

## Sheet1

- \*---A macro to TRAP errors in a loop WITHOUT breaking the loop.  
Let's say you want to combine 10 files to a worksheet, therefore  
ENDLOOP=10. If the drive door is open a message will appear.  
Close the drive door and try again. You can use this macro for other  
than file combining. Use your own ERROR ROUTINE and prompt message.
- \*---Use the /Range Name Label Right {End} {Down} <ENTER> to define the  
range names in this column (starts with the \Z macro name)
- \*---Hold the <ALT> key and press <Z> to activate the macro
