              GAME CHEATS, BACKDOORS & LEVEL CODES (Update 12/26/92)
                    converted to AmigaGuide format by M.J.DEVOE
```

   The following list of cheats and backdoors for 488 games was compiled
by POSTCARD MAN from magazines and miscellanous postings on docs disks and
BBSs. I believe it's the most comprehensive file to date since it incorporates
nearly every cheat file published. I never verified many of these cheats.
Sometimes more than one password is given since different sources list
different cheats. Sometimes the Atari ST cheat is listed by mistake instead
of the Amiga cheat. I certainly don't have all of these games nor would I
have the time to play and test each cheat if I did. But I do make corrections
as soon as I know about a mistake. The file is turning into a book (7078
lines at 66 lines / page = 108 pages). If the reader would like to add to or
ammend this file, please contact me by mail. Send paper listing of info or
cheats on disk (if you don't care about returned disk) to:

1.3   aaargh!

AAARGH!

    At the start of each screen you'll find various buildings.
Blow fire over them, and then hit them. This will make them fall down
a lot faster. When you burn or knock down a house you get an egg.
    To beat the other monsters in a fight for an egg, don't jump around and
breath fire, just hold your ground and punch forward. After three or four
falls, your foe will stay down.
    Keep eating, even if it dosen't show any increase on screen, your health
will skyrocket.

1.4   action fighter

ACTION FIGHTER

the door above you...push up. You are now in a secret room. Collect the
stuff in that room, THEN walk up directly up that door and push up--there
you will find a MASS amount of treasures, 1 UPS, and other goodies!

Hold down the  + key on the keypad and press Fire. Then during play
F1 key disables enemies, F6 replenishes energy and 1-10 keys give you
different weapons.

(another cheat)

To become indestructable, gain infinite money and fuel, complete the
first attack level. When the shields/weapons screen appears, move the
cursor to the top left corner of the screen. This will place it in the
shields box. Now press the joystick button while hitting the + key on
the keypad. The screen will flash, indicating that the cheat mode has
been activated. If the screen does not flash, keep pressing fire and
hitting the + key simulataneously. It will work eventually. Now trans-
fer all the energy to the weapons. Shields can still be drained by
hits and colliding with objects, but once it reaches 000, the ship can
not be destroyed.

To win at the game, simply choose the last planet as the destination.
Once you enter the spaceport, there will be a short animation showing

In the second cavern there is a force filed that seems impossible to get
rid of. To get to the time machine chunk beyond it, simply fall off the
right side of the phone booth platform above.

Here are all the coordinates of all the jetpack platforms, in the order you
should go to them to finish the game. X/Y, X being width and Y being height:

BANE OF THE COSMIC FORGE (WIZARDRY)

The password to enter the door in the SE tower of the 1st level is
SNOOPCHERI. Use the ROTTEN CHEESE on the MOUSEHOLE.

Some small help for playing the game successfully:

A tremendous source for playing the game can be found in getting BANE
OF THE COSMIC FORGE COMPILATION released by Baser Evil on the 6th of
March, it contains many helpful maps to the game with marked location.

When you create your characters, it may be a good idea just to make
all of them Dracons. This is untested, but unless you have at least
one of this fire breathing race you surely won't survive the game. So
maybe it would be good to have more. Use a good mix of the classes,
try to take one of each spell class and a good solid theif that is at
full strength. Get a good enough thief and you don't need a fighter.
It may be slow, but keep rolling until you get the best character possible.
Be sure to make at least one character female, there are places in the
game where this is a must. Dont do it and be sorry later!

Diversify your skills. Have each character specialise in a few skills
relative to his class. Do not worry about developing weapons skills,
you have no use for them if you created your party correctly.

In fights early in the game use Dracons breath attack, just be careful
not to overextend yourself. Rest after each encounter, backing up your
hard work. Allways search the area after a combat.

Search each square you step in. Not only this, but search facing all
four directions, many things can only be found that way.

Thieves are not always true. If you find a lock and have your thief
open it, always guess it is POISON unless you are 100% sure (i.e.
tried it before) because it is better to suffer something else than to
die by getting this wrong.

Don't bash doors early in the game! If your characters are not very
strong you will be sorry. Jammed doors do you no good, as you might
never be able to open them again. Same foes for picking the lock. Wait
until you get a caster capable of conjuring KNOCK KNOCK with at least
18 points (preferably 24) and do it this way. It is much more sure.

Once you know there are secret panels or buttons, keep walking past
them until you discover them. You can find them by looking at the maps
and know where they are, sometimes it takes awhile to sense them.

1.34   barbarian (psygnosis)

BARBARIAN (Psygnosis)

