TW-WABL! The World Wide Amiga Bbs List

© Copyright 1994, Ed Dukeshire

AmigaGuide edition Ported by:

Ron Glidden

Welcome to Ed Dukeshire's World Wide Amiga Bbs List in AmigaGuide format!

This listing of TW-WABL! was converted by me with the full knowledge and consent of Ed Dukeshire, and, contains the entire contents of the ascii version. (also available)

Distribution sites for TW-WABL!

Because of the differences in AmigaGuide libraries for WB2.x and ↔
3.x,

there are some "cosmetic imperfections" in the way this guide will look, depending on what version of AmigaDOS you are currently using. Some of the buttons (especially clustered) will be off center. Every attempt has been made to keep this problem at a minimum.

I have also taken advantage of some WB3.x specific features, such as bold, highlighted, italic, and underlined text. Also

HELP

is always

available with the AmigaGuide "Help" menu button. (Ghosted under WB2.x)

If you can read THIS sentence, these features will NOT exist!

I originally wrote this for WB3.0 with Multiview, using an Amiga 1200 with a screen resolution of 640 x 200, then, it was "made-to-fit" under the AmigaDOS 2.x environment.

If you have comments or suggestions about the AmigaGuide format of this list you may contact me at the Amiga Asylum BBS, or, by writing to me at the following addresses:

GENie address: R.GLIDDEN

=====

1.12 Checking the volume number

You can get the volume number of TW-WABL! with the "WB:C/Version" command from the shell without having to load up the database.

Click this button for a simulation

Depending on your set-up you may have to shuffle windows to see the results of this simulation, as it opens a seperate shell.

Also, if you've renamed this database the "simulation" will not work.
The file name should be: TW-WABL!.guide

1.13 No listing

There is currently no listing for this area
If you know of a system in this area please
contact
a
sysop of the Amiga Asylum BBS!

Thank You!

1.14 Understanding the codes

Understanding the codes

Bbs Name

c

S

Phone number

City

Baud

Modem

Net

Ln

For a simple explanation of the codes just click the appropriate ← button.

You can access this screen at any time by selecting the "bar" at the top of each listing, then hit "Retrace" a couple of times to return you to the previously displayed listing.

1.15 The name of Bbs system

Not much to explain here, just the name of the BBS!

1.16 Computer type the BBS uses

c = Computer type used
by the listed BBS.

a = Amiga i = IBM m = Mac r = Atari

This does not mean the system is Amiga, IBM, Mac or Atari specific. Many BBS's are multi-platform, no matter what type of computer is in use to run the BBS software.

1.17 Telephone numbers

With the AmigaGuide edition of this list you will be allowed to select a specific State, and area code within that state. At any time you can look in the title bar to see which state is being listed as well as the area code.

International numbers are currently only seperated by countries. County codes and city codes are included, refer to your local telephone book for a better understanding of these codes.

To place an international call you must first contact your long distance company for information on how to use their service for international calling.

1.18 City location of BBS

City from which the Bbs is opertated.

New BBS numbers in this list have a * in front of the City
Changes to a BBS in this list will have a @ in front of the City
Telephone number changes, or additions, are indicated with a #

1.19 Baud rates

This column will tell you the MAXIMUM Baud rate the BBS is running at. You may call in at rates equal to or slower than that listed. Note: on many multi-line systems, the rate varies from line to line.

If you call a multi-line Bbs:

1. Check the baud rates of each line listed.
2. Many Sysops have commented on people calling a "higher" baud line with a "lower" baud connection (when they have "lower" baud lines empty!). This means the higher speed lines are busy more often.
3. Call the line with the rate closest to your modem. If it is busy THEN try the other lines. This makes it fair for everyone!

1.20 Number of lines available

If the system is multi-line, the total amount of lines or the line number will be placed in between the '[]', otherwise it'll be left blank for easier reading.

1.21 Disclaimers

=====

DISCLAIMER: ALTHOUGH THIS LIST IS AS ACCURATE AS POSSIBLE, PLEASE REMEMBER, BBS SYSTEMS WILL COME AND GO ON ALMOST A DAILY BASIS. ALL THE INFORMATION IN THIS LIST HAS BEEN COMPILED FROM NODELISTS, SYSOPS, AND USERS. IF YOU FIND A BBS ON THIS LIST THAT IS NO LONGER ONLINE, PLEASE

INFORM

ME AS SOON AS POSSIBLE SO IT CAN BE REMOVED FROM THE NEXT LIST.

