial edition, next weekend. *We wish you the best for this Holiday Season, and Happiness and Prosperity for the New Year!*

SHAREWARE BRIEFS

CROSS STITCH DESIGNER

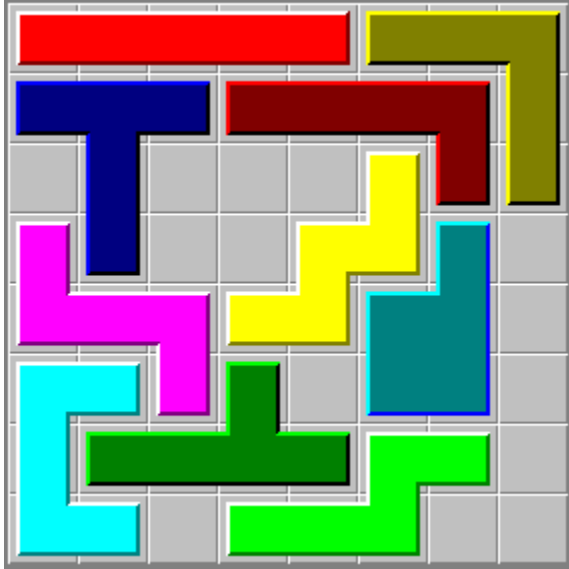

It will keep you in stitches!

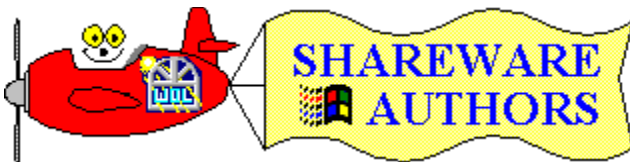

While Wolly is needle-impaired, there are no doubt many out there who count **cross-stitching** as one of their hobbies. This program enables you to easily **create and edit patterns, and supports full, half, quarter, and back stitches**. As you can see, Wolly used the program's **BMP conversion process** to create a WOL pattern (homey, ain't it?). The **pattern can be printed** using symbols to represent thread types and colors on most any printer, or print a pattern using stitches and actual colors on a color printer. The **handy toolbars** give quick access to a full set of functions to select stitches, colors and the ability to select and operate on regions of the pattern. **XS21C.ZIP** (126K) also supports 256 colors, and can be registered for **\$30.00**.

PENTAMINO

Didn't Tonto ride one?

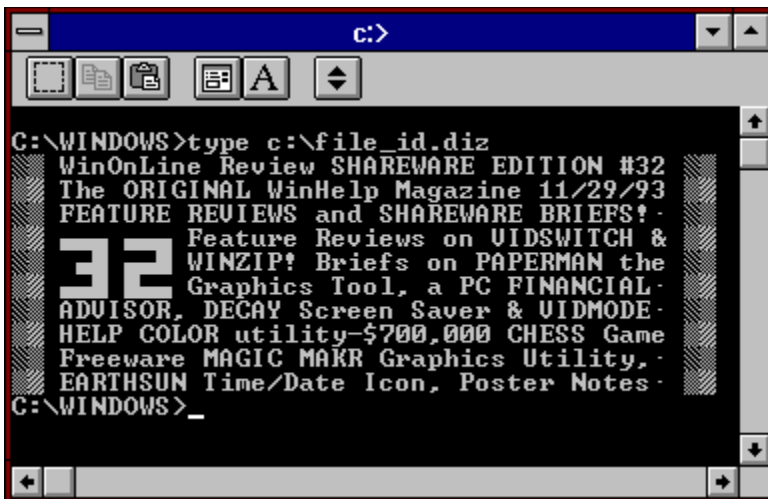

This seemingly **simple game can be quite addicting**. Choose a figure and place it on the board. Rotate it to make it fit if need be. Last one of the two of you to be able place a piece wins. Wolly enjoyed **PENTA10.ZIP** (134K) and perhaps you will as well, and register it for **\$15.00**.

click me

DOS BAR

I'll have a C:> on the rocks

This is handy. You'll like it. DOS Bar tops your DOS window with a handy toolbar. Select text and copy it, paste text into the box, maximize your window, etc. A configuration menu

allows selection or deletion of the available buttons on the toolbar. Wolly suggests that if you find yourself diving into DOS windows, **you will appreciate what DOS Bar brings to you.** **DOSBAR11.ZIP** (13K) is **freeware** courtesy of author Andreas Furrer.