During the game, type '04-08-59'. The screen should turn grey.
If so, you are now invulnerable and have unlimited lives. But he can still
be killed by very high falls and by the flame-hurling horned demon in the
dungeon deep.

NOTE: Other sources say code is '04 08 59' no hyphens between numbers:

To kill the final Wizard, you must have a shield. When his shot comes
at you, use the defense icon, and it will fly back at him.

1.35   barbarian (palace)

BARBARIAN (Palace)

On the final level when you confront Drax, walk forward and when the first
fireball comes, jump, then do a forward roll into Drax. If you can't even
get that far then the best way to defeat an oppoent is to roll into him until
he reaches the side, then kick him, roll in to him again and kick him, keep
repeating this method and you'll soon finish the game.

1.36   barbarian ii (palace)

BARBARIAN II (Palace): step-by-step walk-thru:

times, up, and left. Level 3: up, right, right, up, left, right, up, right,
left, left, up, left, left, up, up, right, right, left, left, up. Level 4:
hit the fireballs, then try to leap across. Several low chops will destroy
it. Next is the Pit Demon; when he reaches out, use an overhead chop to hit

his arms; repeat until death. Next, Drax himself! Wait until he pauses
between spells, and hit him with a flying head chop! The End...

BATTLE ISLE by Ubi-soft is a one or two player war game. Unfortunately
it has eluded most players on how to play against the computer. I'm sure it
is buried somewhere in the long documentation file. The game defaults to a

        LEVEL 1: Get the green armous as soon as possible. If you have
all of the amulet, don't go to the sphere unless you have collected at
least four lots of monster remains, you'll need them to battle the end
of level guardian. He's a bit soft in the head, so time your jumps
carefully, and hit him there.
        LEVEL 2: There are four planets to visit, go to everyone if
you want to get maximum points. Again, the green armour is very
useful, so get it as quickly as possible. There's loads of ammo for
the guardian of this level, unfortunetly that means there's loads of
monsters to deal with. The back of the guardians head is the weak
spot.
        LEVEL 3: Stand on the slabs and summersault. There are six
planets here, and the transporters are more difficult to so, so you
have to watch more carefully.

BOMBUZAL

Actually there is a hidden pause control in the game. When you press the
spacebar to access the overhead map screen, if you keep it held down the
clock stops until you release it.

When reaching a new level, it's worthwhile to sacrifice a life to see the
explosion pattern. When trying to detonate a pulsing bomb, pick it up; it's
easier to see its size. You are invulnerable to explosions when teleporting,
so use it to your advantage! A blind droid can't activate switches. Also,
here's a revised list of the level access codes:

BRIDES OF DRACULA

When you're Dracula, go right from the first screen and turn the first two
women into vampires, taking them back to their coffins. Then return to that
screen again, walk between the lift and the second table and crouch down
just past the skulls on the floor. A vampire should then appear ready to
be put into her coffin. Do this again and again to get all eleven vampires,
and then polish off Heising before he knows what hit him.

Type SCHLIKA during play. The border will flash and now F2 finishes the level.

If you pause the game you will discover that you can still aim the cross-hair. Now you can position the crosshair over the motionless bodies, then unpause the game and let 'em have it.

* Shoot as many of the buildings as you can, as they block your shots at attacking / hiding enemies.
* Shoot the enemies at the bottom of the screen as the bullets they fire needless time to get to you and can often trap you in a corner.
* Don't forget that you can shoot the enemies' bullets!
* Try to pick up the bonuses straight away. The 100, 200 and 300 point bonuses are very useful if you want extra lives.
* Collect special weapons straight away as their rapid fire removes buildings faster, giving more breathing space.
* The grey uniformed soldiers (the ones that take a few shots to kill) can give a grenade or a special weapon. When he does, two men carrying a stretcher will appear. Shoot these and they will give you two grenades, collect them and then shoot them again before they go, to receive two more grenades.
* Never stay in corners for too long, the enemy has a habit of zeroing in on you.
* Don't waste grenades on buildings unless you really need to. If you opt to shoot in small bursts at every building rather than concentrating on one building at a time then a grenade may finish the job a lot quicker.
* Try not to get killed when the end-level guardians appear otherwise your FOE meter will drop to zero and you'll have to start again.

you will start at the beginning with warp speed.

following question using the alien icons: CODE GG1. The alien
will then give you the co-ordinates of another alien called GG.

ordinates of all the other aliens around by asking CODE
INFORMATION HELP. If you're met with blind ignorance then put in
the name of an alien after the HELP.

1.66 cardiax

CARDIAX

Press the pause key, type in the name RACHEL, hold down the SHIFT key and
tap the G key to freeze the time limit.
For infinite energy, pause the game and type the name CAROLILY.
Unfortunately the game may crash at the end of level three.

