This disk contains an export module for the Kodak XL/XLT 77xx Digital printers. The help files, XL77xx.ini and Default.tbl files should all be placed in the Windows subdirectory. The Export.8be file should be put in the Photshop Plug-ins subdirectory The XLTABLES folder can be placed anywhere. This module requires a Future Domain SCSI Host Adaptor board in order to work.

This interface module is provided free of charge from Eastman Kodak Company. KODAK implies no warranties nor incurres any liabilities as a result of the performance of this module.