TRUE TYPE FONTS

Assortment

BUSINDUS.ZIP (22K)

(Business/Industrial)

FINAL FRONTIER SHIPSIDE FF_SHIP.ZIP (42K)

(reproduced at higher than the usual 16 pts to achieve sufficient detail)

MeTro po liCa In MTR_TT.ZIP (33K)

Poscidon POS_TTF.ZIP (20K)

QUATRA COMMAND

Arcade adventure

Playdoe has brought an **arcade game** to the screen in the tradition of the 80's. Quatra Command **looks best in 256 colors** (excuse the color reduction), moves best with a video accelerator and sounds best with an audio card. You may have to play a bit with the settings, but if you tinker enough and have the right stuff, it may be worth the effort. Nothing particularly new or surprising, but a **decent video game** reminiscent of a game whose name Wolly can't remember

(the mind is the second thing to go). **Ships descend and fire at will, you'd better dodge their fire as well as the asteroids and meteors crossing your path at odd angles.** Survive that round and new, different ships become your attackers, less predictable and more deadly. Take a trip and be patient setting up **QWCGAME1.ZIP** (1,209K) and take a space trip. Wolly believes that you'd better have a pretty well-equipped and fast machine to truly enjoy this game. Registration is **\$17.00**.

A PROJECT/EVENT PLANNER

Sure is!

Thu Nov 11		Job P2 - Homer's House						
1993	[1]	Nov 6	[2]	Nov 13	[3]	Nov 20	[4]	Nov 27
1	Job C1							
2		Job C2						
3				Job C3				
4					Job C4			
5		Job P1						
6			Job P2					
7					Job P3			

If you have need of an independent **event planner**, you should check this out. **APLANR21.ZIP** (154K) has many **sophisticated features** that go deeper than the simple Gantt chart you see displayed. Beneath each bar lies a dialog with specific details, cost and income, resources and preceding events, etc. Use A Project/Event Planner for **scheduling and estimating costs for many projects, for overall planning, project tracking, and as a resource (like a meeting room) scheduler**. Give this MDI application a closer look if these features appeal to you, and register for a **\$29.00** fee.

KEYMETER

And you thought Mouse Odometer was superfluous

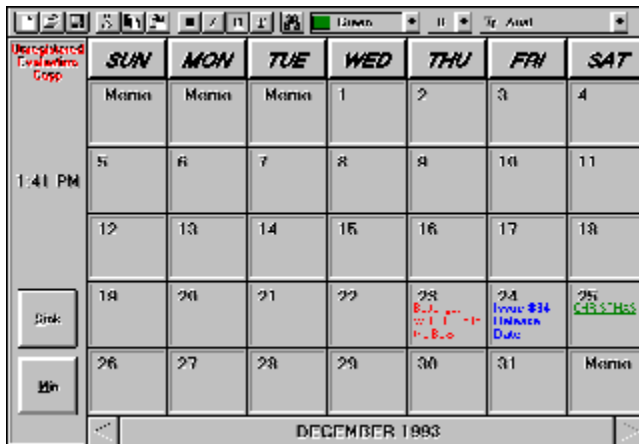

0002287 Keys

The author admits that this *Dean Thomas Idle Time Presentation* is **useless**. And it is, **but it's still interesting**. The Keymeter counts and records the number of keystrokes you generate, and displays them in a little odometer style window on your screen. If you come up with a use other than curiosity, let Wolly know. Still, **KEYMETER.ZIP** (20K) is **freeware** and funny.

VISUAL CALENDAR PLANNER

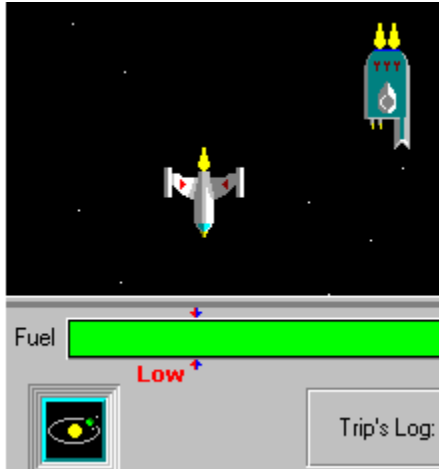

A desktop calendar that rises above the rest

At the bottom of your paper piles is your **desktop calendar**, safe, but inaccessible. The Visual Calendar Planner purports to be that **monthly planner**, though always available immediately through your PC. The system is very simple and not unlike its paper counterpart. Almost every bit of wording may be changed to the **font and color of your preference**. Each day can use different colors for different notes. Zoom in on any day to see the entire listing of events, and use the **handy button bar** to access the features available. **VCP10.ZIP** (352K) is clean and uncomplicated, and if it's all you need to track minimal daily appointments it may be registered for **\$19.95** that includes the next version. Now, what I need is an ALT-Tab key for my desk.