1.67 carrier command

CARRIER COMMAND

While in the Walrus arming menu, select nine Harbinger surface to surface
missiles and put them in the AAV. Select the Avatar Chemical Laser and place

it over the missiles. Then select the pod you want (ACCB, Virus Bomb, Fuel)
and place it in the AAV. Then, when you've launched the AAV, look at it's
weapons and you'll find you have BOTH missiles and laser! On returning to
the carrier any missiles you have left will be added to the ship's stores.
Carry on doing this and hundreds of missiles can be yours. Another cheat:
while in the pause mode, type GROW OLD ALONG WITH ME (include the spaces).
You should now see the message "Cheat mode active". Pressing the + key on
the numeric keypad protects your Mantas and AAVs from missile attacks. The -
key can be used to turn this off. Pressing the following keys in sequence:
'Help', Q, S, Control, Alternate, gives you a little message. Pressing the 9
on the keypad displays the current level. 6 and 8 have some other effect.
Returning to the title screen, press the + and - keys to view all objects in
the game.

++++++++++++++++
A different source claims the following cheat:

Pause the game from the main view screen and type:
THE BEST IS YET TO BE, complete with spaces. The game restarts
automatically, and displays ' Cheat Mode Activated ' in the message panel.
Use the + and - keys to display all objects.

When paused, pressing + and - on the numeric keypad toggles
Manta invincibility: the flying craft are no longer vulnerable to aerial
attack, although collision with large objects is still fatal. Once a course
has been programmed for the carrier, Mantas or Walruses, engage autopilot
and click on pause. To avoid sloggin around inreal type, you will find that
pressing 3 on the keypad and unpausing again takes the corresponding craft
directly to its destination. Likewise, pausing and pressing 2 replaces lost
shielding, while tapping 1 refuels the craft in question. 9 shows the
current difficulty level, 7 speeds up the game and 6 brings up the
programmers' test palette!

A lot in this excellent simulation. PAUSE the game and type
GROW OLD ALONG WITH ME then press + on the numeric keypad for your
mantas and walruses to become sheilded. Press - to disable.

Try pressing CTRL and M on the main screen for some interesting effects.

1.69   cave runner

CAVE RUNNER

Get to level 2, then type SUB B BOYS (including the spaces).

1.70   chaos strikes back

CHAOS STRIKES BACK

Find a dragon and cast MON ZO GOR SAR and hit ESC to pause the game. Hold
down the ALT key and type in LORD LIBRASULUS SMITHES THEE DOWN. Unpuse
the game and slay the beast. He leaves behind a firestaff and your party
will be invincible.

Undocumented Spells:
GOR IR KU   - Detects Monsters
GOR IR ROS - Detects fake walls and "invisible" (actually hard to see) pits
GOR IR DAIN - Detects "magic" on screen?
ZO IR NETA - Anchors the map at the point of casting so that as you move
              around, the map view stays at the anchored position.

(hint #1)
It's _REALLY_ easy to kill _ANY_ dragon. Here's how.
1) Prepare all your players with MON IR VEN spells (mega poison cloud)
2) Use the green freeze life box (on the dragon)
3) Cast the spells, and then double up on each player
   (ie. each player casts 2 spells for a total of 8)
4) Wait... dinner will be served soon.

(hint #2)
Using the Vorpal Blade:
If you don't have both Vorpal Blades, you can increase #hits/time by
passing the weapon back and forth between the two attacking players.
(ie. hit -> pass blade to #2 -> hit -> pass back to #1 -> hit ->...

(hint #3)
Contrary to what I've read on the net, everything is affected by
fireballs, including knights and dragons. The only exceptions are
slime, black flames, and the thing that pops up from the floor.

be able to rise about 4000 ft and then start falling towards the ground. Just
as you hit the ground the mission will end safely.

On the Duty Roster, enter your name including the spaces as:
THE DIDY MEN (this is Digital Design's test mode). Do not hit Return,
Click COLONEL icon, then hit Return key.

Now not only do you get infinite weapons, but hitting the ENTER key causes
the plane to land automatically.

If your having limited weapon problems, just enter your name on the
enrolment screen as Ciaran and load up your pilot's log. The name
should now read OCEAN OK. Now you can fly on any mission you want
with infinite weapons and cannons.

1.150   fa-18 interceptor (electronic arts)

FA-18 INTERCEPTOR (Electronic Arts)

Taxi down U.S. 101, turn right at Highway 92, pull up to the EA Headquarters
and blow it away!

In mission 6, once you've fired all your missiles, you can land on the
Shadow Sub (if it's still afloat) and it will refuel and rearm you.

Select option "2 Free Flight, no enemy confrontation" from the main menu.
Then select zero instead of 1 to 4. The screen will go into a spiral and
scroll way south to 34 by 117 degrees, placing your plane somewhere without a
runway. This happens to be in the middle of Edwards Air Force Base, where
the F/A-18 was flight tested. hmmmm... To take off you have to use the
afterburners. 117 degrees is the furthest south you'll be able to fly, but
you can go in other directions. (Is there more to this back door? hmm)

1.151   faery tale adventure

FAERY TALE ADVENTURE

Take a save game file and use a PD program such as NewZap to patch byte
18 to a non-zero value. Load your save game, and now these cheat options
are enabled:

