Sheet1

TITLE,C,110

Mule deer habitat selection patterns in northcentral Washington.

Assessing health of male white-tailed deer by white blood cell counts.

Recruitment dynamics in a southern California mountain sheep population.

California sea lion distribution: a statistical analysis of aerial transect data.

Comparative dynamics of introduced tule elk populations.

Validation and modification of a habitat suitability model for pronghorns.

Pronghorn reactions to winter sheep grazing, plant communities, and topography in the Great Basin.

Estimating carcass fat levels in ruffed grouse from wing fat.

Methods of estimating total lipid content in the redhead duck (*Aythya americana*) and an evaluation of Omental fat: a condition index for redbilled teal.

A decoy trap for breeding-season mallards in North Dakota.

Estimating prairie falcon and golden eagle nesting populations in North Dakota.

Microbial infections in a declining wild turkey population in Texas.

Reproductive success and nesting habitat of Merriam's wild turkeys in Oregon.

Winter fasting and refeeding effects on urine characteristics in white-tailed deer.

Effects of winter fasting and refeeding on white-tailed deer blood profiles.

Evaluation of mark-recapture for estimating striped skunk abundance.

An estimate of hunting mortality based on the age and sex structure of the harvest.

A simple relationship between removal rate and age-sex composition of removals for certain animal populations.

Estimation of harvest rate of black bears from age and sex data.