SPACE TRAVELER

Long trip

This **traveler moves down through space** (is he going home?), avoiding destruction through collisions with other ships and stars. Energy for fuel is obtained by capturing stars through a special port at the base of the spacecraft. **SPTVL1.ZIP** (243K) may be registered for **\$7.00** if you are sufficiently entertained by this simple game.

WIN COIN SLOT

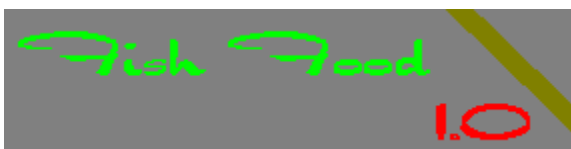

Yes, I lost big!

Wolly lives dangerously, flirting with up to twenty-five shareware programs a week. Normally he is religious about saving his "masterpiece in progress" prior to going where no Wolly has gone before, but he can't always remember. This lovely program took control, first hanging up on a utility that uses the window bar (WCS uses none) and then **GPFing virtually every other open program**. Sure, it was then pretty and it worked, though it was **very average** overall. It also took its command "close" very literally, **dumping Wolly** directly from Windows, **do not pass go, do not collect your work**. **WINCOINS.ZIP** (83K), which would more appropriately be called *LOSECOINS*, wins the **Blank Screen Award** this week.

FISH FOOD

And it will sleep with the fishes

Wolly generally auditions programs on his 386-DX25 test system first, believing that shareware shouldn't be just for those with heavyweight contenders on their desktops. Fish Food was a second program in a series that tested Wolly's patience. **The nearly continuous sound rendered the cursor in an almost constant hourglass state**, so Wolly could neither play the game nor escape the game's clutches without significant delay. Wolly had difficulty with the full-blown 486 system, too. While the sound was okay, the documented movement keys didn't effect the path his fish took. A suggestion to the author of **FISH1WO3.ZIP** (163K) and similar programs: perhaps Fish Food should have taken a long dip in a large pool of *beta testers*.

as told to Bob Gollihur

THUMBSUP!

During a recent project I had occasion to combine text and graphics into a rather large set of overhead transparencies. All was going rather well until I had to import the graphics. Fortunately, I knew where everything was, but trying to figure out what each graphic contained was a nightmare. The DOS file name structure doesn't allow much creativity in naming files so I was faced with file names that went from SRW-001.DRW to SRW-127.DRW. Even though I had created each of these drawings, and I had named them, try as I may, I could not figure out what was in each of these graphics. Eventually I stumbled through the project but I was left with the realization that I had to find a better way to do this type of project.

