

Level 3 CGI Script

by Jon Wiederspan jonwd@tjp.washington.edu

<http://www.uwtc.washington.edu/JonWiederspan/JonBio.html>

Requires:

- ScriptTools OSAX

Implements:

- accepts a POST event and responds with an HTML page with all unprocessed arguments

- quits after a specified period of inactivity

- Includes error default so you get an HTML return even if an error occurs