ALSO, IF YOU RUN UP A HUGE PHONE BILL, I AM NOT RESPONSIBLE! :-)

=====

DISCLAIMER NUMBER TWO: THIS LIST CAN NOT BE REPRODUCED WITHOUT MY PERMISSION. THE TEXT VERSION MAY BE VIEWED AS A BULLETIN ON ANY BBS SYSTEM AS LONG AS THE HEADER (FROM THE TOP OF THE LIST DOWN TO THE "SYSOP PLEASE POST THIS FILE FOR USERS TO ACCESS" MESSAGE) IS INTACT!

1.223 Where to get TW-WABL!

/X/ Where to get TW-WABL! each month:

- On UseNet in alt.bbs.lists
- On Aminet (FTP wuarchive.wustl.edu:pub/aminet/)
- Or e-mail root@amicent.raider.net to be added to the monthly mail list.
- Each month, TW-WABL! will be hatched into ADS and SAN (there will be two versions available, the Ascii version and the AmigaGuide version. One month, ADS will receive the Ascii version, while SAN will receive the AmigaGuide version. The following month it'll be switched).
- GENie will receive the latest list on the night its released.

1.224 People to thank!

/X/ Thanks to the following people for additions, distribution, changes, suggestions, help, verifying, inputing, format, etc.!:

ALL the FidoNet and AmigaNet SysOps that sent me your information via NetMail and/or Origin lines! Without your co-operation, this list couldn't have been possible!! Keep running those Amiga bbses!

Also, a special thanks to the following (past and present):

Neil Alper, Heather Anderson, Greg Bastow, Bill Beogelein, Roger Clark, Joel Couch, Gord Dimitrieff, David Dustin, Michael Glew, Victor Laking, Rich Lembree, Robert Niles, Joe Rothman, Glenn Schworak, Chet Solace, Mike Soucy, David Stevens, Cary Timar, Steven Walker.

/X/ A special thanks to the following people that helped with this edition:

- Carl Tashian ----- for making TW-WABL! available via mailing lists on Internet, posting it in alt.bbs.lists, and uploading it to Aminet each month. Thanks Carl!
*/ BBS: Amiga Central! (615)-383-9679
- Ron Glidden ----- for converting the List to AmigaGuide format! I look forward to seeing his version every month. Wait till you see what else he has in store. :-)
- Roger Clark ----- for keeping Texas current and updated!
*/ BBS: Hotel California (512)-929-8154
- Chris W. Rea ----- for submitting most of the new BBX additions this month!
*/ BBS: IntuitionBase BBX (905)-569-1482
- Tony Preston ----- for keeping me updated on the Citadel systems! Keep up the work on programming Citadel! And, thanks for the BBS database program.

1.227 Available Networks on the BBS

/X/ Nets = Message Base Networks (only Amiga-related topics listed)

A = AmigaNet -- a whole Network with ALL Amiga ONLY topics/messages!
 C = C86Net ---- a shared Network of Amiga related messages with other

Citidel BBS systems.

F = FidoNet --- one of the Biggest Networks around!

I = InterNet -- A network covering the entire world. Perhaps 19,000 networks with millions of individual systems are connected to the InterNet. InterNet nodes are mostly UNIX systems.

L = C-Link ---- over 100 systems patched in nation-wide! 99% of the systems are C-Net Amiga boards. Currently includes 3 Amiga specific echos.

M = MaxNet ---- A network of about 100 systems in the USA, Canada and Australia with five Amiga specific message echoes. The MaxNet backbone systems are almost exclusively Amiga BBSes.

R = RIME ----- a shared Network between PC-Board systems.

S = CisNet ---- a local Manitoba network comprised mostly of Amiga systems, but not limited to Amiga only topics.

U = Usenet ---- The User's Network of newsgroups (something like message echoes) with about twenty Amiga specific newsgroups. As of late 1993, about 3000 newsgroups are distributed around the world, via the InterNet.

X = Aminet ---- Amiga only network in Switzerland

Z = Zerberus -- a Network based in Germany

If someone could come up with better text to describe these Networks, I could use the help.

1.229 Quick scan instructions

Quick scan instructions

Click on United States or Canadian Provinces, to select area codes for those countries (Other countries are direct). Numbers to the left of the area code indicates how many new listings for that specific area.

Selecting a SPECIFIC area will bring you directly to that node, where you will find the NEW listings indicated with an " * " before the city.

Also, in some instances, you will see an " @ " sign, which tells you that some information has CHANGED since the last issue. A " # " indicates that a phone number has been changed, or added.

Be sure to click "RETRACE" after checking the updates to return to the Quick scan area to make another selection.