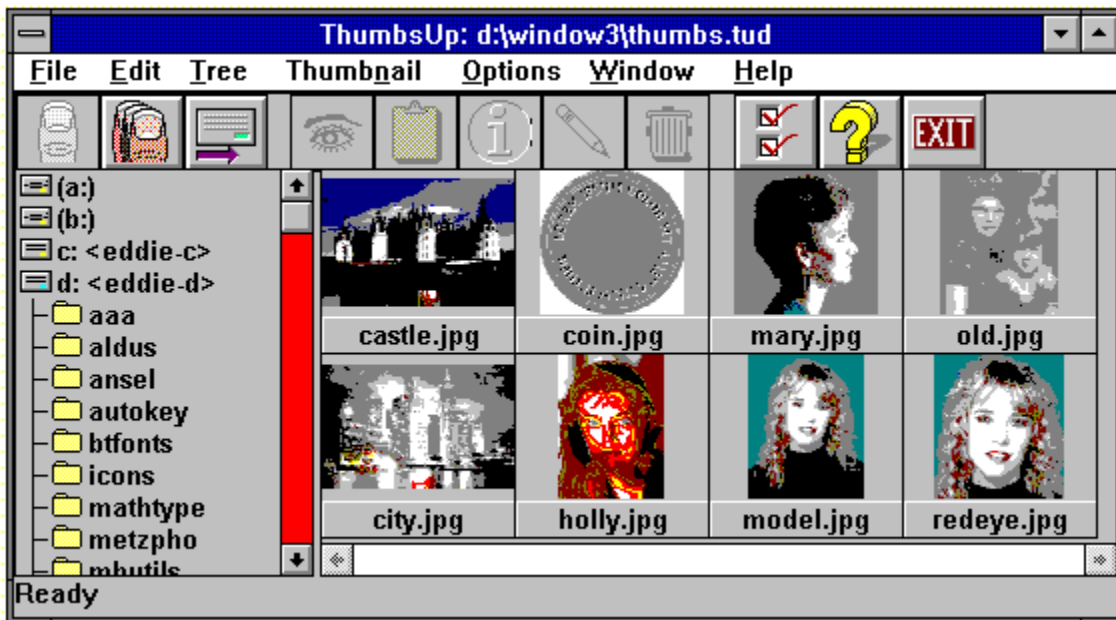

What I needed was a good graphics viewing program that would setup small copies of each graphic that I could reference as needed. A plain graphics viewer, though adequate, would still require me to open each graphic individually and that's not what I really wanted. I wanted something that would show me all the graphics in a particular directory at one time. Then I could select the one I wanted and add it to my document. I had all but given up the hunt when, almost by accident, I found the *ThumbsUp! 1.3a* program.

The *ThumbsUp!* program is a real gem. Not only does it do exactly what I wanted, but it

is also ridiculously easy to use. It took me all of about 3 minutes to figure out the basic operation of the program and another 15 minutes to convert several graphic sub directories to small thumbnails of each graphic. Unlike many other shareware programs that use a very cryptic or obscure menuing and icon system, the *ThumbsUp!* program is quite rational and intuitive. For these reasons, as well as its overall performance, the *ThumbsUp!* program is this weeks recipient of the much coveted *Works For Me Award*.

The *ThumbsUp!* program is basically a graphic file pre-viewer, locator and organizer that greatly simplifies the process of finding and maintaining graphics and clip-art files. The program shows each graphic as a small thumbnail image that is about an inch square. This size is variable and the program can be set to show the thumbnails at 1x, 1.5x and 2x. You can use *ThumbsUp!* to browse, view, crop, and copy images to the clipboard. The program will also launch specific editors that you have associated with each format. Graphic files can be organized or reorganized using drag-and-drop to move the files between directories.

ThumbsUp! can also be used to create slide shows with selected graphics. The program may even be used to install bitmap files for your Windows wallpaper. Individual graphic files can be printed, or the thumbnails alone may be combined and printed as a graphics catalog. Although the program is not designed as a conversion tool, it can convert any displayed image to the appropriate native windows format. *ThumbsUp!* can also convert metafile graphics to bitmaps.

The graphics formats supported by *ThumbsUp! 1.3a* are:

- ◆ .BMP Windows Bitmap files (also recognizes .DIB and .RLE extensions)
- ◆ .WMF Windows Metafiles and Placeable Metafiles
- ◆ .GIF CompuServe Graphics Interchange Format files

- ◆ .PCX ZSoft Picture files
- ◆ .ICO Windows Icon files
- ◆ .JPG JPEG compressed files (in JFIF format)
- ◆ .TTF TrueType fonts
- ◆ .MND Mandelbrot for Windows image files (also handles .MNI)
-  .CDR CorelDraw V3/4 files (preview image only)

By using the Graphics Import Filters supplied by Microsoft with Word for Windows 2.0 and other packages, *ThumbsUp!* will also handle these (and more) graphic file types:

-  .CGM Computer Graphics Metafiles
-  .DRW Micrografx Designer and Draw
-  .EPS Encapsulated Postscript files
-  .HGL HP Graphic Language
-  .PIC Lotus 1-2-3 Graphics files
-  .PLT AutoCAD Plot files
-  .TIF Tagged Image Format files
-  .WPG DrawPerfect graphics files

So, if you are working with graphics and need something a bit more powerful than the standard run of the mill viewer, The *ThumbsUp!* program might be just what you need. I know it certainly has earned a spot on my system. The program has a very well written help system and only consists of two files, so it will not overwhelm your system. Members of Windows OnLine can find the *ThumbsUp! 1.3a* program as THUMBS13.ZIP in Directory #500 - (WINDOWS-New Uploads).

