SUMERIA PRODUCT LIST:

- OceanLife Volume 1: Western Pacific Hybrid \$39.95
This CD ROM-based magazine takes its readers to the tropical reefs of the Western Pacific-Vanuatu, Fiji, and Tonga-to see over 40 species of the world's most elusive creatures in their natural environment. Underwater film of the fish combined with information about habitat and range provide the reader with a glimpse of the future of field guides.
- OceanLife Volume 2: Micronesia Hybrid 2-CD set\$49.95
This double CD set is the second in the series of interactive CD ROM-based books on marine life. It includes original underwater video and still photography of more than 150 species, ranging from Ponaphei to Palau. The most comprehensive work of its kind includes fish behavior on subjects like mating, predation, camouflage, brooding and nesting. Learn more about Micronesia by exploring the detailed maps (topographical, relief and political).
- OceanLife Volume 3: Hawaii Hybrid \$49.95
The third in a series of interactive CD ROM-based books on marine life from Hawaii. This CD features comprehensive text, range maps, photographs, and full color video for over 90 species and multi-mode access that lets you browse by photo, name, or keyword. Unique interactive maps of the Hawaiian archipelago provide bathymetric and topographical information for the reefs of Hawaii. An expanded interactive morphology section details anatomical variations that help aquarists and divers identify species. New in this volume is an easy-to-use visual index of families and phyla of Hawaiian marine life.
- OceanLife Volume 4: The Great Barrier Reef Hybrid 2-CD set\$49.95
This fourth issue in the series features extensive text, range maps, photographs, and movies for over 200 species of fishes. This 2-CD set includes approximately three hours of original, narrated underwater video, music, photography and information on the Great Barrier Reef. Comprehensive charts and unique interactive maps of the region allow the user to explore with great detail the largest coral reef in the world. A new section on the ecology of the Great Barrier Reef allows readers to explore the formation and development of the reef. Other features include text search and movie and text export.
- Exploring Ancient Cities Hybrid \$59.95
This CD brings articles from Scientific American to multimedia format. Readers can explore Teotihuacan (Mexico); Pompeii (Italy); Petra (Jordan); and four of Crete's Bronze Age Palaces. Readers will have access to interactive maps, video, photography, sound narration, text export, video and photo export.
- SPACE: A Visual History of Manned Space Flight Hybrid \$49.95
The first of its kind, this CD presents a complete history of space flight from Mercury to current Shuttle flights. This CD provides a narrated overview of thirty years of the US space program culled from hundreds of hours of video. A must see for space fans who can also use the materials since all video is public domain. View one of the first hybrid CDs-playable on Macintosh or Windows computers.

QuickTime: The CD 1992 Macintosh \$29.95
Winners of the 1992 QuickTime Film Festival. Nearly 500 megabytes of digital films selected by a distinguished panel of computer scientists and film industry computer experts as the best of the year.