```
  Arrow Keys - Move Rapidly over any terrain
  B         - Summon Gold Swan
  R         - Rescue Princess
  =         - Display coordinates
  F10       - Location in coordinates
  F9        - Increase time by 1 hour
```

One of the hardest things to overcome when first starting the game is how to
avoid dying. Here's what you do. Make the crystal palace on the isle of
sorcery your prime target with the first character, Julian.
When you confront the good witch, click on ask. She will give you a good
statue and a clue. Now keep clicking on ask: your luck (or lives) will rise
from 20 to 65. This makes you impossible to kill. You can always return to
the same spot and do the same if your lives run low.
Sometimes you can accumulate all the treasure you want by going near the
item, pressing space bar, and then continue hitting 'T'. You'll receive
an infinite supply of that treasure.

Save your position in a dungeon. Then go through it until you run out of
keys. When you restore your game, all the doors will be open and you will
have a new set of keys. Also works in caves.

Jump on the turtle and start slashing. Your bravery points will go up to
infinity and it doesn't hurt you or the turtle.

On the island with the Crystal Castle, press the right mouse button while
talking to the Sorceress and your luck will go up to 65. 'ASK'ing the
Sorceress several times will usually boost your luck.

If running low on Green keys, use a secret entrance for the fort.
It's on the left side, almost even with the door.

Beating the Turtle is not beating, it is pushing, so push the turtle across
the land, to use it in special places: The turtle was programmed in asbestos,
and can swim in Lava. It can be used to enter the black citadel at the south.
Also, while it is present, you are not attacked, but by the time one has the
turtle, one is already invincible.

Press CONTROL-X (X SHIFT & CONTROL keys) for increased afterburners,
eight sidewinder missiles, and a full magazine. Don't know if it works on
the scenario disks.

Also, if you have trouble landing, select END MISSION after completing your
mission.
For a perfect landing every time, hold HELP key down about 10 - 20 feet
above the runway.

If you get badly hit, don't bail out, instead swing round & head for home.
Press 'HELP' and the '+' on the keypad and keep them depressed. The F16 will
stay level and drop down.

Switch to tracking mode & rotate to side view.
Just before touch down, pitch up the nose and the plane will touch down
successfully every time.
Select end mission & you will be rescued even if you are in enemy territory.

1.154   federation of free traders

FEDERATION OF FREE TRADERS

        Advancement in rank has nothing to do with the amount of
credits to your name. It is related to the number of missions you
complete and ships destroyed. The only way to earn a lot of credits is
to haggle on the trade-net. By staying in the space station on the
net, and trading in guns, food and gold, you will quickly build a
fortune.
        Travelling to space stations requires you to jump until you
cannot get any further.
        To complete the missions:

        MISSION 1: Take message: just go there! Use E pod.
        MISSION 2: Destroy aliens, but not unknowns: Kill 4+. Use E pod.
        MISSION 3: Destroy Sat!
        MISSION 4: Escort convoy. Use E pod.
        MISSION 5: Investigate dissepearances. Kill 4+. Use E pod.
        MISSION 6: Search for survivors.
        MISSION 7: Escort VIP. Land on planet then go to destination.
        MISSION 8: Go and report.

        MISSION 10: Rescue civilians. Land on planet.

you can change levels by pressing + and -.  Move the joystick diagonal
up/left, press fire, then press E.  You now enter the game editor.  Pressing

these keys:  P - alter the game's palette (use 1,2,3,4,5 and 6 from keypad),

Start the game as normal, collect the ship and fly to the extreme top
left of the playing area. Disembark from the ship and drive the buggy
into the corner. Type in STONKER and re-enter the ship. Now pressing D
cycles through the available  weapons (including shield plus weapons), and
pressing C cycles through the levels.  NOTE: when entering a level, it's
always best to station the ship at the top left of the screen again, to
avoid  appearing at an illegal position, or even off-screen. On the
second level repeat the above process, getting the buggy back in the top
left hand corner, and retype STONKER again. It now enables the ship to fly
through walls, and pressing F while hovering over switches allows them to
be collected while in the air.

1.168   gauntlet ii

GAUNTLET II

You need 2 keys and 2 locked treasure chests. As you open the first chest,
hold down the Help key, collect the treasure. Open the second chest while
holding down Insert. An Ankh will appear and you must collect it. You'll
hear a gong. You should now have 50,000 health points and 32,000 reflective
super-shots. The shots will vanish once you leave the level, and if you pick
up an amulet, the counter will be reset to 10 shots. (?? What Insert Key?)

To avoid tricky levels, pause the game and wait for three minutes.
Press fire and all the walls turn to exits. This happens anyway, but if you
pause the game, you don't lose energy, and won't get attacked while waiting
three minutes.

To get into the secret room, clear the dungeon completely, picking up the
super shots last, then go to the exit without pressing fire.

GLOBULOUS

Type Zvmo!EG as a password for the cheat mode.
NOTE: Use upper and lower case as shown!

The most important thing to remember is that ALL the puzzles can be
solved without losing a life, so if you lose a life and think its the
only way to solve the screen, look closely. Some of the puzzles get
pretty obscure after level 10, but once you eventually beat them youll
kick yourself for not seeing the solution earlier.

Look before you leap. Think about how the screen will look from a
flipped perspective. A lot of jumps you make will be unnecessary and
waste time and switches if you dont.

Make sure you have enough switches, at least 10 per screen. It is
possible to get stuck on a downward slope with no way to get back up
or kill yourself, and the only way out is to press ESC and start the
whole game over.

                 Level 4 - USX or DRA or LHH

energy.

On level two, buy a shield and a magic potion, then get three fireballs and
three stars. Spend all of your remaining money on food and haelth. Collect
all the gems in the usual manner. Then get a key and make for the exit.

When you decend the last ladder, two thieves will appear, make sure that you
don't quite have enough energy to survive a direct contact! Before going down
the ladder, release your potion, then climb down and open the door. Stand in
front of the door ready to leave, but don't pushup yet! Wait until the
thieves jump down at you and as soon as they touch you push the joystick up.
You may lose that life, but then something rather strange will happen. The
bonus will start to wiz up for quit some time, until the game stars again on

1.188   hardball (accolade)

HARDBALL (Accolade)

  Various hints:

  * Allstars are better than champs,
  * Only steal if you actually hit the ball,