DESIGN-A-ROOM

Several days ago, on one of my daily runs through the New Windows Uploads Library, this particular program caught my eye: *Design-A-Room*. After reading the accompanying description, I decided to download it and try it out. Quite a neat idea for a program! I figured that if it worked as advertised, it would come in handy from time to time, and potentially save the expenditure of a great deal of physical effort.

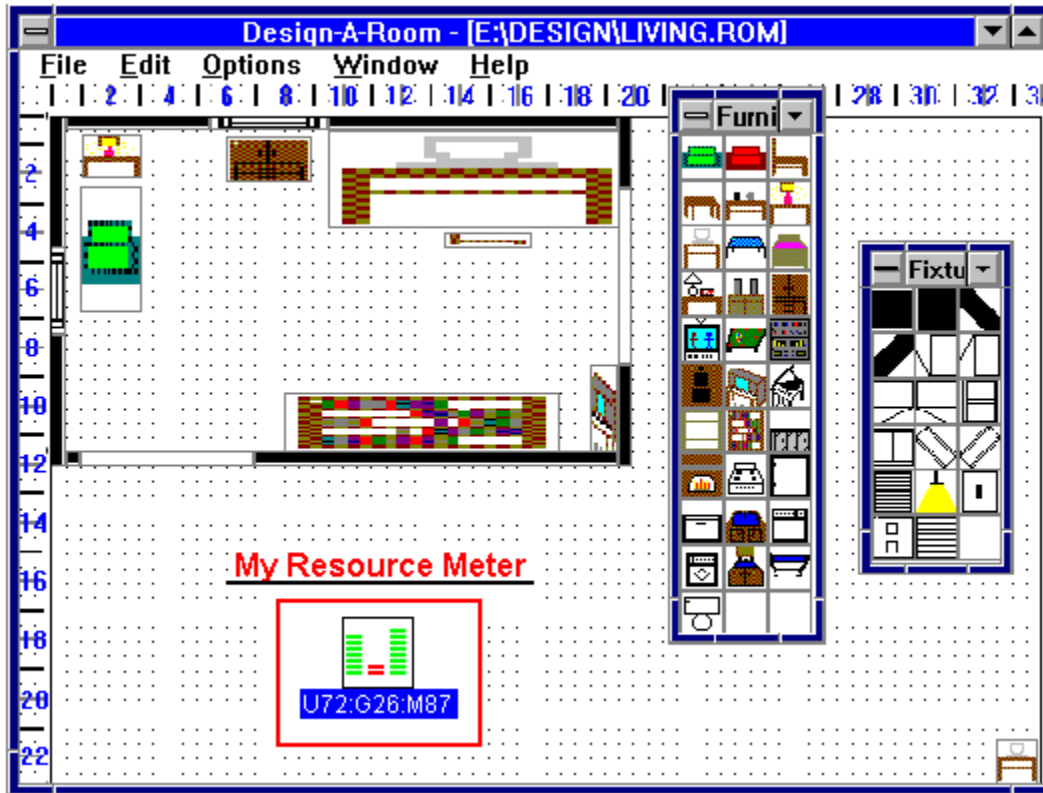

The task I am referring to, of course, is the one ushered in by the perennial cry of the resident home decorator, "Honey, don't you think this room would look better if we rearranged it a little?" Inevitably, one ends up placing the furniture in at least half a dozen new configurations before arriving at the final, *best* arrangement. Better to consider alternatives and move objects on my monitor than to lift and move heavy furniture into a multitude of possible locations, right?

Design-A-Room, written in Visual Basic 3.0, is intended as a tool to accomplish exactly what its name implies. It installs with a smooth setup routine, and its first appearance is quite impressive - a large design grid marked off in six inch increments with two panels on the right containing the design elements: One panel contains 17 user-sizable icons that represent different walls, doors, fixtures, etc. The other has 31 icons for different furniture pieces, including couches, pianos, tables, and even a pool table and a fireplace.

At this point, my resource warning system began getting my attention to announce that my GDI (Graphic Device Interface) resources had plummeted dangerously low... and *Design-A-Room* was the only program running at the time, excepting the usual TSRs that I run with. Before beginning the program, my GDI was at 68%. After opening this program, it dropped to 25% - not a good sign. Still, I determined to proceed. I turned off my "alarm" and forged onward.

