About MSI

Mustang Software, Inc. offers a range of products for your telecommunication needs. All these products are available through your usual retail and mail order channels.

Wildcat! 4 BBS

Mustang Software unveiled the first Wildcat! BBS in 1986. Since its initial release, Wildcat! has emerged as the world's most popular Bulletin Board System (BBS) software with more than 30,000 Sysops worldwide. A centralized, PC-based information system, Wildcat! is packed with more intelligent features and value than any other BBS product available. Callers can send, receive and view messages and files, access external applications, and chat 24 hours a day. This full-featured software is available in four configurations for the hobbyist, small business and Fortune 1000 corporations, and allows simultaneous access from one to 250 users. Since Mustang offers complete BBS solutions, Sysops don't need to go searching for third-party add-on products.

Wildcat! Single Line

Our economical and easily-installed flagship product requires only a telephone line, a personal computer, and a modem to begin posting messages and routing files around the world. Wildcat! 4 maintains its dominance in the BBS market by giving you greater flexibility and power. Intelligent features include:

- A .GIF thumbnailer that lets your callers download and preview a sample of multiple .GIF files in one combined bitmapped file;

- An industry first, spell-checking editor to allow your callers to audit their text before posting their messages;

- RIPscrip graphics to provide your callers with a graphical user interface (GUI) and allow them to navigate the BBS with their mouse;

- A free-form menuing system that gives you the ability to create a custom menu structure and command system;

- Support for over 32,000 message conferences and file areas to give your BBS plenty of room to grow;

- Sysop-defined language files that allow your callers to select the BBS language interface of their choice;

- wcDRAW BBS display screen editor that lets you customize the look of your BBS interface;

- The ability to perform all BBS Sysop functions from remote so you can maintain your data while you're on the road.

- Support for Serial, DigiBoard, FOSSIL and OS/2 com driver.

These product features are just a few of the reasons why Mustang Software maintains its leadership as the Number 1 BBS supplier worldwide. Our liberal upgrade policy allows Sysops to start with our Single Line version and trade it in later for full credit to any of our MultiLine products.

Wildcat! MultiLine 10

This MultiLine package extends the functionality of our base product by supporting up to 10 simultaneous users through your Local Area Network (LAN), multitasking environment or combination. The MultiLine 10 allows concurrent use of database utilities without interrupting your online user activity, and adds a powerful online chat conferencing system, with up to 8 high speed connections on a single 486 or Pentium PC.

Wildcat! MultiLine 48

Designed for corporate environments, Wildcat! MultiLine 48 extends MultiLine 10 features by supporting up to 48 concurrent users. Your LAN users have all of the E-Mail, messaging and file functions of dial-up users, so you can increase corporate productivity, in-house communications and customer access.

Wildcat! MultiLine Platinum

The same range of powerful features and performance of our smaller versions, with take-it-to-the max support for up to 250 concurrent connections. The premium package for large networks and mega-sized commercial bulletin board systems.

Wildcat! BBS Suite

Only Mustang could revolutionize the industry by producing the first "BBS Suite". The Wildcat! BBS Suite includes our top-of-the-line Wildcat! MultiLine Platinum BBS software with the wcPRO database utility, wcFAX on-demand server, wcGATE Internet/Novell MHS mail gateway, and wcCODE development tool kit to give you the ultimate BBS solution.

Wildcat! BBS Suite processes statistics and creates graphs on Wildcat!'s activities; allows your customers to receive product literature and troubleshooting tips via fax; attaches your message databases to the Internet and MHS-compatible E-Mail products; and gives you all the power to fully customize Wildcat!'s interface and create custom BBS applications, all in one economical yet powerful package. The BBS Suite is the ultimate tool for the professional Sysop -- you!

An Exciting Array Of Add-On Packages.

Our powerful collection of add-on utilities will enhance any *Wildcat!* 4 BBS. Developed by the same Software Engineers that brought you *Wildcat!* 4, these utilities have the same easy-to-use interface as the rest of the *Wildcat!* 4 family, and are fully supported by Mustang Software, giving you a single-source for all your BBS needs.

wcPRO Utilities For The In-Control Sysop

wcPRO provides powerful user, message and file database maintenance capabilities. You can create custom reports with more than 20 pages of online statistics, create custom command macros for nightly batch processing, and export BBS data into other formats for external applications.

Our relational database handling makes managing your BBS callers, files and messages quick and easy. The *wcPRO* utilities package also includes our fax-on-demand processor, *wcFAX*, so your callers can request data online and receive product literature, registration forms, and price list documents via their fax.

wcGATE Internet/MHS Messaging Gateway

A sophisticated messaging gateway, *wcGATE* enables your callers to send and receive Internet E-Mail and news right from your BBS without having to know a single Internet command. Built-in support for satellite connections means your callers can have a constant flow of Internet information at their fingertips. *wcGATE* also allows you to transfer BBS messages to your company's favorite MHS-compatible E-Mail system. Outside sales-people and remote offices can leave messages on the BBS and have them directed to the appropriate mail box on your LAN using Novell's Message Handling Service.

wcCODE Custom Online Development Engine

wcCODE allows you to develop custom applications to enhance or change Wildcat's operation. BASIC-like syntax combined with an Integrated Development Environment makes it easy to use the more than 200 built-in functions, including access to *Wildcat!*'s internal operations. *wcCODE* allows you to customize *Wildcat!* and write applications which will work on any *Wildcat!* 4 BBS. Easy-to-read manual and sample applications like our wcLIST BBS Lister and an on-line order system are included.

wcBILLING Accounting & Billing Module for Wildcat!

Turning a profit with your Wildcat! BBS just got a little bit easier. With wcBILLING, the newest addition to the Wildcat! product line, you now have a tool to implement a real-time billing system on your BBS with the flexibility to credit or debit your caller's account balances by the minute, for reading and writing messages, uploading and downloading files, using doors and chatting.

QmodemPro for DOS

For more than nine years the DOS version of *Qmodem* has been the first choice of well over a quarter of a million pioneering communication enthusiasts worldwide.

The latest release of Qmodem, *QmodemPro for DOS,* is available in a package designed for you -- whether you're just discovering the on-line community, or you're a discriminating power user who demands a high performance, thoroughly professional package.

Off-Line Xpress for Windows

NEW! Windows version. QWK-compatible mail packet reader for Tomcat, QMail, and more. Reading mail from BBSs has never been easier. OLX can read packets generated by any .QWK compatible mail door used by most BBS, and generates reply packets in the .QWK format which can be uploaded back to the originating BBS. DOS version also

available.