  * Try to get a lot of runs early, as the computer team improves
    towards the end,
  * Bunting rarely works,
  * Halfway through the match, swap Laws for Wells and Wratten for Harris.
  * The best pitchers are Oliver, Perez, Leary, Cook. The others
    will only be successful for a short while,
  * Never pitch fastballs to the center as they will usually result
    in home runs,
  * Change pitchers after a few innings, because as they get tired,
    their accuracy and speed get worse.

Another trick is to repeatedly hit the 4 key (4th gear) until the program
has an error. Continue with the right mouse button. Repeat until you get
a high score.

At the start, turn the car around 180 degrees. The display should now show
the WRONG DIRECTION message. Head off under the bridge until you get to a
split in the road. Take the right hand branch and keep going until you reach
a checkpoint. Go through and turn the car through 180 degrees until your
heading the other way. Go back through the checkpoint in the right direction
and you should hear a ping. Keep going to the finish and once under the
bridge let the clock run down to zero. You should now get a message saying

HEROES OF THE LANCE (SSI)
```

```
Some general tips:
Arrange your party so that the first line consists of two strong warriors,
Raistlin and Goldmoon.  This allows you to use Raistlin's magic and the
healing staff of Goldmoon without too much hassle.  Save Tanis and Riverwind
for the later levels, where the bows come in handy.  When fighting Gully
Dwarves, use Tasslehoff who is the same height as them.  His sling stones
will never miss.  Avoid fighting Hatchlings, they're not worth it.  Just turn
and run when you meet one; when you reach an intersection move into a new
path and wait a little.  When you return, the Hatchling will have gone.
Killing Bozaks:  two methods:  1) get Raistlin to use a web, sleep or charm
spell to stun it, then send a warrior to clobber it to death, or 2) select
Flint, who is a dwarf; 9 out of 10 times, the Bozak's shots will go over his
head; get close to enter melee combat, and use low thrusts to kill it.
Spectral Minions:  they're easy to kill, so use a warrior.  Wraiths:  a
well-timed throw of an axe kills them every time.  If you miss, use a sword
and chest-thrust movements.  Don't let it get too close to you!  Spiders:
use low thrusts to keep them at bay.  If they get through your guard, retreat
until you can turn and fight again.  The blue and green potions restore
health, red slows down monsters, and yellow give your characters extra
confidence.

When you move your mouse round and round on your mousepad, your man runs at
full speed and you rack up immpressive times.

1.210   it came from the desert

IT CAME FROM THE DESERT

Before attempting to go into the ants' nest, you should first save Elmer to
get more flamethrower fuel. Some time between the 8th and 10th (I don't
remember the exact day), he will leave a note in his station saying that
he is going hiking in the SW Volcanic Cone. Go to the volcano, fight the
ants, and next day, visit Elmer's station. He'll thank you for saving his
life and give you more flamethrower fuel.

The entrance to the ants' nest will never appear on the main map, but
there are several other ways to get there:

        - By taking a flight from Hilber's Field.

        - By driving a tank from a battle going on at a nearby location.

        - By going south when you are in a battle at the M1 mine.

The entrance to the nest doesn't stay open long enough for you to get in
before the ants start invading the various locations in the town, so you'll
have to wait until they do. The 11th is the best day to enter the hole since
it is very hot and there are few ants around. If you try cooler days,
there willprobably be too many of them around for you to handle. Also,
if you decide toget to the hole by plane, you can land safely on the dirt
road parallel to the tracks leading to the M1 mine.

When casting a spell and asked to recite a verse just hit RETURN.

the programmers (up to KQIII) KQIV doesn't have it because of the tremendous
size of the game. Have some fun and press the "ALT" key then "D" then
"Return or Enter" (I think twice) then type in either GET OBJECT (and type in
a random #) or "TP" for transport (and a random #) and see what happens. It
works., and if you're tired looking for a certain object the "Get Object"
function works great!

1.228   knightmare

KNIGHTMARE

This cheat involves the woodland section on the first level. Use the spade

quest shield that hangs on the wall, and make each character consume two
rabbit pies from the inventory screen.
Continue with your quest and you should find that your hit points never
decrease.

1.229   kristal

KRISTAL

Fights - Proficent swordplay is essential if your to get anywhere in
the game. The neck chop is one of the more effective blows, but the
program blocks repetition of single moves. To get around this, occasionally
switch to a different move in order to enable the neck chop once
again. Give generously to the poor and you'll be a step closer to obtaining
the Sword of the Spheres.

The Palace - To enter the palace, you'll need to get the invitation
from the elusive Gloop, found in Novala. Once you have it, keep out of
fights or you could lose it for good. When you get into the palace,
ask Nedrod three questions and he will give you the talisman, which
can help you find another useful item. Answer the Princess' question
with "Its a secret". She will give you the Ring of Belz, which will
only work in conjunction with the spell scroll.

In General - Objects are not always found in the same places from game
to game, so a detailed search of both fore and backgrounds is often in
order. To survive the final confrontation, a high psychic rating is
needed, which can be increased by donating skringles to the poor. Dis-
orderly conduct can have the opposite effect. The safest technique in
the space battles, is to slow right down as soon as you see the aliens
shoot them all, then power at full steam until the next lot. Follow
Readheads ship if you see it. Heatpro tablets are necessary if you
beam down to one of the hotter planets. Makes notes of what you are
told, and use any new names or subjects to weavel out every last bit
of information from the characters.

1.230   laser squad

LASER SQUAD

   In LASER SQUAD, for fun do THe Assassins on Level 1. Buy no armour,
   give the corporal an M4000 with two reloads, the next two rocket
   launchers with four rockets each, and the last two nothing at all.
   Deploy in the entrance, in the gap in the outer wall , and take the
   house to pieces with the rockets, waiting for droids or Regix to show
   up – get them with Jonlan's M4000. I managed to do the scenario with
   one shot – it went BETWEEN the leaves of the door, blew up against a
   wall and Regix was on the othe r side. End of story, fade to black.

LIGHT CORRIDOR

First a little hint: The green diamonds are essential as these award you
with an extra life. Some of the red diamonds will allow control over two
bats but this is more of a hinderence as the two bats prove confusing.
Avoid the blue squares as they will shrink the size of your bat.

LOST PATROL
```