Dutifully, I clicked on the menu bar's Help item to obtain instructions. Up popped a .WRI file with the sought-for documentation. Reading through the concise explanations, it looked reasonably straightforward and simple. I continued. As an exercise, I decided to reconstruct most of my living room in the provided grid to get a feel for the program. Illustrated below is

the result of my efforts.

It takes a little while to learn how to manipulate the individual pieces, sizing and placing them, but once you get the gist of it, it goes more quickly. It is suggested that you begin with the walls, and then add the furniture. To select an individual piece from the icon menu, click the left mouse button with your cursor placed on the icon. The selected object appears in the lower right hand corner of the grid. Move the piece to the desired position by placing the cursor at the upper left-hand corner of the object, then click and drag. To resize the piece, place the cursor just to the right of the object, then click and drag. As you do, the object will follow the movements of your cursor, reshaping as you drag. At the bottom of the grid, you may follow readings of the horizontal and vertical dimensions that correspond to the size changes.

After resizing the object satisfactorily, once again select the upper left-hand corner to drag it to the desired placement. This process is, I have to say, a bit unwieldy. I never did finish placing representations of all the objects currently in my living room. The process was becoming a bit too frustrating. Instead, I decided to try a few "what if" scenarios with the objects already on the grid.

This, unfortunately, also proved to be a frustrating experience. Because the "envelopes" surrounding each piece lie in such close apposition to each other, I found myself repositioning or unintentionally resizing (instead of moving) the wrong object on several occasions. There is no way to "lock down" the pieces once you have them where you want them. Additionally, the only provision for deletion is for the last selected piece. This feature is simply unworkable. In order to "knock out a wall", you would have to delete every single piece you had chosen since

that wall, one by one, in order to perform that step. Certainly it ought to be possible to select and delete any component at will.

Since the size of the room was smaller than the grid, and there is no zoom feature, I decided to reduce the program window size to free some of my desktop for other purposes. Though the window resized without difficulty, I found that in order to access the next selected object, I had to again expand the window back to its original size. Rather than appearing in the "new" lower right-hand corner, it was bound to appear only at the one designated location.

Design-A-Room is a good start on an excellent idea. Proper attention has been given to detailing the sizes of the components, and its "Snap To Grid" feature assists nicely in assuring placement accuracy. The registered version promises several enhancements, including an additional customizable tool bar, to enable you to design your own furniture pieces, and an "automatic wall creation" feature to save time putting up walls. Despite these promised "goodies", I think I'll wait to see if the above-mentioned difficulties are addressed in future versions before even considering registration. And in the true spirit of Shareware, I'd like to see these other features included in the distributed version so that I can evaluate **ALL** of its features before making that decision. To be worthy of a \$29.95 registration fee, *Design-A-Room* definitely needs some work.

Design-A-Room V1.1 (Registration fee: \$29.95)

NEW WINDOWS FILES

RED

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

WINDOWS - NEW UPLOADS from December 12, 1993 through December 18, 1993

(older files omitted)

- 210DLL.ZIP 237807 12-15-93 **Crosstalk for Windows** 2.1.0 fixed DLLs, which corrects several problems. New:12-06-1993 Old:12-02-1993
- AB3.ZIP 251250 12-18-93* Above & Beyond 3.0 - Excellent Windows **PIM**. (Last Revised: 11/19/93) **Take a look at last week's WOLRS.** <W>
- ACCENT22.ZIP 82852 12-18-93* Accent v2.2: MS-Windows app that enables you to **input special chars** that are not normally found on a regular keyboard (e.g. Accented chars, copyright/trademark sign, etc.). (Last Revised: 11/21/93)
- APLANR21.ZIP 153618 12-17-93* A PROJECT/EVENT PLANNER v2.1 ASP - Use for quick **overall project planning, activity scheduling, resource scheduling**. Can assign income/costs to events/resources to estimate project income/cost. Can shift all events forward/backward in time. Handles multiple calendars. Allows free-form drawing of events on scale of days/weeks/months/yrs. On-line help and sample plans provided. Requires Microsoft Windows 3.1. (Last Revised: 11/27/93)
- APLLO11.ZIP 244877 12-18-93* WAV: Apollo 11 countdown, launch, moon landing and first step on the moon. (Last Revised: 12/02/93)
- AUTOCE20.ZIP 105463 12-18-93* AutoCell v2.0: MS-Windows **artificial life puzzle** enabling you to easily and intuitively explore the world of cellular automata. (Last Revised: 11/28/93)
- BELLS_GM.ZIP 7699 12-18-93* GM MIDI: Carol of the Bells, sequenced for General MIDI by Mike Doyle, arrangement ripped from Mannheim Steamroller, more or less. Track names are instrument names, so can even try on strange setups. (Last Revised: 12/07/93)
- BOW&AROW.ZIP 33142 12-12-93 A Windows based **archery type game**. A good desktop distraction for work. Files: 4 (Last Revised: 11/24/93)
- BUJ_T1.ZIP 49926 12-18-93* BUJARDET FRERES - **POSTSCRIPT TYPE 1 FONT** This font has been created after ads used by my ancestors at the World Fair in Paris, 1900. It is a very original, old-looking font, interesting for ads, or posters and layouts. Shareware \$20. Upon registration, you will receive 50 more fonts, including many other original fonts, foreign (Japanese Kata & Hiragana, Russian, Slovak, Armenian, ancient Greek,

