

Sheet1

- *---A macro to transpose a range in a way that preserves formulas too
- *---Use the /Range Name Label Right {End} {Down} <ENTER> to define the range names in this column (starts with the \Z macro name)
- *---Place the cell pointer on the upper leftmost cell of the range to be transposed, make sure there is at least one empty row above the range
- *---Hold the <MACRO> key and press <Z> to activate the macro
- *---The transposed range will begin at the same cell
