

Alarm 1.5 (32-bit version)

Keywords: Parker, Time, Reminder, Warning, Buzzer, Sound, Win
Type: Shareware

Alarm is an easy-to-use but full-featured alarm system for Windows. It allows the user to set an unlimited number of alarms with reminder notes attached to them. Alarms may be scheduled to recur at pre-defined (or post-defined) intervals. Place its icon in your startup group.

The program also features a SNOOZE interval function, and the ability to modify an existing alarm. It uses Windows multimedia capabilities to play customizable sounds for alarms.

Some of the features in Alarm that may be of interest include:

- Recurring alarms: Once, daily, weekdays, weekly, monthly, annually, and custom recurrence
- Recurring alarms can have a termination date ("Repeat until:")
- Per alarm customizable "Don't remind after x minutes" (Range: 0-999)
- Day of week display when setting alarms
- Customizable alarm note fonts and colors
- An unlimited number of alarms
- An unlimited number of collections of alarms (files)
- WAV alarms sounds, which can be individually set for each alarm; select via Browse Button or drop down listbox.
- Alarms always editable
- Configurable snooze time, determined per alarm, after alarm has fired
- Snooze for up to 999 minutes, hours or days
- Large alarm note field: up to 2,147,483,647 characters
- Note field is always editable
- Always-on-Top option
- Toolbar and status bar
- Context-sensitive help
- Screen location memory
- It's not interpreted (like Visual Basic code); it's compiled. On most systems, there will be a perceivable speed difference.

Documentation: README.WRI plus context-sensitive Online Help

Getting Started

If Windows is not running, start Windows. Insert disk in drive A. In the Program Manager Window, choose Run from the File Menu. Type **a:\install** and press enter.

You may wish to put Alarm in your Program Manager Startup program group. This way, Alarm will launch every time you begin a new Windows session. You can do this by:

1. Opening the Startup program group
2. From Program Manager's File menu, choose New.
3. In the New Program Object dialog box, select the Program Item option, and then choose the OK button.
4. Fill in the Program Item Properties dialog box as follows:

- Command line: C:\Alarm\Alarm.exe C:\Alarm\Data.alm
(use your own program location and data file name and location)

5. Choose the OK button.

For help with the Program Item Properties dialog box, choose the Help button or press F1 while using the dialog box. Alarm seems to be happiest if it is the last icon in the startup group.

Registration

The unregistered version of Alarm is limited to a 30-day trial period. Use it freely. As you approach 30 days you should be getting a pretty good sense of whether or not this is software you'd like to continue using. The registered version of Alarm does not load the help file every time it is launched.

Shareware

This program is shareware; you are given a free, 30-day trial period to determine if Alarm is useful for your purposes. If you decide to keep the program, you must register it by sending \$15.00 to:

Jeff Parker
1915 Mill Road
South Pasadena, CA 91030

When registering, please supply your User Name. This is usually your own name or a business name, provided it is between ten and twenty-three characters, including spaces. User Names are case-sensitive, so be sure to print yours exactly as you would like it to appear.

A key number will be sent back to you. From a menu, select File/More Options. The "More Options" dialogue box will appear. There you will find two edit boxes marked "User Name" and "Key".

When you type your user name and key number into the appropriate edit boxes, your copy of Alarm will be registered. Alarm may be freely distributed as long as no fee is charged for it other than a nominal fee for the media (not to exceed \$7.00). Alarm is copyrighted software and as such may not be altered in any way, and must be distributed with all files intact. Alarm consists of the following files:

Alarm.exe
Alarm.hlp

Even if you decide not to keep Alarm, please send me any comments, questions, gripes, or suggestions that you may have. I am especially interested in the discovery of any bugs or inaccuracies, and suggestions for features you would like to see in future versions.

Warrantee

What, are you kidding?

Alarm is provided AS IS without any warranty, express or implied. This includes without limitation the fitness for a particular purpose or application and any warranties of salability.

While every attempt was made to be as thorough as possible while debugging Alarm, Jeff Parker shall not be liable for any damages, whether direct, indirect, special, or consequential arising from a failure of this program or accompanying files to operate in a manner desired by the user. Jeff Parker shall not be liable for any damage to data or property which may be caused directly or indirectly by use of this program.

In no event will Jeff Parker be liable to you for any damages, including any lost profits, lost savings or other incidental or consequential damages arising out of your use or inability to use the program, or for any claim by any other party.

Simply put, don't even THINK about pinning any kind of responsibility on me. But I hope you enjoy it anyway.