Hebrew,etc.). (Last Revised: 12/04/93)

BUSINDUS.ZIP 21793 12-16-93 Windows 3.1 **true type** font symbols & dingbats for business-industry.

CNN_ANIM.ZIP 7937 12-12-93 **Icon Animation of Earth spinning** for Windows. Freeware (Requires VBRUN300.DLL & THREED.VBX) (Last Revised: 11/29/93)

CUSCTLS.ZIP 359688 12-12-93 Disk of **VBasic custom controls** (Last Revised: 10/31/93)

DAGW101.ZIP 74090 12-13-93 Win 3.1 **diskspace/directory space** 1.01 (Last Revised: 12/05/93)

DDEIO.ZIP 11066 12-17-93* **DDE Library for Clipper** Communicate with Windows programs like Excel, Lotus 1-2-3, Word and Word Perfect using Dynamic Data Exchange (DDE). This DDE library enables clipper programs to initiate DDE conversations with any Windows program that supports DDE. It is also possible to communicate between DOS programs running on the Windows Desktop. Source code included. (Last Revised: 11/30/93)

DESIGN11.ZIP 458508 12-12-93 Design-A-Room ver. 1.1 - **Draw a room, add furniture and fixtures, to exact dimensions, then move the pieces around** to your heart's content - without leaving your chair! Arrange pieces - move and resize them, make any shape and size room. Design-A-Room comes loaded with 17 different fixtures, plus 31 different furniture pieces. Then print! Mouse-driven for Windows 3.1 Small bug fix, plus better icons. (Last Revised: 12/05/93) [See what Steve Cohen has to say in a feature review in this issue <W>](#)

DILOPHOS.ZIP 10855 12-18-93* 658x471x256 Diliphosaurus looking back over its shoulder (PCX). (Last Revised: 12/05/93)

DOE_20.ZIP 161916 12-12-93 Doe! For Windows. Hear Homer say Doe every 15 minutes. Or press the button for a SuperDoe! (Last Revised: 12/01/93)

DOSBAR11.ZIP 13474 12-16-93 DosBar **adds a toolbar to any DOS window**. With this toolbar you have an easy access to the mark, copy, paste and other functions which will normally only be available from the system menu of a DOS window. (Last Revised: 12/02/93)

DYNACPP.ZIP 336423 12-16-93 Some **dynamic system/fractal programs in Turbo C++**. Run under MS Windows 3.1 and source code is included. 1. orbit displays the orbit diagram of a quadratic function, 2. julia plots Julia sets, 3. mandel plots the Mandelbrot set, 4. fractal displays a Sierpinski triangle fractal, 5. life is a cellular automata simulation. Files: 11 (Last Revised: 12/07/93)

EMAIL283.ZIP 49928 12-14-93 Email v2.83: MS-Windows **network e-mail pgm** that sends text messages, attaches files, pop up notification (you can turn if off), archive messages, creates distribution lists, etc req VBRUN300.DLL; 11/14/93

FF_SHIP.ZIP 42063 12-17-93* A Windows **TrueType** Font. (Last Revised: 04/02/93)