Rest for 50 minutes – and for no loss of food – your strength is restored
by a few points. This restores all of your remaining men to 99 percent.

Keeping up your men's strength and morale is vital. Giving your men
50 minutes' rest a night, or during the day when it's too dark to
carry on, will slam your energy and morale levels to max. Even if
you don't have much food, you don't have to worry, as your men will
not eat it.
On reaching the first village (the first white cross on the map),
search the area to find a hole in the ground where the villagers
appear to be hiding. You then have two options: ENTER TUNNEL or
USE GRENADES. Gomez is useful at this point, but if he is dead, go
for the USE GRENADES option.
Start off questioning the villagers normally by aking them "Where
VC?" Once you have an answer, start the hard questioning, or a
village boy will get hold of a gun and shoot one of your men...

During a two player game type player one's name as FIELDS OF FIRE and
player two's as IN A BIG COUNTRY. This eliminates the lead to qualify in
the Top Ten and allows you to crawl around the track at a much safer speed.

Try player's names as MONSTER and SEVENTEEN for an especially rocky ride in
a vertically scrolling shoot-em-up.

Invulnerablity--

AGAINST MISSILES: Whether you are skiing or driving a now-buggy, the
moment you hear the missile being launched, stop immediately and begin to
turn around. Keep turning on the spot. The missile will narrowly miss you
then come back and keep pace alongside you for a while until it finally
speeds off to clobber someone else not so smart.

AGAINST MORTARS: Watch for the bomber. It will always come over the
horizon in front of you. If you are stopped, wait until it is
approximately half way to you (otherwise it may be able to dodge your
missile) then blast it. If you are moving fast blast it the moment it
appears over the horizon. If the bomber does manage to drop mortars turn
90 degrees quickly and speed off.

To earn heaps of experience points, make a backup of your original play disk.
Now boot and insert the disk that contains your characters. Save them onto
your second backup by going to the inn. Buy three tickets (green, yellow,
red or balck) and try to win in all three arenas. Remember to save after each
victory. Once you have a victory in each arena, go to the castle where the
bishop is held captive. Before entering flick the write protect tab to
protect your disk. Then enter and free the bishop with the correct key.
He will give you experience points if you have won three fights of the same
color. Exit and go to town. Open write protect tab and save at the inn.
You can repeat this several times. Once you have acquired mega-experience,
save your party using your original backup of the play disk.

NAVY MOVES

To reach part two of game type  786169

PART 1:
        Move back slightly when you encounter a mine. They're much
           less sensitive from the rear.
        Avoid jetski bullets by jumping or ducking.
        When approaching sharks, move the up and down nut left and right.
        Octopi and sea monsters are easily thwarted by holding down
           fire until both missiles are ignited and then releasing.
        Struggle to dock with a submarine? Put a mini-sub in the gap
           between the tailfin and the hull, face the left of the screen
           and move upwards slowly, the computer takes over the docking
           procedure for you.

PART 2:
        The code is 948411.
        Arrows indicate the direction of the lifts.
        Kill white marines and flamethrower troops to get more ammo,
           stand over the body and search thoroughly.
        To get the code of an official, you must shoot him with a gun,
           not a flamethrower.
        To enter computer codes, stand by a terminal, push up and
           you'll be asked for a code. Two of the codes are:

Transmit message: 1st or 2nd transmission official
Open door: 1st or 2nd machine official

        To open the reactor door, use the terminal next to the
reactor. The computer confirms the bomb is planted. Go out, use the
same terminal you used to open the door and transmit the following:
OABERYAMD. Now type END at the ready prompt and run like hell to the
conning tower.
---------------------
Another source:

The entry code for part two is 2277, and the solution is as follows, where L,
R, U and D have their usual meanings of LEFT, RIGHT, UP and DOWN.

