

HP DeskJet 520 Notes for WordStar(R), Version 7.0d

Installation Notes

Use the DRIVER.EXE utility contained on the "HP DeskJet 520 Printer Drivers for DOS applications" diskette to decompress and copy the printer driver files to your WordStar directory.

IMPORTANT NOTE: The HP DeskJet 520 printer is compatible with the HP DeskJet 510 printer. The WordStar(R) driver included on this driver disk was developed for the HP DeskJet 510 printer and is recommended for use with your HP DeskJet 520 printer. Remember to select the HP DeskJet 510 as your printer model when selecting a printer driver in WordStar(R).

NOTE: This driver is intended ONLY for WordStar Version 7.0d. If you have a previous version, contact WordStar International Corporation to upgrade to version 7.0d.

Selecting the Printer in WINSTALL

1. Run the WINSTALL program provided with your WordStar package.
2. Highlight "Modify or install a printer (PRCHANGE)" and press <Enter>.
3. In the "Installed Printer Menu", type a new PDF name as follows; DJ510 ...then press <Enter>.
4. Highlight "Extra database" ...then press <Enter>.
5. Highlight "Hewlett-Packard DeskJet 510" ...then press <Enter>.
6. Highlight "Select printer adapter port", press <Enter> and choose the interface port (e.g., LPT1, etc.).
7. Highlight "Return to Installed Printer Menu" ...then press <Enter>.
8. Type "Y" (Yes) if you want the DeskJet 510 to be your default printer.
9. Press F10-Finished.
10. Highlight "Save and return to DOS" ...then press <Enter>.

For additional information on how to select and configure your printer within WordStar, refer to your software program documentation.

Miscellaneous Notes

The paper size defaults to US Letter (8.5" x 11"). Use the Layout pulldown menu to select A4 or other paper sizes and types. Transparency and glossy media printing is implemented with .bn commands.

Use WSCHANGE to set the super/subscript roll to 0 (.sr 0) to take full advantage of hardware superscript and subscript positioning. This is necessary when you are printing graphics adjacent to text and are using footnotes or explicit subscripts or superscripts.

Stacked envelopes (using MailList) will print with a wide left margin unless you create a macro to select landscape printing rather than

choosing envelopes. The minimum left margin is approximately 0.5" in landscape mode, whereas in envelope mode the minimum is 0.9".

Graphics printing in landscape orientation is not supported.

A graphic image that overlaps another graphic image may cause one of the images not to print, even though both images may be previewed on screen. If this problem occurs, resize (shrink) one of the graphics to correct the problem.

The WordStar drivers contained on the "HP DeskJet 520 Printer Drivers for DOS applications" diskette were developed by WordStar International Corporation, solely for use by licensed users of WordStar, Version 7.0d.