FINDR400.ZIP 29602 12-15-93 Finder 4.00: MS-Windows program which allows you to swap between all of your active apps w/tremendous ease; adds a control Icon to the title bar of your currently active app, adjacent to the control menu Icon. (Last Revised: 11/25/93) [A](#)

Wolly fave

- FISH1WO3.ZIP 162860 12-16-93 FishFood Windows **Arcade Game** Swim upstream eating food, sucking down bubbles and avoiding obstacles. Requires VBRUN300.DLL. (Last Revised: 11/29/93)
- FW25.ZIP 158974 12-12-93 Fileware 2.5 - Hot **Word for Windows Macros** The features Microsoft "forgot" to include! Create directories; delete, rename, move, & copy files - all from inside WinWord! Plus: password protection, program launch buttons, more. Chosen one of the "48 Best Add In" products by PC Magazine; PC Week says, "...adds a good selection of features that were left out of Word for Windows." Shareware Magazine Editor's Choice 8/93 Files: 12 (Last Revised: 11/25/93)
- GREDS20.ZIP 78858 12-16-93 Jupiter's Great Red Spot in an Win 3.x icon Displays the current position of **Jupiter's Great Red Spot in an icon**. Icon title can display today's transit times or a clock. Can also be set to "rotate" to the next image of Jupiter periodically. (Last Revised: 11/28/93)
- GWW12_01.ZIP 152822 12-13-93 **God's Word for Windows (3.X) #1 of 24 Locate verses in the Bible by topic, phrase, keyword (with wild cards) or direct reference**. Search by area such as Paul's Letters, or the Pentateuch. Copy, append or print single verses, an entire chapter or search results. Customize index (270 topics already indexed). (Last Revised: 12/07/93)

Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Thank You.

NEW OS/2 FILES

RED

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

NOTE: DOS, OS2 and Windows newly uploaded files are located in Directories 148;149;150.

The following directory contains all new DOS files to WOL

148. DOS	- NEW UPLOADS	624
	83,788,485	
<hr/>		
Totals For All DOS Files	2,296,098,105	20,185
<hr/>		
Grand Totals	3,734,862,765	32,154
<hr/>		

This listing is as of September 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the

best and latest for its members!

Windows OnLine™ brings

THE BEST AND LATEST FILES

NO JUNK - we obtain the files ourselves, screen them thoroughly and edit their descriptions

THE LATEST FILES and MORE FILES - we get them EVERY DAY!

MINIMAL DUPES - we clear off the old when we bring on the new

EVIDENCE: Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

REVIEW THE SIZE AND NUMBERS OF FILES in our listings

WOLRS REVIEW INDEX

Issues 1 through 35

This index is presented in order of program topic. If you want to search for a specific shareware program, you may do so by selecting EDIT and COPY, and then copying the listing to clipboard and pasting it into Notepad. Use the program's search feature to find the program in which you're interested.

**Wolly uses the following system
to evaluate programs auditioned
for the Shareware Briefs:**

Siemens UM 486-33DX
16 megs RAM, 256K cache
17" .25 Sony CPD-1730 Monitor
Diamond Stealth 24, (S3, 1 meg)
2 IDE Drives 245, 210 megs
Colorado 250 meg Tape Backup
Soundblaster 16
Panasonic CD ROM 150kb, 390ms

**A second system is also used as
an additional test platform:**

386-25DX
4 megs RAM
14" .31 VGA
Generic 256K VGA
1 ESDI Drive w/Stacker 3.1

Would You Like Your Program *Featured* or included in the Shareware Briefs??

Each week *Wolly* looks at the newer programs that have been posted on **Windows OnLine™**. *Your* program could be included.

UPLOAD your creation to **Windows OnLine™** *immediately* upon availability. Call **510-736-8343**

You may leave a (C)omment to the Sysop; a menu will allow you to designate the recipient. If you would like, you may send pertinent supplementary material such as press releases, registered copies and other information to:

Bob Gollihur, Editor
WinOnLine Review™ Shareware Edition
Seven Baywyn Drive, Ocean View, NJ 08230-1060

(609) 624-1470 - CIS 71334,2065

Mail early to be certain it will arrive during the same week you upload your program to Windows OnLine™.

Please be advised that submission is no guarantee of appearance or a favorable review from Wolly in the Shareware Briefs. However, all current Windows shareware newly uploaded to Windows OnLine will appear in the New Files column.

FREE  **PC-SIG "World of Windows" CD ROM**
