How to order TBarcode from any place in the world!

For orders from Germany/Europe see BESTELL.WRI

Softwareentwicklung   **Tel. ++49/4121/63109**
Juergen Schlottke   **Fax ++49/4121/63971**
Schoenaich-Carolath-Str. 46   **CIS 100106,3034**
25336 Elmshorn
Germany

If You want to get a licensed version of TBarcode for Delphi from outside Europe, there is (at least for the moment) only one way to order:

Use the Compuserve SWREG service and look for the following SWREG numbers:

TBarcode 16-bit version for Delphi-1   **SWREG # xxxxx (unknown at release date)**

or

TBarcode 32-bit version for Delphi-2   **SWREG # xxxxx (unknown at release date)**

Registration/License Fee is (US$):   106.00   (Shipping & Handling included)

When registering by SWREG, You will get the most recent licensed version of TBarcode as a ZIP-file by Compuserve eMail direct from the author.

This eMail file will contain a special personalized resource file (*.RES) that will enable registered users to make "licensed updates" easily from future shareware releases: Simply copy Your licensed *.RES file into the latest shareware version and it will be a "licensed version". This service is granted for at least one year from date of purchase without additional costs. Most recent shareware versions will be available by Compuserve or Internet.

If You have any questions about SWREG, please GO SWREG in Your Compuserve access software (WINCIM).

If You live outside Europe and have no access to Compuserve and are interested in a licensed version of TBarcode, please contact the author by eMail for further information.