From the start, R, D, R, Shoot 2nd Official and take his code, L,U, enter door,
R, shoot 1st Official and take his code, L, enter door, U, R, R, R, D, D, R, U,
enter door, D, enter "EMERGE" on the computer followed by 1st Official's code,
now type "STOP MOTOR" and enter 1st Official's code again, L, U, L, L, enter
door, U, R, R, R, R, D, enter door, R, enter door, R, enter door, R, D, D, L,
L, L, shoot the Transmission Official and take his code, L, type on the
computer "OPEN DOOR" then enter 2nd Officials code, L, set bomb on left side of
the screen, R, R, R, R, R, U, U, R, type on computer "TRANSMIT" then enter
```

transmission Officials code, now enter "OABERBYAMD", L, L, U, U, U go to left
side of screen.

much trouble.

1.284   new zealand story

NEW ZEALAND STORY

On the title screen, press 'Del' then 'M'. Then type FLUFFY KIWIS

(2nd cheat)
Pause the game, and press 'M'. You should hear a laser gun sound.
Type MOTHERFUCKENKIWIBASTARDS. Unlimited lives are yours.

Note: One another cheat starts the word as MUTH**********.
      Another file (this could be for ST version says type FLYFFY KIWIS
      (including space) at any time for infinite lives.

Hold SHIFT and type PHILLIP on the title screen for mega firepower.

3rd cheat (hadn't heard this one before)

1. To access the cheat mode just press "TRY CHEATING" (including the
      space) keys together while on the title screen. The border
   should turn grey and when you start the game you have infinite
         kiwi's and the ability to skip levels by pressing "<-".
2. Type either "DRATSABIWIKNEKCUFREHTOM" (this is backwards for
    tasteful and legal reasons) or "FLUFFY KIWIS". Then press DEL,
then M, then the code-ward then infinite kiwis shall be yours.

   Anyone heard of the whirl-winds? They advance you levels. Near the
   end of level 1_1 there are three large steps that you must climb to
   reach your brother (sister?), who is in a cage. Stand at the left edge
   of the top step, facing left and jump. But as you jump, fire. If your
   current weapon is arrows, fire halfway up, but if your weapon is bombs,
   fire at the top of your jump. A whirl-wind should appear after four
   hits, and it will take you to level 1_4.

   In 1_4, you will be in a little box under some water. Go up and to
   the right, and you come out in a small room with three boxes on the
   right hand side. Go up these, and you will see 4 long spaces, the top
   one having an "N" and a "D" in it. Go up t o the top one, get the
   letters, stand in the centre of the space, facing left, and fire. Yep,
   you guessed it, another whirl-wind. This one takes you to level 2_4.
   There are others, but I wont tell you - it would spoil it!

   But I will tell you that there is one on level 2_4. Happy hunting!

Or on level 2.4 , stand at the entrance to the room where the giant octopus
is located and fire to the right several times. A warp will appear that will
take you to the beginning of level 3.1.

        On level 1, part 1, move to the area containing three men with
boomerangs, shoot them. Go to the top of the third platform, move to
the left, jump and fire five times. A whirlwind in a box will appear,
if you enter it, you will be transported to the end of the level. Then
you can free Tiki's naughty friend just by jumping.
        When you recch the ice whale, move to the right-hand side of
the spikes, avoid the crystals, and wait until he picks you up. Once
inside the whale, you can start shooting, but avoid the ice drops.
        Meeting the rock monster without bombs makes him difficult to

pass. So collect bombs, go to the highest platform and shoot him. Kill
it by either dodging the bullets and hitting it when the doors open,
or by fireballs.
        The last boss you encounter is the balloon seal. He can't be
killed, by blows to the body, so you must hit the balloon. Be careful
for the balloon seal is armed with a cannon and shoots cannon balls at
tiki.

The town names are:

        AUCKLAND, ROTORUA, WAITOMO CAVES, STRAIT COOK, and MT COOK.

Try shooting arrows into certain clear areas because they can force a door
to appear. Jump into the door to enter a latter stage.

1.299 overlander

OVERLANDER

Just a few tips- When cruising the highway don't stop shooting,
and always choose the highest paid mission. Buy fuel carefully -
only enough for that level, after level 1 you MUST buy a
leanburner. Try to stay in the middle of the road and travel
fast, travelling slowly only burns more fuel. Fire bombs are more
useful than smart bombs when you learn how to use them.
Bulletproofing is necessary after level 2. When travelling
through the barriers the best speed is 90-120mph.

LEVEL 1:
 1. Select counterfeit money.
 2. Fuel up to 14 notches on the fuel guage.

3. Get turbo, 4 battering rams and two flare bombs.
4. After the first bikes slow down or the gunners will kill you.
5. Destroy trucks from as far away as possible.
6. Slow to 100-150 mph to negotioate barriers.
7. If you stay in the middle lane when you come to the wrecks you wont die

LEVEL 2:
1. Select kidnapped official.
2. Fuel up to half full.
3. Buy leanburner, a few bullet proofs, rams, and flare bombs.
4. After first bikes there's a nasty surprise in the valley below.

LEVEL 3: DARKLANDS
1. Select plutonium.
2. Fuel up to half full (if you have leanburner - if you don't then fill
   up to the max.
3. Buy rams, bullet proofing, flare bombs and lives if you need them.
4. The toughest part of the course is early on, so don't be afraid to let
   loose with the flare bombs.

LEVEL 4: THE GUTTER RUN
1. Select illegal chemicals. Fill up to max level.
2. Buy maximum rams, bullet proofs and as many lives as you can afford
   and flare and smart bomb depending on your bank balance.
3. The barriers are every where onthis level and you will need to be at
   90 - 100 mph to avoid them all. Try to save your rams for later in the
   level.
4. So you didn't like the "gunshot alleys" in 1,2 and 3? The alleys in 4
   are real mean. Smartbombs and bullet proofing are your best chances of
   survival.

LEVEL 5: GRAVEYARD
1. Choose the President. Fill up to maximum fuel.
2. Buy everything $40,000 up front plus whatever you had from the last
   level should be enough, lives should be on the top of your shopping
   list followed by rams, proofing, brakes, armour and weapons - don't
   bother with the wheelblades!
3. Do the same as for the last level. Because your car's at maximum
   everything, this level shouldn't proove too difficult.

1.300   over the net

OVER THE NET

First, choose a one set game, play the sea-cup and enter one team or two
human players.
When it's your turn to serve, move the non-serving player up to the top of
the court close to the net.
This will force one of the computer players to follow him.
Now do a jump serve (push up and fire), then hit the ball to the other
computer player by pushing right then down. The ball should drop between him
and the net and he should miss the ball. Hopefully this plan should work. I
don't know if it works with the other teams like Coco, Freaks etc but it
works with the Rollers and the Golden Boys."

PACLAND
```

When the title screen appears, type 'AVALON'. It should flash indicating
you now have unlimited lives! If that doesn't work, try the following:

Start a 2 player game. Make it as far as you can with player 1.
With player 2, you must be able to make it as far as the fairy to collect
your boots. Now that you have gotten your boots, you are going backwards to
where you started. Push the THIRD cactus on the way back, and a yellow
pacman will appear. Get it, now kill player 2. Continue playing with
player 1. Every time player 1 dies, get the yellow pacman with player 2 and
kill player 2 immediately. As long as you keep getting the yellow pacman
with player 2, player 1 will never die.

Hints:

Level 1 - Run to the third fire hydrant, and when you get there, jump over
          it and push it to the left. This will give you a blue hat that
          will make you invulnerable to the little ghosts that fall from
          planes.

Level 2 - Run to the third cactus, and push it to the left. You will now be
          invulnerable for the entire level!

Level 3 - After getting your magic boots, push the third cactus on the way
          back for a free life.

- Jump on the roof of ghost's car to escape
- Only use powerpills when ghosts are in range, or else it is wasted
- When you reach the breaktime sign, jump when you are about 1 inch away
  for a bonus (depending how high you are when the level ends)

GRIP, TICK, DUCK, OOZE, BLOB, BALL, WILD.

For a 4000 point bonus, you need to get the flooze to cross itself FIVE

There is also a secret bonus of 50,000 points if you completely fill the
screen with pipes.

1.311 pirates

PIRATES

When fighting against unbelievable odds don't panic. Choose the long-
sword. Keep using the slash-high attack to cause the most dammage. You
may get down to only one man left, but you can still defeat the enemy
captain. After you win, select Send A Prize Crew so you will have
enough people to sail your ship.

Don't attack a nation your home country is allied with, it will upset
both of them.

Don't wed till youve got all your promotions, your opportunities will
be much better. Make conversation with all the Governor's daughters,
however, they might gather important information for you from the
Governor's mansion.

From here on the cheat no longer works, the game runs as normal and you can die but it certainly gets you further along the track.

NOTE: Another cheat says password is HAMBURGER-HILL and pressing F1-F4 skips you to the corresponding levels.

Access codes: level 1- 170961, level 2- 010655, level 3- 610169. And now,
some tips: once in the core, you can't quit. So choose droids with good
lasers, Jack and Spud for example. The Quadralien mother is made up of 4
separate pieces grouped together and surrounded by Earthling boxes. The
mother can only be destroyed by blowing up each box from a different
direction. From the starting point there are three exits: north, east, and
west. Go east and destroy the first box, return to the starting point, and
go north to destroy the second box. You will now have both droids to blow
the remaining boxes. Go west through the one-way force field, and get the
other. Don't forget to keep recharging.

1.382 shockwave

SHOCKWAVE

A few hints and tips follow on how each of the four zones (armys, factorys,
mines and rigs) effect the game:

MINES - Each time a mine is purchased the income you receive for each time
        pass doubles.
FACTORYS - The more factorys you have the faster more weapons are produced,
           these are essential.
RIGS - These supply you with the fuel for each mission run. The more rigs
       you have the greater the amount of fuel you receive for each
       time pass.
ARMYS - For every army unit you own, the enemy slows down, eg. you have one
        army unit, for each four time passes that occur the enemy won't move
        for one time pass. If more than 50% of the sector is occupied by the
        enemy then you will lose one of your assests for each time pass that
        occurs. The best solution is when 30% of the sector is occupied go
        an attack the enemy.

You can build land on water. Find a straight (horizontal or vertical),
stretch of coastline and string a powerline along it. Next, move one
square over, out into the water and string another powerline parallel to
the first. Repeat as many times as you want. Then just
bulldoze all the excess powerlines and you can build on the new land.

To MAKE land you simply make a 3 lane highway across any water source.
When you make a road by putting 3 sections of road on top of three section
of road on top of three sections of road (3 by 3) you make 1 section of

```
land in the middle.            WWWWW    WWWWW      To make more land, just

Basic stuff

Each letter of the word WINGS on the main menu does something.
To access them hold down the CTRL Shift and Alt keys on the left side of the
keyboard while holding down the right mouse button.  While holding down
these keys and button, you can click on each of the letters in wings with the
left mouse button.  Each letter does the following:
  "W" toggles the music on and off
  "I" turns the CAPS LOCK key into an autofire button
  "N" no flight school missions required for new pilots
  "G" Guess
  "S" Saves game without having to exit

To access the other cheats you must go to flight school.

To get an awesome pilot (once only) click on the bullseye on the airplane
at the top of the flight school menu.  The screen will either flash or you
will get a requester asking if you want to quit (say no).  Then create a
new pilot.  Enter the name "Orca The Killer Tomato" (without the quotes, and
remember it's case sensitive).  Orca is all ready and doesn't need flight
school.

To access a menu of options (much of which is no longer useful or active)

quotes but be sure and type the two leading spaces.  DO NOT HIT RETURN to
enter the name, hit ESCape instead.  Then just follow the prompts.

plane will climb which is very annoying. By attacking from above you
```

drive the other plane down rather than up.

BEING TAILED- When you are being tailed hold the joystick to the
bottom-right. You should turn off to the right and out of the other
planes line of fire.

1.489 xybots

XYBOTS

Get a high score and enter 'ALF' for your name. Now you will have unlimited
lives.
        If you manage to reach level 10, you're better off using your
radar to kill the xybots. Just line them up using radar and fire, you
don't have to be able to see them.
        Keep as many keys with you as possible because some levels
don't have enough to complete them.
        There are short cuts to level seven on levels one and four -
you get extra cash for using them.
        If you have the extra energy upgrade try not to let your
energy fall below 100m, because you lose the upgrade if it does.
        Drums are not just decorations - hide behind them when
possible and use your zapper near to them to find more cannon power
        On level eight, near to the top left hand transporter you can get
to two white coins by blasting away one of the three walls around them.
        Don't split up in the two-player game, because it's easier to
complete it together.
        The master xybot lives on level 11, and you'll need to stock up
on double shot and extra shot speed to stand a chance of survival.
        Try to get one xybot to stand behind another - they'll blow

each other apart.
